

(2) A rate incentive may be included in a percentage change in rates calculation if it meets the following criteria:

(i) The rate incentive is in the form of a discount or can be easily translated into a discount;

(ii) Sufficient billing determinants are available for the rate incentive to be included in the percentage change in rate calculation for the class, which may be adjusted based on known mail characteristics or historical volume data (as opposed to forecasts of mailer behavior); and

(iii) The rate incentive is either:

(A) A rate of general applicability; or

(B) A rate not of general applicability that satisfies the following requirements:

(1) The rate incentive is not only available upon the written agreement of both the Postal Service and a mailer, or group of mailers, or a foreign postal operator;

(2) The rate incentive is applicable to all mail meeting standards established by the Mail Classification Schedule, the Domestic Mail Manual, and the International Mail Manual;

(3) The rate incentive does not benefit only a single mailer;

(4) The rate incentive is designed to increase volume; and

(5) A mailer's eligibility for the rate incentive depends on the mailer's sending, in a specified period of time (which must not be less than three months) a volume of mail of specified products that exceeds a specified threshold volume of mail, provided that such threshold volume of mail is not less than the volume of the specified products that the mailer sent in the specified period of time in the immediately preceding fiscal year or calendar year.

(3) The Commission may require submission of such information as it deems necessary to ensure that rate incentives included in the percentage change in rates calculation comply with the requirements of this section.

(g)(1) Mail volumes sent at rates under a negotiated service agreement or a rate incentive that is not a rate of general applicability are to be included in the calculation of the percentage change in rates under this section as though they paid the appropriate rates of general applicability, except as provided in paragraph (f)(2) of this section. Where it is impractical to identify the rates of general applicability (*e.g.*, because unique rate categories are created for a mailer), the volumes associated with the mail sent under the terms of the negotiated service agreement or the rate incentive that is not a rate of general

applicability shall be excluded from the calculation of the percentage change in rates.

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: The state of West Virginia has applied to the United States Environmental Protection Agency (EPA) for final authorization of revisions to its hazardous waste program under the Resource Conservation and Recovery Act (RCRA). EPA has determined that these revisions satisfy all requirements needed to qualify for final authorization, subject to public comment. Therefore, in the "Rules and Regulations" section of this **Federal Register**, we are authorizing West Virginia for these changes as a final action without a prior proposed rule. If we receive no adverse comment, we will not take further action on this proposed rule.

Fisheries of the Caribbean, Gulf of Mexico, and South Atlantic; Fishery Management Plans of Puerto Rico, St. Croix, and St. Thomas and St. John; Amendment 2

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Proposed rule; request for comments.

SUMMARY: NMFS proposes to implement management measures described in Amendment 2 to the Puerto Rico Fishery Management Plan (FMP), Amendment 2 to the St. Croix FMP, and Amendment 2 to the St. Thomas and St. John FMP (jointly Amendment 2), as prepared by the Caribbean Fishery Management Council (Council). If implemented, this proposed rule and Amendment 2 would prohibit and restrict the use of certain net gear in U.S. Caribbean Federal waters and would require a descending device to be available and ready for use on vessels when fishing for federally managed reef fish species in U.S. Caribbean Federal waters. The purpose of this proposed rule and Amendment 2 is to protect habitats and species from the potential negative impacts associated with the use of certain net gear and to enhance the survival of released reef fish in U.S. Caribbean Federal waters.

DATES: Written comments must be received no later than October 30, 2024.

ADDRESSES: A plain language summary of this proposed rule is available at <https://www.regulations.gov/docket/NOAA-NMFS-2024-0084>. You may submit comments on this document, identified by “NOAA–NMFS–2024–0084” by either of the following methods:

SUPPLEMENTARY INFORMATION: NMFS, with the advice of the Council, manages the Puerto Rico, St. Croix, and St. Thomas and St. John fisheries in U.S. Caribbean Federal waters under the Puerto Rico, St. Croix, and St. Thomas and St. John FMPs. The Council prepared the FMPs, which the Secretary of Commerce approved, and NMFS implements the FMPs through regulations at 50 CFR part 622 under the authority of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act).

Background

The Magnuson-Stevens Act requires NMFS and the regional fishery management councils to prevent overfishing and achieve, on a continuing basis, the optimum yield from federally managed fish stocks to ensure that fishery resources are managed for the greatest overall benefit to the nation, particularly with respect to providing food production and recreational opportunities, and protecting marine ecosystems.
