

and determined that it had a net long position or net flat position on the settlement day for which the broker-dealer is claiming pre-fail credit, the Commission estimates that a broker-dealer could have to make such determination with respect to approximately 2.44 securities per day.¹¹ The Commission estimates that the total number of times per year that such registered broker-dealers could have to demonstrate on their respective books and records that the broker-dealer has a net long position or net flat position on the settlement day for which the broker-dealer is claiming pre-fail credit is 2,108,424 times per year (3,429 registered broker-dealers checking for compliance once per day on 2.44 equity securities, multiplied by 252 trading days in 2023). The total approximate estimated annual burden hours per year will be 337,348 burden hours (2,108,424 multiplied by 0.16 hours/ demonstration¹²).

The total aggregate annual burden for the collection of information undertaken pursuant to all five provisions is thus 1,506,165 hours per year (337,348 + 156,038 + 338,083 + 337,348 + 337,348).

Written comments are invited on: (a) whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission's estimates of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Consideration will be given to comments and suggestions submitted by December 17, 2024.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information under the PRA unless it displays a currently valid OMB control number.
