The public also is invited to provide comment on the current Healthy People 2030 objectives and propose additional core, developmental, or research objectives for consideration that address critical public health issues. Proposed new objectives must meet all the objective selection criteria (see below). The public is also invited to propose new topics to be considered for inclusion in Healthy People 2030.

Objective Selection Criteria

Core Objectives

Core objectives must meet the following five criteria to be included in Healthy People 2030. Core objectives should (1) have a reliable, nationally representative data source with baseline data no older than 2015; (2) have at least two additional data points beyond the baseline during the decade; (3) be of national importance; (4) have effective, evidence-based interventions available to achieve the objective; and (5) have data to help address disparities and achieve health equity.

Developmental Objectives

Developmental objectives will have the following characteristics: (1) represent high priority issues; (2) do not have reliable baseline data yet; and (3) have evidence-based interventions available.

Research Objectives

Research objectives will have the following characteristics: (1) represent key opportunities to make progress in

areas with limited prior research, a high health or economic burden, or significant disparities between population groups; (2) may or may not have reliable baseline data; and (3) do not have evidence-based interventions available.

Written comments and evidence-based information should be submitted by email to HP2030Comment@hhs.gov by 11:59 p.m. ET on October 31, 2024. Comments received in response to this notice will be reviewed and considered by the Healthy People topic area workgroups, Federal Interagency Workgroup on Healthy People 2030, and other federal subject matter experts.
