

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Overview of This Information Collection

(1) *Type of Information Collection:* Revision of a Currently Approved Collection.

(2) *Title of the Form/Collection:* Inter-Agency Alien Witness and Informant Record.

(3) *Agency form number, if any, and the applicable component of the DHS sponsoring the collection:* Form I-854; USCIS.

(4) *Affected public who will be asked or required to respond, as well as a brief abstract:* Primary: Federal Government. Form I-854 is used by law enforcement agencies to bring alien witnesses and informants to the United States in "S" nonimmigrant classification.

(5) *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* The estimated total number of respondents for the information collection I-854A is 29 and the estimated hour burden per response is 3 hours. The estimated total number of respondents for the information collection I-854B is 34 and the estimated hour burden per response is 1 hour.

(6) *An estimate of the total public burden (in hours) associated with the collection:* The total estimated annual hour burden associated with this collection is 121 hours.

(7) *An estimate of the total public burden (in cost) associated with the collection:* The estimated total annual cost burden associated with this collection of information is \$0.

Dated: September 12, 2024.

Samantha L. Deshommes,

Chief, Regulatory Coordination Division, Office of Policy and Strategy, U.S. Citizenship and Immigration Services, Department of Homeland Security.

BILLING CODE 9111-97-P

DEPARTMENT OF THE INTERIOR

Geological Survey

[GX20EG31DW50100; OMB Control Number 1028-0129]

Agency Information Collection Activities; Hydrography Addressing Tool

AGENCY: Geological Survey, Department of the Interior.

ACTION: Notice of information collection; request for comment.

SUMMARY: In accordance with the Paperwork Reduction Act (PRA) of 1995, the U.S. Geological Survey (USGS), is proposing to renew an information collection with revisions.

DATES: Interested persons are invited to submit comments on or before December 2, 2024.

ADDRESSES: Send your comments on this information collection request (ICR) by mail to U.S. Geological Survey, Information Collections Officer, 12201 Sunrise Valley Drive, MS 159, Reston, VA 20192; or by email to gs-info_collections@usgs.gov. Please reference OMB Control Number 1028-0129 in the subject line of your comments.

FOR FURTHER INFORMATION CONTACT: To request additional information about this ICR, contact Michael Tinker by email at mdtinker@usgs.gov, or by telephone at 303-202-4476.

Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

SUPPLEMENTARY INFORMATION: In accordance with the PRA, (44 U.S.C. 3501 *et seq.*) and 5 CFR 1320.8(d)(1), all information collections require approval under the PRA.

As part of our continuing effort to reduce paperwork and respondent burdens, we invite the public and other Federal agencies to comment on new, proposed, revised, and continuing collections of information. This helps us assess the impact of our information collection requirements and minimize the public's reporting burden. It also helps the public understand our information collection requirements and provide the requested data in the desired format.

We are especially interested in public comment addressing the following:

(1) Whether or not the collection of information is necessary for the proper

performance of the functions of the agency, including whether the information will have practical utility.

(2) The accuracy of our estimate of the burden for this collection of information, including the validity of the methodology and assumptions used.

(3) Ways to enhance the quality, utility, and clarity of the information to be collected; and

(4) How the agency might minimize the burden of the collection of information on those who are to respond, including using appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of response.

Comments that you submit in response to this notice are a matter of public record. We will include or summarize each comment in our request to OMB to approve this ICR. Before including your address, phone number, email address, or other personally identifying information (PII) in your comment, you should be aware that your entire comment—including your PII—may be made publicly available at any time. While you can ask us in your comment to withhold your PII from public review, we cannot guarantee that we will be able to do so.

Abstract: This 60-day notice is a renewal, with revisions, for the Hydrography Addressing Tool (HydroAdd), a website developed by the USGS National Geospatial Program, National Geospatial Technical Operations Center (NGTOC).

HydroAdd supports users by providing a mechanism for addressing (or referencing) diverse external datasets to the National Hydrography Dataset (NHD). For example, a user can utilize HydroAdd to reference the geographic locations of field observations of fish presence to the NHD. HydroAdd provides a framework for the management of addressed data and enables upstream and downstream analyses within the context of the stream network. Any type of information can be addressed to the stream network, making this tool highly useful for a broad range of purposes that benefit the Nation.

HydroAdd users are members of the public in State and local government, the private sector, academia, or are other users with basic knowledge of GIS. To use HydroAdd, users must first share their geospatial data as a hosted web feature service from ArcGIS Online. HydroAdd displays the user's data as a web feature service in the browser window. Users can then utilize HydroAdd to address their data to the

NHD. Note that HydroAdd does not allow users to edit the NHD. Users are strictly limited to editing their own data.

Users must register at the HydroAdd website. When registering, users are required to fill out a profile with a username and email contact. This information is stored in the application database.

Revisions to HydroAdd are currently in development. These revisions include (a) allowing HydroAdd to use the latest hydrography product from the USGS 3D Hydrography Program (3DHP), (b) implementing an open-source hosting service for user data (GeoServer), rather than ArcGIS Online, (c) updating some of the underlying logic to speed GIS processing, and (d) updating the name of the tool to *HydroAdd3d*.

