

The Proposal

The FAA is proposing to amend 14 CFR part 71 by:

Establishing Class E airspace extending upward from 700 feet above the surface within a 6-mile radius of Citizens Medical Center, Victoria, TX. This action is to support new instrument procedures and IFR operations at this airport.

Regulatory Notices and Analyses

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

This proposal will be subject to an environmental analysis in accordance with FAA Order 1050.1F, “Environmental Impacts: Policies and Procedures” prior to any FAA final regulatory action.

SUPPLEMENTARY INFORMATION:

Background

On July 29, 2024, the Bureau of Industry and Security (BIS) published in the **Federal Register** a proposed rule entitled, “Export Administration Regulations: Crime Controls and Expansion/Update of U.S. Persons Controls” (89 FR 60998), which proposed to establish certain Foreign-Security End User (FSEU) and “U.S. persons” activities controls and Commerce Control List-based (CCL) controls. The proposed additions of the foreign-security end user control and “U.S. persons” activities controls would implement expanded authority under the Export Control Reform Act of 2018 (ECRA), as amended, to control certain “U.S. persons” activities under the EAR. BIS is proposing amendments to control “support” furnished by “U.S. persons” to identified FSEUs. In addition, BIS is proposing to add to the CCL two new unilateral item controls on facial recognition technology.

In response to requests from the regulated community, the Department of Commerce is extending the comment period for 15 days.
