

respective Member of Congress by requesting access to and consenting to the disclosure of their records.

The Creating Advanced Streamlined Electronic Services for Constituents Act of 2019 (CASES Act) was enacted to modernize and simplify the process by which individuals can request access to and consent to the disclosure of their personal records held by Federal agencies. This Act addresses the inefficiencies and inconsistencies that previously existed in obtaining written consent for information disclosure.

Under the Privacy Act of 1974, individuals have the right to access their records and control the disclosure of their personal information. However, the traditional process of obtaining written consent was often cumbersome, requiring physical signatures and manual transmission of forms. This not only delayed the resolution of constituent inquiries but also created variability in how different Components

within DoD handled these requests. The CASES Act mandates the use of electronic access and consent forms, which can be submitted digitally. By allowing digital submissions, the Act aims to streamline the process, reduce delays, and enhance the efficiency of government services.

Dated: September 11, 2024.

Aaron T. Siegel,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

APR 11 2023

The Honorable Kevin McCarthy
Speaker of the House
U.S. House of Representatives
H-209, The Capitol
Washington, DC 20515

Dear Mr. Speaker:

Pursuant to the reporting requirements of Section 36(b)(1) of the Arms Export Control Act, as amended, we are forwarding herewith Transmittal No. 21-57 concerning the Navy's proposed Letter(s) of Offer and Acceptance to the Government of Morocco for defense articles and services estimated to cost \$250 million. After this letter is delivered to your office, we plan to issue a news release to notify the public of this proposed sale.

Sincerely,

James A. Hursch
Director

(viii) *Date Report Delivered to Congress: April 11, 2023*

* As defined in Section 47(6) of the Arms Export Control Act.

POLICY JUSTIFICATION

Morocco—Joint Stand Off Weapons (JSOW)

The Government of Morocco has requested to buy forty (40) AGM-154C Joint Stand Off Weapons (JSOW). Also included are Dummy Air Training Missiles; Captive Flight Vehicles (CFVs); Free Flight Vehicles (FFVs); containers; mission planning, integration support, and testing; munitions storage security and training; weapon operational flight program software development; transportation, tools and test equipment; support equipment; spare and repair parts; publications and technical documentation; personnel training and training equipment; U.S. Government and contractor engineering and logistics support services; and other related elements of logistical and program support. The estimated total cost is \$250 million.

This proposed sale will support the foreign policy and national security of the United States by helping to improve the security of a Major Non-NATO Ally that continues to be an important force for political stability and economic progress in North Africa.

The proposed sale will improve Morocco's capability to meet current and future threats. Morocco intends to use the missiles on its F-16, multi-role

fighter aircraft and will provide enhanced capabilities in effective defense of critical sea lanes. The proposed sale of these missiles and support will increase the Royal Moroccan Air Force's maritime partnership potential and align its capabilities with existing regional baselines. Morocco will have no difficulty absorbing these weapons into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal contractor will be Raytheon Missiles & Defense Company, Tucson, Arizona. There are no known offset agreements proposed in connection with this potential sale.

Implementation of this proposed sale will require annual trips to Morocco involving U.S. Government and contractor representatives for technical reviews, support, and oversight for approximately seven (7) years.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 21-57

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act

Annex

Item No. vii

(vii) *Sensitivity of Technology:*

1. The AGM-154 Joint Stand Off Weapon (JSOW) is used by Navy, Marine Corps, and Air Force, and allows aircraft to attack well-defended targets in day, night, and adverse weather conditions. The AGM-154C carries a BROACH warhead. The BROACH warhead incorporates an advanced multi-stage warhead. The JSOW uses the Global Positioning System (GPS) Precise Positioning System (PPS), which provides for a more accurate capability than the commercial version of GPS.

2. The highest level of classification of defense articles, components, and services included in this potential sale is SECRET

3. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software

elements, the information could be used to develop countermeasures that might reduce weapon system effectiveness or be used in the development of a system with similar or advanced capabilities.

4. A determination has been made that Morocco can provide substantially the same degree of protection for the sensitive technology being released as the U.S. Government. This sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification.

5. All defense articles and services listed in this transmittal have been authorized for release and export to the Government of Morocco.