Title of Collection: Hydrography Addressing Tool.

OMB Control Number: 1028–0129.

Form Number: NA.

Type of Review: Revision of a currently approved collection.

Respondents/Affected Public: 200.

Total Estimated Number of Annual Respondents: 200.

Total Estimated Number of Annual Responses: 200.

Estimated Completion Time per Response: 1 hour.

Total Estimated Number of Annual Burden Hours: 200.

Respondent's Obligation: Voluntary.

Frequency of Collection: one time, or as needed if respondent business contact information changes.

Total Estimated Annual Nonhour Burden Cost: None.

An agency may not conduct or sponsor, nor is a person is required to respond to a collection of information unless it displays a currently valid OMB control number.

Kimberly Mantey,

Director, National Geospatial Technical Operations Center.

BILLING CODE 4388–11–P

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[BLM_AK_FRN_MO4500180029]

Boundary Establishment for Birch Creek National Wild and Scenic River, Bureau of Land Management, Alaska State Office, Yukon-Koyukuk Borough, Alaska

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of availability.

SUMMARY: In accordance with the Wild and Scenic Rivers Act, the Bureau of Land Management (BLM), Alaska State Office, is transmitting the final boundary of Birch Creek National Wild and Scenic River to Congress.

ADDRESSES: The Birch Creek Wild and Scenic River Boundary description is available for review at <https://www.blm.gov/sites/default/files/docs/2024-06/BLM-AK-Birch-Creek-WSR-Corridor-Lands-description.pdf>; or in person by contacting one of the following offices: the Bureau of Land Management National Office, (DOI Library), 1849 C St. NW, Washington, DC 20240, (202) 208–5815; or the Bureau of Land Management Alaska State Office, 222 West 7th Ave. Stop 13, Anchorage, AK 99513, 907–271–3386. To review in person, arrangements should be made in advance by contacting the appropriate office prior to arrival.

FOR FURTHER INFORMATION CONTACT: Zach Million, BLM Alaska Program Lead for Recreation, Travel Management and National Conservation Lands, by phone, 907–271–3386; or by email, zmillion@blm.gov. Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services for contacting Vivian Browning. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

SUPPLEMENTARY INFORMATION: In accordance with section 3(b) of the Wild and Scenic Rivers Act, the BLM Alaska State Office is transmitting the final boundary of the Birch Creek National Wild and Scenic River to Congress. The Birch Creek Wild and Scenic River boundary description is available for review on the website or in person as indicated in the **ADDRESSES** section.

The Alaska National Interest Lands Conservation Act of December 2, 1980 (Pub. L. 96–487), designated Birch Creek in Alaska as a National Wild and Scenic River to be administered by the Secretary of the Interior. The initial comprehensive river management plan (CRMP) was completed in 1983. A revision to the CRMP was needed to be in conformance with BLM's 2009 National Landscape Conservation System, 2016 Steese Record of Decision and Approved Resource Management Plan, and the 2022 Steese Travel and

Transportation Management Plan Decision Record.

As specified by law, the boundary will not be effective until 90 days after Congress receives the transmittal.

(Authority: 16 U.S.C. 1271; 16 U.S.C. 1274(b))

Steven M. Cohn,

State Director, Alaska.

BILLING CODE 4331–10–P

DEPARTMENT OF THE INTERIOR

Bureau of Ocean Energy Management

[Docket No. BOEM–2024–0036]

Notice of Availability of a Joint Record of Decision for the Proposed Atlantic Shores Offshore Wind South Project; Errata

AGENCY: Bureau of Ocean Energy Management, Interior; National Marine Fisheries Service, National Oceanic and Atmospheric Administration, Commerce, U.S. Army Corps of Engineers, Department of the Army.

ACTION: Record of decision; notice of availability of errata.

SUMMARY: On July 8, 2024, the Bureau of Ocean Energy Management (BOEM) published the notice of availability of the joint record of decision (ROD) on the final environmental impact statement (EIS) for the construction and operations plan (COP) submitted by Atlantic Shores Offshore Wind Project 1, LLC and Atlantic Shores Offshore Wind Project 2, LLC (Atlantic Shores) for its proposed Atlantic Shores Offshore Wind South Project (Project) offshore New Jersey in the **Federal Register** (89 FR 55977). The ROD described the Department of the Interior's selected alternative. This errata notice clarifies that the Department of the Interior's selected alternative also includes the removal of a single wind turbine generator (WTG) location, identified as AX01 and located approximately 150 to 200 ft (46 to 61 m) from the observed Fish Haven (Atlantic City Artificial Reef Site). While WTG AX01 was identified as removed in the description of the preferred alternative in the final EIS, BOEM inadvertently omitted a specific statement in the ROD noting that position was removed from the selected layout. In addition, the originally published ROD inadvertently identified WTG AX01 as being subject to micrositing instead of removal. In publishing this errata, BOEM is conforming the specific description of the selected alternative to the final EIS
