Abstract: Respondents to these forms supply the USGS with domestic production and consumption data for 22 ores, concentrates, and metals, some of which are considered strategic and critical, to assist in determining National Defense Stockpile goals. These data and derived information will be published as chapters in Minerals Yearbooks, monthly Mineral Industry Surveys, annual Mineral Commodity Summaries, and special publications for use by government agencies, Congressional offices, educational institutions, research organizations, financial institutions, consulting firms, industry, academia, and the general public. We will convert to OMB-exempt status the 'Alumina' (USGS Form 9-4055-A) and 'Pig Tin' (USGS Form 9-4090-M) canvasses because of a permanent reduction in the number of potential respondents.

Abstract of Information Available

A total of one object of cultural patrimony has been requested for repatriation. The single Pomo basket is listed in museum records as a "gift type" and was acquired by the Redding Museum and Art Center (predecessor of TBEP) in 1981 as part of a donation from James "Jim" Dotta. Mr. Dotta was a local instructor at Shasta Community College in Redding, CA, an archaeologist, and heavily involved in the RMAC. He was also an avid collector of books, historical objects, artworks, and Indigenous Belongings. A handwritten note in the accession record states the basket was purchased from Mildred's Antiques for \$25.00 in 1959, but no further provenance information is provided and it's not clear in which city, state, or country Mildred's Antiques operated.

Conservation records from April 1992 indicate dermestid damage was discovered on baskets stored near this Pomo basket. Therefore, treatment was conducted on this basket and others. In addition to freezer treatment, the basket was placed in an acid-free box with paradichlorobenzene suspended from the lid. Paradichlorobenzene is a fumigant insecticide used in mothballs and a deodorant in cleaners, sanitizers, and deodorizers. There is no documentation as to when the treatment was complete, but no chemical treatments have been used in Turtle Bay Collections since 2000.

Determinations

Turtle Bay Exploration Park has determined that:

- The one object of cultural patrimony described in this notice have ongoing historical, traditional, or cultural importance central to the Native American group, including any constituent sub-group (such as a band, clan, lineage, ceremonial society, or other subdivision), according to the Native American traditional knowledge

Requests for repatriation may be submitted by any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that the requestor is a lineal descendant or a culturally affiliated Indian Tribe or Native Hawaiian organization.

Repatriation of the cultural item in this notice to a requestor may occur on or after December 12, 2024. If competing requests for repatriation are received, Turtle Bay Exploration Park must determine the most appropriate requestor prior to repatriation. Requests for joint repatriation of the cultural item are considered a single request and not competing requests. Turtle Bay Exploration Park is responsible for sending a copy of this notice to the Indian Tribes and Native Hawaiian organizations identified in this notice and to any other consulting parties.
