Federal Energy Regulatory Commission

[Docket No. AC24–146–000]

Florida Power & Light Company; Notice of Filing

Take notice that on September 30, 2024, Florida Power & Light Company (FPL), submitted a petition to the Chief Accountant of the Federal Energy Regulatory Commission (Commission or FERC) seeking an eight year extension of a limited duration waiver of the use of Account 593, Maintenance of Overhead Lines, to permit capitalization of approximately \$304 million of anticipated costs for the transfer of existing conductors and other utility assets to new, storm-hardened distribution poles associated with FPL's Storm Protection Plan, for the period January 1, 2025 to December 31, 2032.

FPL previously obtained a waiver in Docket No. AC18–23–000 to capitalize such costs for a seven-year period from January 1, 2018 through December 31, 2024.

Any person desiring to intervene or to protest this filing must file in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a notice of intervention or motion to intervene, as appropriate. Such notices, motions, or protests must be filed on or before the comment date. Anyone filing a motion to intervene or protest must serve a copy of that document on the Applicant. On or before the comment date, it is not necessary to serve motions to intervene or protests on persons other than the Applicant.

In addition to publishing the full text of this document in the **Federal Register**, the Commission provides all interested persons an opportunity to view and/or print the contents of this document via the internet through the Commission's Home Page (<http://ferc.gov>) using the "eLibrary" link. Enter the docket number excluding the last three digits in the docket number field to access the document.

The Commission strongly encourages electronic filings of comments, protests and interventions in lieu of paper using the "eFiling" link at <http://www.ferc.gov>. In lieu of electronic filing, you may submit a paper copy which must reference the Project docket number.

SUPPLEMENTARY INFORMATION:

Title: FERC–725Y, Mandatory Reliability Standard (Personnel Performance, Training, and Qualifications).

OMB Control No.: 1902–0279.

Type of Request: Three-year extension of the FERC–725Y information collection requirements with no changes to the reporting requirements.

Abstract: The FERC–725Y information collection is intended to help ensure the safe and reliable operation of the interconnected grid through the retention of suitably trained and qualified personnel in positions that can impact the reliable operation of the Bulk-Power System. The Commission uses the FERC–725Y to implement the Congressional mandate of the Energy Policy Act of 2005 to develop mandatory and enforceable Reliability Standards to better ensure the reliability of the nation's Bulk-Power System. FERC–725Y ensures that personnel performing or supporting real-time operations on the Bulk Electric System (BES) are trained using a systematic approach. The Reliability Standard requires entities to maintain records subject to review by the Commission and North American Electric Reliability Corporation (NERC) to ensure compliance with the Reliability Standard.

Reliability Standard PER–003–2 purpose is to ensure that System Operators performing the reliability-related tasks of the Reliability Coordinator, Balancing Authority, and Transmission Operator are certified through the NERC System Operator Certification Program when filling a Realtime operating position responsible for control of the Bulk Electric System. This standard includes three requirements that are listed below:
