

wish to cooperate in the preparation of any environmental document, if applicable, to follow the instructions for filing such requests described in item k below. Cooperating agencies should note the Commission's policy that agencies that cooperate in the preparation of any environmental document cannot also intervene. *See* 94 FERC ¶ 61,076 (2001).

k. Deadline for filing comments, motions to intervene, and protests is October 4, 2024.

The Commission strongly encourages electronic filing. Please file comments, motions to intervene, and protests using the Commission's eFiling system at <http://www.ferc.gov/docs-filing/efiling.asp>. Commenters can submit brief comments up to 6,000 characters, without prior registration, using the eComment system at <http://www.ferc.gov/docs-filing/ecomment.asp>. The first page of any filing should include docket number P-1894-232. Comments emailed to Commission staff are not considered part of the Commission record.

The Commission's Rules of Practice and Procedure require all intervenors filing documents with the Commission to serve a copy of that document on each person whose name appears on the official service list for the project. Further, if an intervenor files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, they must also serve a copy of the document on that resource agency.

l. *Description of Request*: The licensee requests Commission approval to extend the seasonal turbine venting window requirements specified in the project's Turbine Venting Plan (Plan) through October 31, 2024. The Plan requires the licensee to provide turbine venting annually between June 15 and August 31 in order to increase dissolved oxygen levels downstream of Parr Shoals Dam.

Article 401(b) of the project license requires the licensee to obtain Commission approval for extensions exceeding 30 days. The licensee is seeking Commission approval to extend the seasonal turbine venting window through October 31, 2024, in light of requests from the South Carolina Department of Natural Resources and South Carolina Department of Health and Environmental Control, who are concerned that low dissolved oxygen levels may persist at the project through fall of 2024.

SUPPLEMENTARY INFORMATION:

Title: FERC–523, Application for Authorization for the Issuance of Securities or the Assumption of Liabilities.

OMB Control No.: 1902–0043.

Type of Request: Three-year approval of the FERC–523 information collection requirements with no changes to the current reporting requirements.

Abstract: The information collected by FERC–523 is required to implement the statutory provisions of section 204 of the Federal Power Act (FPA) (16 U.S.C. 824c). Under section 204 of the FPA, no public utility or licensee shall issue any security, or assume any obligation or liability as guarantor, endorser, surety, or otherwise in respect of any security of another person, until the public utility applies for and receives Commission approval by order authorizing the issuance or assumption of the liability. The Commission issues an order if it finds that such issuance or assumption (a) is for lawful object, within the corporate purposes of the applicant and compatible with the public interest, which is necessary or appropriate for or consistent with the proper performance by the applicant as a public utility, and which will not impair its ability to perform that service, and (b) is reasonably necessary or appropriate for such purposes.

The Commission uses the information contained in filings to determine its acceptance and/or rejection of applications for authorization to either issue securities or to assume an obligation or liability by the public utilities and licensees who submit these applications.

The specific application requirements and filing format are found at 18 CFR part 34, and 18 CFR 131.43 and 131.50. This information is filed electronically.

Type of Respondents: Public utilities subject to the Federal Power Act.

Estimate of Annual burden¹ and cost:² The Commission estimates the reduction in the annual public reporting burden for the FERC–523, as follows:

¹ Burden is defined as the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. For further explanation of what is included in the information collection burden, refer to 5 Code of Federal Regulations 1320.3.

² Commission staff estimates that the industry's skill set and cost (for wages and benefits) for FERC–523 are approximately the same as the Commission's average cost. The FERC 2024 average salary plus benefits for one FERC full-time equivalent (FTE) is \$207,786/year (or \$100.00/hour).
