

Closure of the September 2024 BFT General Category Fishery

To date, reported landings for the BFT General category September time period total 98.5 mt. Based on these landings data, including average daily catch rates, as well as anticipated favorable fishing conditions in the coming days, NMFS has determined that the adjusted September time period subquota of 188.3 mt is projected to be reached and exceeded shortly. Therefore, retaining, possessing, or landing large medium or giant (*i.e.*, measuring 73 inches (185 cm) CFL or greater) BFT by persons aboard vessels permitted in the Atlantic Tunas General category and HMS Charter/Headboat permitted vessels (while fishing commercially) must cease at 11:30 p.m. local time on September 12, 2024. The BFT General category will automatically reopen October 1, 2024, for the October through November time period. This action applies to Atlantic Tunas General category (commercial) permitted vessels and HMS Charter/Headboat permitted vessels with a commercial sale endorsement when fishing commercially for BFT and is taken consistent with the regulations at § 635.28(a)(1).

Waiver for Remaining September RFDs

On May 31, 2024 (89 FR 47095), NMFS published a final rule, which among other things, implemented RFDs every Sunday, Tuesday, Friday, and Saturday from July 1 through November 30, 2024. Since the fishery will be closed for the remainder of the September time period, NMFS has decided to waive the previously scheduled RFDs for the remainder of that time period. Previously scheduled RFDs (*i.e.*, every Sunday, Tuesday, Friday, and Saturday) will resume on October 1, 2024.

With the RFDs waived during a closure, consistent with § 635.23(a)(7), fishermen aboard General category permitted vessels and HMS Charter/Headboat permitted vessels may tag and release BFT of all sizes, subject to the requirements of the catch-and-release and tag-and-release programs described at § 635.26. All BFT that are released must be handled in a manner that will maximize their survival, and without removing the fish from the water, consistent with requirements at § 635.21(a)(1). For additional information on safe handling, see the “Careful Catch and Release” brochure available at <https://www.fisheries.noaa.gov/resource/outreach-and-education/careful-catch-and-release-brochure/>.

Monitoring and Reporting

NMFS will continue to monitor the BFT fisheries closely. Per § 635.5(b)(2)(i)(A), dealers are required to submit landing reports within 24 hours of a dealer receiving BFT. Late reporting by dealers compromises NMFS’ ability to timely implement actions such as quota and retention limit adjustments, as well as closures, and may result in enforcement actions. Additionally, and separate from the dealer reporting requirement, General and HMS Charter/Headboat category vessel owners are required per § 635.5(a)(4) to report their own catch of all BFT retained or discarded dead within 24 hours of the landing(s) or end of each trip, by accessing <https://hmspermits.noaa.gov>, using the HMS Catch Reporting app, or calling 888–872–8862 (Monday through Friday from 8 a.m. until 4:30 p.m.).

After the fishery reopens on October 1, depending on the level of fishing effort and catch rates of BFT at that time, NMFS may determine that additional adjustments are necessary to ensure available subquotas are not exceeded or to enhance scientific data collection from, and fishing opportunities in, all geographic areas as specified under § 635.27(a)(7). If needed, subsequent adjustments will be published in the **Federal Register**. In addition, fishermen may access <https://hmspermits.noaa.gov>, for updates on quota monitoring and inseason adjustments.

Classification

NMFS issues this action pursuant to section 305(d) of the Magnuson-Stevens Act (16 U.S.C. 1855(d)) and regulations at 50 CFR part 635 and this action is exempt from review under Executive Order 12866.

The Assistant Administrator for NMFS (AA) finds that pursuant to 5 U.S.C. 553(b)(B), it is impracticable and contrary to the public interest to provide prior notice of, and an opportunity for public comment on this action, for the following reasons. Specifically, the regulations implementing the 2006 Consolidated HMS FMP and amendments provide for inseason retention limit adjustments and fishery closures to respond to the unpredictable nature of BFT availability on the fishing grounds, the migratory nature of this species, and the regional variations in the BFT fishery. Providing for prior notice and an opportunity to comment is impracticable and contrary to the public interest as this fishery is currently underway and, based on the most recent landings information, the

available time period subquota is projected to be reached shortly. Delaying this action could result in BFT landings that exceed the September time period subquota, which may result in future potential quota reductions for other BFT categories, depending on the magnitude of a potential overharvest. Taking this action does not raise conservation and management concerns and would support effective management of the BFT fishery. NMFS notes that the public had an opportunity to comment on the underlying rulemakings that established the U.S. BFT quota and the inseason adjustment and closure criteria.

