SUPPLEMENTARY INFORMATION:

Comments Invited

The FAA invites interested persons to participate in this rulemaking by submitting written comments, data, or views. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy-related aspects of the proposal. The most helpful comments reference a specific portion of the proposal, explain the reason for any recommended change, and include supporting data. To ensure the docket does not contain duplicate comments, commenters should submit only one time if comments are filed electronically, or commenters should send only one copy of written comments if comments are filed in writing.

The FAA will file in the docket all comments it receives, as well as a report summarizing each substantive public contact with FAA personnel concerning this proposed rulemaking. Before acting on this proposal, the FAA will consider all comments it receives on or before the closing date for comments. The FAA will consider comments filed after the comment period has closed if it is possible to do so without incurring expense or delay. The FAA may change

this proposal in light of the comments it receives.

Privacy: In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT posts these comments, without edit, including any personal information the commenter provides, to www.regulations.gov, as described in the system of records notice (DOT/ALL-14 FDMS), which can be reviewed at www.dot.gov/privacy.

Foreign Trade Regulations (FTR): Clarification of Filing Requirements Regarding In-Transit Shipments and Other FTR Provisions

AGENCY: Census Bureau, Department of Commerce.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Bureau of the Census (Census Bureau) proposes to amend its regulations to clarify the requirements governing in-transit shipments from foreign countries through the United States that are subsequently exported to a foreign destination. This rulemaking proposes to clarify who is the U.S. Principal Party in Interest (USPPI) and revise the entry number description when goods are entered into the United States for consumption or warehousing, and then stored in a warehouse or storage facility or admitted into a Foreign Trade Zone (FTZ) before being exported. This rule also proposes to clarify that when a customs broker is the USPPI and they are requested to provide information from the customs entry for the filing of the Electronic Export Information (EEI), that they obtain consent from their client, as required in the customs regulations. Additionally, this proposed rule revises several sections, including definitions, mandatory filing requirements, responsibilities of parties to the export transaction, confidentiality, penalties, and voluntary self-disclosures to ensure clarity, accuracy, and consistency throughout the FTR.

DATES: Written comments must be received on or before December 30, 2024.

ADDRESSES: You may submit comments by any of the following methods:

SUPPLEMENTARY INFORMATION:

Background

The Census Bureau, as delegated to it by the Secretary of Commerce, is responsible for collecting, compiling, and publishing import and export trade statistics for the United States under the provisions of Title 13, United States Code (U.S.C.), Chapter 9, Section 301(a). Under Title 13 U.S.C. 302, the Secretary of Commerce is authorized to promulgate regulations deemed by the Secretary to be necessary or appropriate and in such form or manner as the Secretary determines are necessary or proper to carry out the purposes of and prevent the circumvention of the requirements of Chapter 9 of Title 13. The Secretary also may promulgate regulations covering the confidentiality, publication, and disclosure of information collected under Chapter 9. The Secretary developed the Automated Export System (AES), consistent with Public Law 106–113 and considering the confidentiality requirements of Chapter 9 of Title 13, to collect EEI in concert with the export control and enforcement functions of U.S. Customs and Border Protection and Immigration and Customs Enforcement of the Department of Homeland Security, the Bureau of Industry and Security (BIS) of the Department of Commerce, and the Directorate of Defense Trade Controls of the Department of State. Public Law 107–228 directed the Secretary to publish regulations requiring exporters to file Shippers' Export Declarations, now referenced as EEI, in the AES. As a result, the Census Bureau is responsible for publishing the FTR that set the export reporting requirements for preparing and filing the EEI in the Automated Export System (AES). The

EEI is made up of mandatory, conditional, and optional data elements. The purpose of this rulemaking is to revise the FTR to define the USPPI and revise the description of the entry number when goods enter the United States for consumption or warehousing, and then stored in a warehouse or storage facility or admitted into a FTZ before being exported. The Census Bureau has experienced an increase in the number of inquiries regarding export transactions where a customs broker enters goods into the United States for consumption or warehousing, and then stored in a warehouse or storage facility or admitted into a FTZ before being exported.

In this proposed rule we are expanding the scenarios of the USPPI for goods that enter into the United States for consumption or warehousing, and then stored in a warehouse or storage facility or admitted into a FTZ before being exported. The current FTR 30.3(b)(2)(iv) and (v) allow the customs broker to be the USPPI when the customs broker or a foreign person is listed as the importer of record, respectively. However, this may no longer be practical when goods have been stored in warehouses, storage facilities, or FTZ for an extended period of time after entry. In many cases, additional parties other than the customs broker have knowledge and control of the goods for weeks, months or years and possess the goods in warehouses, storage facilities, or FTZs. Therefore, the Census Bureau is proposing the warehouse, storage facility or FTZ be considered the USPPI in these scenarios based on knowledge and control of the goods destined to be exported. Additionally, when the customs broker is the USPPI, it must obtain consent from its client to share information from the import entry that supports the preparation and filing of the EEI in the AES. The Census Bureau proposes to revise the conditional data element entry number description to require the entry number when foreign origin goods are entered into the United States for consumption or warehousing, and then stored in a warehouse or storage facility or admitted into a FTZ before being exported. The Census Bureau has evaluated the entry number on the EEI, as suggested in a comment from the trade community to the NPRM for the Country of Origin (COO) titled *Foreign Trade Regulations (FTR): New Filing Requirement and Clarifications to Current Requirements* (RIN: 0607–AA59), published December 15, 2021 and has determined that the entry number will provide the Census Bureau
