Abstract: Under the Clean Water Act (CWA), the EPA develops effluent limitations guidelines (ELGs) to limit pollutants discharged from industrial point source categories. The EPA initially promulgated the Textiles Mills ELGs in 1974 (39 FR 24736, July 5, 1974) and amended the regulations in 1977 (42 FR 26979, May 26, 1977) and 1982 (47 FR 38810, September 2, 1982). Textiles mills receive and prepare fibers, transforming these materials into yarn, thread or webbing. Other mills convert yarns and webbing into fabric or related products and finish these materials. Many textile mills produce a final consumer product such as thread, yarn, fabric, hosiery, sheets, towels, and carpet. The current regulation covers wastewater discharges from textile mills which perform one or more of the following operations and discharge process wastewater directly to surface waters or indirectly to surface waters through publicly owned treatment works (POTWs): wool scouring, wool finishing, yarn and unfinished fabric manufacturing, woven fabric finishing, knit fabric finishing, carpet finishing, and nonwoven textile products of wool, cotton, synthetics, or blends of such fabrics.

As announced in the Effluent Guidelines Program Plan 15 (88 FR 6258, January 31, 2023), the EPA is continuing to evaluate the available data on types and concentrations of PFAS in wastewater discharged from textile mills. A questionnaire for the textile mills industry is necessary for the EPA to determine if the current regulations remain appropriate and, if warranted, to develop and propose new regulations. If new regulations are deemed to be warranted, the questionnaire is essential for the EPA to complete the detailed technical analysis necessary for the rulemaking. The EPA has identified and compiled mailing addresses for approximately 2,200 textile manufacturing facilities in the United States. A subsequent wastewater sampling program will require a subset of approximately 20 textile manufacturing facilities that completed the questionnaire to also collect wastewater samples and submit them to an EPA-contracted laboratory. Wastewater sampling data are critical for characterizing the wastewater generated and discharged by textile manufacturing facilities, as well as evaluating the effectiveness of pollution control practices and technologies to

reduce or eliminate PFAS in discharges. Additional objectives of the questionnaire and sampling will be to confirm the current population of textile mills, estimate the volume of wastewater discharged from the industry, confirm which mills still use PFAS in their processes, and gather facility-specific information and data relevant to generation and discharge of PFAS-containing wastewater by the industry.

Form Numbers: None.

Respondents/affected entities: Up to 2,243 textile mills in the U.S. will receive the questionnaire and no more than 20 facilities will be asked to conduct specific wastewater sampling.

Respondent's obligation to respond: Mandatory (Clean Water Act section 308).

Estimated number of respondents: 2,243 (total).

Frequency of response: One-time data collection.

Total estimated burden: 22,863 hours. Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$1,615,788 (per year), which includes \$10,576 annualized capital or operation & maintenance costs.

Changes in the estimates: This is a new data collection request and is a one-time temporary increase to the Agency's burden.

Director, Information Engagement Division.

Information Collection Request Submitted to OMB for Review and Approval; Comment Request; Data Reporting Requirements for State and Local Vehicle Emission Inspection and Maintenance (I/M) Programs (Renewal)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency has submitted an information collection request (ICR), "Data Reporting Requirements for State and Local Vehicle Emission Inspection and Maintenance (I/M) Programs" (EPA ICR No.1613.08, OMB Control No. 2060-0252) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act. This is a proposed

extension of the ICR, which is currently approved through October 31, 2024. Public comments were previously requested via the **Federal Register** (89 FR 13910) on March 18, 2024, which included a 60-day comment period ending on May 17, 2024. This notice allows for an additional 30 days for public comments.

DATES: Comments may be submitted on or before October 30, 2024.

ADDRESSES: Submit your comments, referencing Docket ID Number EPA–HQ–OAR–2008–0707, to (1) EPA online using www.regulations.gov (our preferred method), or by mail to: EPA Docket Center, Environmental Protection Agency, Mail Code 28221T, 1200 Pennsylvania Ave. NW, Washington, DC 20460.

EPA's policy is that all comments received will be included in the public docket without change including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Abstract: Clean Air Act section 182 and EPA's regulations (40 CFR part 51, subpart S) establish the requirements for state and local I/M programs that are included in state implementation plans (SIPs). To provide general oversight and support to these programs, EPA requires that state agencies with Basic and Enhanced I/M programs collect two varieties of reports for submission to the Agency:

- An annual report providing general program operating data and summary statistics, addressing the program's current design and coverage, a summary of testing data, enforcement program efforts, quality assurance and quality control efforts, and other miscellaneous information allowing for an assessment of the program's relative effectiveness; and

- A biennial report on any changes to the program over the two-year period and the impact of such changes, including any deficiencies discovered and corrections made or planned.

General program effectiveness is determined by the degree to which a program misses, meets, or exceeds the emission reductions committed to in the state's approved SIP, which, in turn, must meet or exceed the minimum emission reductions expected from the relevant performance standard, as promulgated under 40 CFR part 51, subpart S, in response to requirements established in section 182 of the Clean Air Act. This information is used by EPA to determine a program's progress toward meeting requirements under 40 CFR part 51, subpart S, and to provide background information in support of program evaluations. Additional information regarding the current renewal of this ICR as well as previous renewals can be found in Docket ID No. EPA–HQ–OAR–2008–0707.

Form Numbers: None.

Respondents/affected entities: State I/M program managers.

Respondent's obligation to respond: Mandatory (40 CFR 51.366).

Estimated number of respondents: 26 (total).

Frequency of response: Annual and biennial.

Total estimated burden: 2,236 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$165,776 (per year), includes \$0 annualized capital or operation & maintenance costs.

Changes in Estimates: There is no change in the total estimated respondent

burden compared with the ICR currently approved by OMB.