For all of the above reasons, the AA also finds that pursuant to 5 U.S.C. 553(d), there is good cause to waive the 30-day delay in effective date.

Authority: 16 U.S.C. 971 *et seq.* and 1801 *et seq.*

Dated: September 11, 2024.

Karen H. Abrams,

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 679

[Docket No. 240304–0068; RTID 0648–XE270]

Fisheries of the Exclusive Economic Zone Off Alaska; Reallocation of Pacific Cod in the Bering Sea and Aleutian Islands Management Area

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; reallocation.

SUMMARY: NMFS is reallocating the projected unused amount of Pacific cod from American Fisheries Act (AFA) catcher/processor vessels to Amendment 80 vessels in the Bering Sea and Aleutian Islands management area. This action is necessary to allow the 2024 total allowable catch (TAC) of Pacific cod to be harvested.

DATES: Effective September 11, 2024, through 2400 hours, Alaska local time (A.l.t.), December 31, 2024.

FOR FURTHER INFORMATION CONTACT: Steve Whitney, 907–586–7228.

SUPPLEMENTARY INFORMATION: NMFS manages the groundfish fishery in the Bering Sea and Aleutian Islands (BSAI)

according to the Fishery Management Plan for Groundfish of the Bering Sea and Aleutian Islands Management Area (FMP) prepared by the North Pacific Fishery Management Council under authority of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act). Regulations governing fishing by U.S. vessels in accordance with the FMP appear at subpart H of 50 CFR part 600 and 50 CFR part 679.

TAC specified for AFA catcher/processor vessels in the BSAI is 3,201 metric tons (mt) as established by the final 2024 and 2025 harvest specifications for groundfish in the BSAI (89 FR 17287, March 11, 2024).

The 2024 Pacific cod TAC allocated to Amendment 80 vessels in the BSAI is 18,647 mt as established by final 2024 and 2025 harvest specifications for groundfish in the BSAI (89 FR 17287, March 11, 2024).

The Administrator, Alaska Region, NMFS, (Regional Administrator) has determined that AFA catcher/processor vessels will not be able to harvest 1,500

mt of the AFA catcher/processor vessels 2024 Pacific cod TAC allocated to those vessels under § 679.20(a)(7)(ii)(A)(7). Therefore, in accordance with § 679.20(a)(7)(iii)(B), NMFS apportions 1,500 mt of Pacific cod from AFA catcher/processor vessels to Amendment 80 vessels.

The harvest specifications for 2024 Pacific cod included in final 2024 and 2025 harvest specifications for groundfish in the BSAI (89 FR 17287, March 11, 2024) are revised as follows: 1,701 mt to AFA catcher/processor vessels and 20,147 mt to Amendment 80 vessels.

Classification

NMFS issues this action pursuant to section 305(d) of the Magnuson-Stevens Act. This action is required by 50 CFR part 679, which was issued pursuant to section 304(b), and is exempt from review under Executive Order 12866.

Pursuant to 5 U.S.C. 553(b)(B), there is good cause to waive prior notice and an opportunity for public comment on this action, as notice and comment

would be impracticable and contrary to the public interest, as it would prevent NMFS from responding to the most recent fisheries data in a timely fashion and would delay the reallocation of Pacific cod specified from AFA catcher/processor vessels to Amendment 80 vessels. NMFS was unable to publish a notice providing time for public comment because the most recent, relevant data only became available as of September 10, 2024.

The Assistant Administrator for Fisheries, NOAA also finds good cause to waive the 30-day delay in the effective date of this action under 5 U.S.C. 553(d)(3). This finding is based upon the reasons provided above for waiver of prior notice and opportunity for public comment.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: September 11, 2024.
