

(3) The Power Sector Reform Project (\$50,490,000) is designed to improve sector financial sustainability, reduce the cost of service, and improve regulation by investing in priority sector reforms and capacity-building for key sector actors, including the utilities, regulator, and Ministry of Energy. The project includes embedded support to key sector institutions such as the regulator, the Electricity and Water Regulatory Commission, and the Ministry of Energy (especially its planning functions) to help them

develop the capabilities needed to shepherd sector development over the coming decade. This support is intended to help Sierra Leone implement its Power Sector Reform Roadmap and Action Plan, including achieving improvements on key sector performance indicators targeting improved sector financial sustainability, reduced cost of service while fostering cost recovery for supplied electricity, and improved regulation. Additionally, this project seeks to spur private sector financed generation through project

preparation support, transaction advisory services, and de-risking mechanisms.
