America waiver to the Illinois Department of Transportation (IDOT) for the procurement of submersible pumps with non-domestic iron and steel components. Specifically, this waiver covers the procurement by IDOT of 4 main, submersible pumps with discharge capacity of 3,000 gallons per minute (gpm) each and 2 low flow submersible pumps with discharge capacity of 921 gpm each (“waiver items”), for the relocation of existing Pump Station No. 37.

SUPPLEMENTARY INFORMATION:

Electronic Access

An electronic copy of this document may be downloaded from the **Federal Register**’s home page at: www.FederalRegister.gov and the Government Publishing Office’s database at: www.GovInfo.gov.

Background

FHWA’s Buy America regulation in 23 CFR 635.410 requires a domestic manufacturing process for any steel or iron products (including protective coatings) that are permanently incorporated in a Federal-aid construction project. The FHWA also applies its Buy America requirements to predominantly steel and iron manufactured products and predominantly steel and iron components of manufactured products. This means that for all predominantly steel or iron materials, products, or components delivered to a project site for permanent incorporation into a highway project using Title 23, U.S.C. funds, all manufacturing processes, including application of a coating, must occur in the United States. FHWA’s Buy America regulation also provides for a waiver of the Buy America requirements when satisfactory quality domestic steel and iron products are not produced in the United States in sufficient and reasonably available quantities.

Background on the Waiver Items: IDOT requested a Buy America waiver for 4 main submersible pumps with a discharge capacity of 3,000 gpm each
