

and challenges of centralized intake systems that refer to ECHV programs; (2) how centralized intake systems support outreach to and enrollment of families in ECHV programs; (3) enrolled families' experiences with centralized intake systems.

We will conduct virtual or in person site visits in seven sites, where a site is defined as including a centralized intake organization(s) and one or two associated home visiting programs. We will collect documentation related to:

- outreach, enrollment, screening, and referrals processes and pathways, and data about the defining characteristics of centralized intake systems;

- local contexts and community needs;
- communication processes and feedback loops with families and programs;
- successes and challenges of the system and opportunities for improvement or technical assistance;
- home visiting program staff and family perceptions of centralized intake;
- implementation of centralized intake;
- staff and family experiences with outreach and enrollment processes using centralized intake; and
- staff and family background characteristics.

Findings will highlight opportunities for program improvement efforts, technical assistance, or changes to centralized intake system processes. We will disseminate findings in a report, research briefs, and presentations or briefings.

Respondents: Centralized intake administrators and other staff responsible for overseeing outreach and enrollment; home visiting program directors and other staff responsible for overseeing outreach and enrollment; home visitors and other staff responsible for conducting outreach and enrollment; and families enrolled in home-visiting programs.

ANNUAL BURDEN ESTIMATES

Instrument	Number of respondents (total over request period)	Number of responses per respondent (total over request period)	Avg. burden per response (in hours)	Total/ annual burden (in hours)
Centralized Intake Administrator Screening	19	1	0.33	3
On site coordination ¹	14	1	4.0	56
Centralized Intake Administrator and Other Staff Interview Protocol	42	1	1.5	63
Document Review Request	21	1	0.25	5
Home visiting program director and Other Staff Interview Protocol	28	1	1.0	28
Home visitor and Other Staff Interview Protocol	42	1	1.0	42
Family interview protocol	42	1	1.0	42
Participant characteristics form	154	1	0.08	12
Total Annual Burden:				251

¹ There is no instrument associated with this activity, which refers to the time spent by the on-site coordinator (nominated by the home visiting program director) to help the research team coordinate data collection activities.

Authority: Social Security Act, title V, section 511 (42 U.S.C. 711), as extended by the Consolidated Appropriations Act of 2023 (Pub. L. 117–328) (fiscal years 2023–2027).

Mary C. Jones,
ACF/OPRE Certifying Officer.

BILLING CODE 4182–77–P

DEPARTMENT OF COMMERCE

National Institute of Standards and Technology

Information Collection Activities; Submission to the Office of Management and Budget (OMB) for Review and Approval; Comment Request; Generic Clearance for Decision Science Data Collections

The Department of Commerce will submit the following information collection request to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of

1995, on or after the date of publication of this notice. We invite the general public and other Federal agencies to comment on proposed, and continuing information collections, which helps us assess the impact of our information collection requirements and minimize the public's reporting burden. Public comments were previously requested via the **Federal Register** on June 11, 2024, during a 60-day comment period. This notice allows for an additional 30 days for public comments.

Agency: National Institute of Standards and Technology (NIST), Commerce.

Title: Generic Clearance for Decision Science Data Collections.

OMB Control Number 0693–0089.

Form Number(s): None.

Type of Request: Regular submission, extension of a current information collection.

Number of Respondents: 30,000.

Average Hours per Response: Varied, dependent upon the data collection method used. The possible response time may be 15 minutes to complete a

questionnaire or 2 hours to participate in an interview.

Burden Hours: 15,000.

Needs and Uses: The core mission of the National Institute of Standards and Technology (NIST) is to promote U.S. innovation and industrial competitiveness by advancing measurement science, standards, and technology in ways that enhance economic security and improve our quality of life. NIST's operating units across the agency increasingly recognize that the built environment is meant to serve social and economic functions. With this in mind, NIST proposes to conduct a number of data collection efforts directly related to decision-making across individuals, institutions, and communities relevant to key research areas of the agency. The use of decision and information science is critical to further the mission of NIST to promote U.S. innovation and industrial competitiveness. NIST proposes to conduct a number of data collection efforts in decision and information science to include: decision analysis, risk analysis, cost-benefit and cost-

effectiveness analysis, constrained optimization, simulation modeling, and application of perception, information processing, and decision models and theories; and drawing on parts of operations research, microeconomics, statistical inference, management control, cognitive and social psychology, and computer science. By focusing on decisions as the unit of analysis, decision science provides a unique framework for understanding interactions across technologies, socio-economic networks, organizations (*e.g.*, institutions, firms), elements of the built environment, and a range of ecological problems and perceptions that influence these decisions. Data may be collected through a variety of modes, including but not limited to electronic or social media, direct or indirect observation (*i.e.*, in-person, video and audio collections), interviews, structured questionnaires, and focus groups.

