#### I. Authority for This Rulemaking

The Commercial Space Launch Act of 1984, as amended and codified at 51 U.S.C. 50901-50923 (the Act), authorizes the Secretary of

Transportation to oversee, license, and regulate commercial launch and reentry activities, and the operation of launch and reentry sites within the United States (U.S.) or as carried out by U.S. citizens. Section 50905 directs the Secretary to exercise this responsibility consistent with public health and safety, safety of property, and the national security and foreign policy interests of the United States. In addition, section 50903 requires the Secretary to encourage, facilitate, and promote commercial space launches and reentries by the private sector. As codified in 49 CFR 1.83(b), the Secretary has delegated authority to the FAA Administrator to carry out these functions.

## II. Executive Summary

### A. Purpose of the Regulatory Action

This rule makes several changes to incorporate government astronauts in the regulations, in accordance with the United States Commercial Space Launch Competitiveness Act (CSLCA).<sup>1</sup> It amends title 14 of the Code of Federal Regulations (14 CFR) parts 401, 413, 415, 431, 435, 437, 440, 450, and 460 by incorporating statutory changes resulting from the CSLCA. Specifically, it adds definitions for “Government astronaut,” “International partner astronaut,” and “International Space Station Intergovernmental Agreement,” and revises definitions of “Human space flight incident,” “Launch,” “Launch accident,” “Reenter; reentry” “Reentry accident,” and “Space flight participant,” to incorporate changes required by adding the definition of “Government astronaut.” The rule also creates two new subparts in 14 CFR part 460 that include requirements for operators and applicants whose licensed or permitted operations involve government astronauts with and without safety-critical roles on board a vehicle. The rule revises the human space flight sections of parts 415, 431, 435, 437, and 450 to add government astronauts to the list of people who can be on board a launch or reentry vehicle, and adds certain additional provisions in part 460 to the list of provisions with which an operator must comply.

Additionally, this rule expands the applicability of part 437 to include launching or reentering certain reusable suborbital vehicles. The rule also revises parts 401, 413, 415, 431, 435, 437, 440,

<sup>1</sup> The CSLCA adds government astronauts as a third category of people on board launch or reentry vehicles, excludes government astronauts from the definition of third party, adds space flight participants to the waiver of claims with operators, and expands the applicability of permits to more types of vehicles and operations.
