Type of Review: Revision of a currently approved collection.

Abstract: The VA Survey of Veteran Enrollees' Health and Use of Health Care gathers information from Veterans enrolled in the VA Health Care System about factors that influence their health care utilization choices. The original authority for this information collection is from Public Law 104, Section 262, Veterans' Health Care Eligibility Reform Act of 1996. Data collected are used to gain insights into Veteran preferences and to provide VA and Veterans Health Administration (VHA) management guidance in preparing for future Veteran needs. In addition to factors influencing health care choices, the data collected include enrollees' perceived health status and need for assistance, available insurances, self-reported utilization of VA services versus other health care services, reasons for using VA, barriers to seeking care, ability and comfort level with accessing virtual care, as well as general demographics and family characteristics that may influence utilization but cannot be accessed elsewhere. Based upon historical program data, the survey has been revised to remove some questions and add other questions, and certain questions are asked only in alternating years. Further, the target sample of respondents has been decreased to reduce costs and reduce burden on Veterans, while maintaining the integrity of the data. Information provided through the survey supports critical VA policy decisions.

Affected Public: Individuals or Households.

Estimated Annual Burden: 13,333 hours.

Estimated Average Burden per Respondent: 20 minutes.

Frequency of Response: Once annually.

Estimated Number of Respondents: 40,000.

Authority: 44 U.S.C. 3501 *et seq.*
