POLICIES AND PRACTICES FOR STORAGE OF RECORDS:

The SharePoint repository is stored on the DOL Azure Cloud with periodic backup of the data to protect against system failure or loss. Other than backups there are no copies of the data stored outside the DOL Azure Cloud.

POLICIES AND PRACTICES FOR RETRIEVAL OF RECORDS:

Records are retrieved by claimant's name, claim number/ID number, program, and/or date of birth.

POLICIES AND PRACTICES FOR RETENTION AND DISPOSAL OF RECORDS:

The system maintains only PII that is necessary and relevant to accomplish the purpose for which it is being collected. It will be destroyed when 5 years old or when no longer needed for reference based on NARA approved Record Control Schedules DAA-0271-2017-0002-0002.

ADMINISTRATIVE, TECHNICAL, AND PHYSICAL SAFEGUARDS:

DOL uses a role-based access for the system's SharePoint files where only those expressly granted access by the system administrator can see the folder where the information is stored. Users can be granted read only or read/write access and access will be granted only to authorized personnel from the Ombud's Office. DOL works with Microsoft to ensure the security of the cloud environment. Controls include but are not limited to, firewalls, least privilege, role-based access, and two factor authentication. DOL assigns NIST 800-53 control requirements to the system.
