SUPPLEMENTARY INFORMATION:

I. Abstract

This information collection supports NASA's efforts to implement the National Aeronautics and Space Act, as amended, 51 U.S.C. 20112(a)(3) to better understand and inform strategies to improve the outcomes in how we "provide for the widest practicable and appropriate dissemination of information concerning its activities and the results thereof." Through this effort, NASA seeks to collect information that will help best understand the current results of its communications to the

American public, and how to apply resources to most efficiently and effectively fulfill that foundational function of NASA. This data collection is part of an effort to have an audience-oriented and data-driven approach to assessing NASA's performance against this mandate in a manner that is objective, standardized, and repeatable.

This information will be used by NASA to measure the American public's knowledge of the agency, its activities, the overall sector and the government's role in it, and how those factors vary across demographics. This type of research is standard in the commercial communications industry. NASA will use the information to adjust its communication strategies and methods, widen dissemination, better reach demographics with low awareness or misinformation, and tailor information to specific appropriate audiences, ensuring more effective and equitable dissemination.
