II. Background

Under section 406 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, as amended ¹ (Stafford

Act), the President may provide financial assistance to eligible applicants for the repair, restoration, reconstruction, or replacement of an eligible facility damaged by a major disaster at a minimum Federal cost share of 75 percent.²

The Bipartisan Budget Act of 2018³ amended the Stafford Act to add the new provision 406(b)(3) authorizing FEMA’s Public Assistance (PA) program to increase the minimum Federal cost share for measures that increase readiness for, and resilience from, a major disaster.⁴

This interim Public Assistance Mitigation Cost Share Incentives Policy applies to PA-eligible applicants, including State, local, Tribal, and Territorial governments and certain private nonprofit organizations, and implements section 406(b)(3) by providing guidance regarding eligible measures that meet FEMA’s criteria for the Federal cost share increase up to 85 percent.

III. Maximizing the Value of Public Feedback

The impacts of Federal policies tend to be widely dispersed on society. Members of the public are likely to have useful information, data, and perspectives on the benefits and burdens of FEMA’s existing programs and policies. FEMA seeks public feedback relevant to FEMA’s interim Public Assistance Mitigation Cost Share Incentives Policy.

The following is meant to assist members of the public in formulating comments. This notice contains a list of five questions, the answers to which will assist FEMA in understanding how and why incentive measures in the interim policy are supported or opposed by stakeholders, and additional incentive measures that should be considered for inclusion in a future version of the policy. FEMA encourages public comment on these questions and seeks any other national-level data that commenters believe are relevant to FEMA’s interim policy review. Below are recommendations for commenters to use when making comments in response to the questions, so that FEMA can better evaluate potential changes to the interim policy:

- Commenters should explain, with as much detail as possible, why an aspect of the interim policy should be modified and provide specific suggestions of ways the agency can better achieve its objectives.
