

effectiveness analysis, constrained optimization, simulation modeling, and application of perception, information processing, and decision models and theories; and drawing on parts of operations research, microeconomics, statistical inference, management control, cognitive and social psychology, and computer science. By focusing on decisions as the unit of analysis, decision science provides a unique framework for understanding interactions across technologies, socio-economic networks, organizations (e.g., institutions, firms), elements of the built environment, and a range of ecological problems and perceptions that influence these decisions. Data may be collected through a variety of modes, including but not limited to electronic or social media, direct or indirect observation (i.e., in-person, video and audio collections), interviews, structured questionnaires, and focus groups.

Affected Public: Federal Government; households and individuals; the private sector; and State and local governments.

Frequency: Select from the following options: once, annually, monthly, quarterly: Frequency will be variable across collections.

Respondent's Obligation: Voluntary.

Legal Authority:

This information collection request may be viewed at www.reginfo.gov. Follow the instructions to view the Department of Commerce collections currently under review by OMB.

Written comments and recommendations for the proposed information collection should be submitted within 30 days of the publication of this notice on the following website: www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting "Currently under 30-day Review—Open for Public Comments" or by using the search function and entering either the title of the collection or the OMB Control Number 0693–0089.

Sheleen Dumas,

Departmental PRA Clearance Officer, Office of the Under Secretary for Economic Affairs, Commerce Department.

BILLING CODE 3510–13–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Agency Information Collection Activities; Submission to the Office of Management and Budget (OMB) for Review and Approval; Comment Request; Social and Economic Survey of Hired Captains and Crew in Commercial Fisheries

The Department of Commerce will submit the following information collection request to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995, on or after the date of publication of this notice. We invite the general public and other Federal agencies to comment on proposed, and continuing information collections, which helps us assess the impact of our information collection requirements and minimize the public's reporting burden. Public comments were previously requested via the **Federal Register** on May 7, 2024 during a 60-day comment period. This notice allows for an additional 30 days for public comments.

Agency: National Oceanic and Atmospheric Administration, Commerce.

Title: Social and Economic Survey of Hired Captains and Crew in Commercial Fisheries.

OMB Control Number: 0648–0636.

Form Number(s): None.

Type of Request: Regular submission [revision and extension of a current information collection].

Annual Number of Respondents: 1,353.

Average Hours per Response: 15 minutes.

Total Annual Burden Hours: 338.

Needs and Uses: This request is for a revision and extension to an approved collection. The proposed revisions would do the following to the currently approved information collection.

1. Expand the scope from New England, Mid-Atlantic, South Atlantic, and Gulf of Mexico commercial fisheries to Puerto Rico, U.S. Virgin Islands, West Coast, and Pacific Islands commercial fisheries;

2. Change the title from "Socio-Economic Survey of Hired Captains and Crew in New England, Mid-Atlantic, South Atlantic and Gulf of Mexico Commercial Fisheries" to "Social and Economic Survey of Hired Captains and Crew in Commercial Fisheries";

a. Replace the survey instrument that OMB approved in 2021, which included some region-specific questions, with

region-specific survey instruments that NMFS produced by eliminating the few irrelevant questions for each region, adding a few region-specific questions, rewording a few questions to make them region specific, and giving each survey a region-specific name.

Under the revised information collection, the Northeast Fisheries Science Center (NEFSC) will conduct the survey for the New England and Mid-Atlantic fisheries; the Southeast Fisheries Science Center (SEFSC) will conduct the survey for the South Atlantic, Gulf of Mexico, Puerto Rico, and the U.S. Virgin Islands fisheries; the Northwest Fisheries Science Center (NWFS) and the Southwest Fisheries Science Center (SWFSC) will jointly conduct the survey for the West Coast fisheries; and the Pacific Islands Fisheries Science Center (PIFSC) will conduct the survey for the Pacific Islands fisheries. Each Fisheries Science Center will conduct a social and economic survey of hired captains and crew once in the following three years for its commercial fisheries.

The Fisheries Science Centers seek to conduct surveys to provide for the ongoing collection of social and economic data related to the fishing industries in those states. The purpose of this survey is to assess and track over time the social and economic conditions of commercial fishing crews and hired captains for which little is known. This survey will provide data on social and economic impacts for this population and the changes in fisheries because of regulatory changes. Data to be collected include demographic information on crew, individual and community well-being, fishing practices, job satisfaction, job opportunities, and attitudes toward fisheries management. The National Environmental Policy Act (NEPA) and Magnuson-Stevens Conservation and Management Act (MSA) both contain requirements for considering the social and economic impacts of fishery management decisions. There is a need to understand how such fishery management policies and programs will affect the social and economic characteristics of those involved in the commercial fishing industry. To help meet these requirements of NEPA and MSA, the Fisheries Science Centers will collect data on an ongoing basis to track how the social and economic characteristics of fisheries are changing over time and the impact of fishery management policies and programs implemented for the New England, Mid-Atlantic, South Atlantic, Gulf of Mexico, Puerto Rico, U.S. Virgin Islands, West Coast, and Pacific Islands commercial fisheries.