Affected Public: Federal Government; households and individuals; the private sector; and State and local governments.

Frequency: Select from the following options: once, annually, monthly, quarterly: Frequency will be variable across collections.

Respondent's Obligation: Voluntary.

Legal Authority:

This information collection request may be viewed at www.reginfo.gov. Follow the instructions to view the Department of Commerce collections currently under review by OMB.

Written comments and recommendations for the proposed information collection should be submitted within 30 days of the publication of this notice on the following website: www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting "Currently under 30-day Review—Open for Public Comments" or by using the search function and entering either the title of the collection or the OMB Control Number 0693–0089.

Sheleen Dumas,

Departmental PRA Clearance Officer, Office of the Under Secretary for Economic Affairs, Commerce Department.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Agency Information Collection Activities; Submission to the Office of Management and Budget (OMB) for Review and Approval; Comment Request; Social and Economic Survey of Hired Captains and Crew in Commercial Fisheries

The Department of Commerce will submit the following information collection request to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995, on or after the date of publication of this notice. We invite the general public and other Federal agencies to comment on proposed, and continuing information collections, which helps us assess the impact of our information collection requirements and minimize the public's reporting burden. Public comments were previously requested via the **Federal Register** on May 7, 2024 during a 60-day comment period. This notice allows for an additional 30 days for public comments.

Agency: National Oceanic and Atmospheric Administration, Commerce.

Title: Social and Economic Survey of Hired Captains and Crew in Commercial Fisheries.

OMB Control Number: 0648–0636.

Form Number(s): None.

Type of Request: Regular submission [revision and extension of a current information collection].

Annual Number of Respondents: 1,353.

Average Hours per Response: 15 minutes.

Total Annual Burden Hours: 338.

Needs and Uses: This request is for a revision and extension to an approved collection. The proposed revisions would do the following to the currently approved information collection.

1. Expand the scope from New England, Mid-Atlantic, South Atlantic, and Gulf of Mexico commercial fisheries to Puerto Rico, U.S. Virgin Islands, West Coast, and Pacific Islands commercial fisheries;

2. Change the title from "Socio-Economic Survey of Hired Captains and Crew in New England, Mid-Atlantic, South Atlantic and Gulf of Mexico Commercial Fisheries" to "Social and Economic Survey of Hired Captains and Crew in Commercial Fisheries";

a. Replace the survey instrument that OMB approved in 2021, which included some region-specific questions, with

region-specific survey instruments that NMFS produced by eliminating the few irrelevant questions for each region, adding a few region-specific questions, rewording a few questions to make them region specific, and giving each survey a region-specific name.

Under the revised information collection, the Northeast Fisheries Science Center (NEFSC) will conduct the survey for the New England and Mid-Atlantic fisheries; the Southeast Fisheries Science Center (SEFSC) will conduct the survey for the South Atlantic, Gulf of Mexico, Puerto Rico, and the U.S. Virgin Islands fisheries; the Northwest Fisheries Science Center (NWFS) and the Southwest Fisheries Science Center (SWFSC) will jointly conduct the survey for the West Coast fisheries; and the Pacific Islands Fisheries Science Center (PIFSC) will conduct the survey for the Pacific Islands fisheries. Each Fisheries Science Center will conduct a social and economic survey of hired captains and crew once in the following three years for its commercial fisheries.

The Fisheries Science Centers seek to conduct surveys to provide for the ongoing collection of social and economic data related to the fishing industries in those states. The purpose of this survey is to assess and track over time the social and economic conditions of commercial fishing crews and hired captains for which little is known. This survey will provide data on social and economic impacts for this population and the changes in fisheries because of regulatory changes. Data to be collected include demographic information on crew, individual and community well-being, fishing practices, job satisfaction, job opportunities, and attitudes toward fisheries management. The National Environmental Policy Act (NEPA) and Magnuson-Stevens Conservation and Management Act (MSA) both contain requirements for considering the social and economic impacts of fishery management decisions. There is a need to understand how such fishery management policies and programs will affect the social and economic characteristics of those involved in the commercial fishing industry. To help meet these requirements of NEPA and MSA, the Fisheries Science Centers will collect data on an ongoing basis to track how the social and economic characteristics of fisheries are changing over time and the impact of fishery management policies and programs implemented for the New England, Mid-Atlantic, South Atlantic, Gulf of Mexico, Puerto Rico, U.S. Virgin Islands, West Coast, and Pacific Islands commercial fisheries.
