

reflect changes to the information collection requirements. Consistent with the past approach of changes to the NPDES Program, EPA reflected the paperwork burden and costs associated with the difference between the 2022 CGP and the 2017 CGP instead of revising the NPDES Program ICR. EPA will consolidate the burden and costs into the NPDES Program ICR (and discontinue this ICR) in a future reissuance of the NPDES Program ICR.

The information collection changes between the 2017 CGP and the 2022 CGP that is captured in the current ICR are associated with the following:

- New notice of intent (NOI) questions;
- New notice of termination (NOT) documentation requirements;
- New dewatering inspection requirements;
- New turbidity benchmark monitoring requirements for sites discharging dewatering water to sensitive waters; and
- Changes to Stormwater Pollution Prevention Plan (SWPPP) requirements, related to new and modified permit requirements.

Form Numbers: Notice of Intent (NPDES Form 3510–9), Notice of Termination (NPDES Form 3510–13), Turbidity Monitoring Reporting Form (NPDES Form 6100–065), Suggested Cationic Treatment Chemicals Form (NPDES Form 6100–066).

Respondents/affected entities: Coverage under the 2022 CGP is available to “operators” of construction activities in areas where EPA is the permitting authority and where the general permit is available for use. A list of eligible areas is included in appendix B of the 2022 CGP. The majority of construction activities will be carried out by builders, local developers, and contractors. Relevant Standard Industrial Classification (SIC) codes include the following: 1531, 1541, 1542, 1611, 1622, 1623, and 1629.

Respondent's obligation to respond: Mandatory under NPDES permits issued pursuant to Clean Water Act, 33 U.S.C. 1342(p) *et seq.*

Estimated number of respondents: EPA estimates that for the duration of the three-year ICR period approximately 10,893 operators will obtain coverage under the 2022 CGP, or 3,631 operators per year.

Frequency of response: Response frequencies in the 2022 CGP vary from once per permit term to quarterly.

Total estimated burden: EPA estimates that the information collection burden of the 2022 CGP is 200,383 hours per year. Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: EPA estimates that the final information collection cost of the 2022 CGP is \$15,610,581 per year.

Changes in the Estimates: The change in estimated burden between the current and renewal ICRs are attributable to the change in the number of respondents from 2,600 to 3,631 operators per year, which is based on the more accurate information EPA now has on the number of permitted operators from the first two years of the 2022 CGP. The change in the number of estimated respondents led to an increase in burden hours of 57,872 hours per year. Additionally, the labor rates used to calculate the estimated costs increased from \$62.77 per hour from the current ICR to \$73.47 per hour for the renewal ICR, which, combined with the increase in number of respondents, is the reason for the increase in total estimated cost of \$5,973,563 per year (*i.e.*, the difference between the estimated total cost of the renewal ICR of \$15,610,581 and the current ICR of \$9,637,018).