Affected Public: Individuals (*i.e.*, hired captains and other crew members in commercial fisheries).

Frequency: Once.

Respondent's Obligation: Voluntary.

Legal Authority: The National Environmental Policy Act (NEPA) and Magnuson-Stevens Conservation and Management Act (MSA).

This information collection request may be viewed at www.reginfo.gov. Follow the instructions to view the Department of Commerce collections currently under review by OMB.

Written comments and recommendations for the proposed information collection should be submitted within 30 days of the publication of this notice on the following website www.reginfo.gov/public/do/PRAMain. BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[RTID 0648–XE233]

Pacific Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of public meeting.

SUMMARY: The Pacific Fishery Management Council's (Pacific Council) Ad-hoc Sacramento River Fall Chinook (SRFC) Workgroup will hold a two-day online meeting in October 2024.

DATES: The online meeting will be held on Wednesday, October 2, 2024 and Thursday, October 3, 2024, daily from 9 a.m. until 3 p.m., Pacific time, or when business for the day concludes.

ADDRESSES: This meeting will be held online. Specific meeting information, including directions on how to join the meeting and system requirements will be provided in the meeting announcement on the Pacific Council's website (see www.pcouncil.org). You may send an email to Mr. Kris

Kleinschmidt (kris.kleinschmidt@noaa.gov) or contact him at (503) 820–2412 for technical assistance.

Council address: Pacific Fishery Management Council, 7700 NE Ambassador Place, Suite 101, Portland, OR 97220–1384.

FOR FURTHER INFORMATION CONTACT: Angela Forristall, Staff Officer, Pacific Council; telephone: (503) 820–2419.

SUPPLEMENTARY INFORMATION: The primary purpose of the meetings is to address guidance received from the Pacific Council at their June 2024 meeting. The Workgroup will likely focus on finalizing their report that considers new or updated tools for SRFC management for the Pacific Council's November 2024 meeting. If applicable, the Workgroup may also discuss 2024 Salmon Methodology Review topics relevant to their tasking. Additional discussions may include, but are not limited to, future meetings, workload planning, and upcoming Council agenda items.

Although non-emergency issues not contained in the meeting agenda may be discussed, those issues may not be the subject of formal action during this meeting. Action will be restricted to those issues specifically listed in this document and any issues arising after publication of this document that require emergency action under section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the intent to take final action to address the emergency.

Special Accommodations

Requests for sign language interpretation or other auxiliary aids should be directed to Mr. Kris Kleinschmidt (kris.kleinschmidt@noaa.gov; (503) 820–2412) at least 10 days prior to the meeting date.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: September 9, 2024.

Rey Israel Marquez,

Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[RTID 0648–XE280]

Pacific Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and

Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of a public online meeting.

SUMMARY: The Groundfish Subcommittee of the Pacific Fishery Management Council's (Pacific Council) Scientific and Statistical Committee (SSC) will convene an online meeting to review the suitability of fish age estimates developed using Fourier Transformed Near-Infrared Spectroscopy (FT–NIRS) for inclusion in groundfish stock assessments. The methodology review meeting is open to the public.

DATES: The groundfish methodology review online meeting will be held Tuesday, October 1, 2024 and Wednesday October 2, 2024, daily from 8 a.m. until noon (Pacific daylight time) or until business for the day has been completed.

ADDRESSES: The groundfish methodology review will be conducted as an online meeting. Specific meeting information, including the agenda and directions on how to join the meeting and system requirements, will be provided in the workshop announcement on the Pacific Council's website (see www.pcouncil.org). You may send an email to Mr. Kris Kleinschmidt (kris.kleinschmidt@noaa.gov) or contact him at (503) 820–2412 for technical assistance.

Council address: Pacific Fishery Management Council, 7700 NE Ambassador Place, Suite 101, Portland, OR 97220.

FOR FURTHER INFORMATION CONTACT: Marlene A. Bellman, Staff Officer, Pacific Council; telephone: (503) 820–2414, email: marlene.bellman@noaa.gov.

SUPPLEMENTARY INFORMATION: The purpose of the groundfish methodology review meeting is aimed at evaluating FT–NIRS to provide a reliable alternative to traditional ageing. Proponents plan to explore and document the variability in estimated relationships between traditional age reads and spectral data across major categorical dimensions. In addition, the review may evaluate the effect that replacing large blocks of traditional ages in assessments with FT–NIRS ages has on important assessment metrics. Evaluation of the benefits of including additional variables and the costs/implications for use of the age data in estimating other relationships, such as growth, will be explored, as time permits. This review is planned in preparation for the 2025 groundfish stock assessment cycle. The results of
