Needs and Uses: DoD's DIB CS

Program enhances and supports DIB CS participants' capabilities to safeguard DoD information that resides on, or transits, DIB unclassified information systems. The operational implementation of this Program requires DoD to collect, share, and manage point of contact (POC) information for Program administration and management purposes. The Government will collect typical business POC information from all DIB CS participants to facilitate communication and share cyber threat information. To implement and execute this Program within their companies, DIB CS participants provide POC information to DoD during the application process to join the Program. This information includes company name and identifiers such as cage code and mailing address, employee names and titles, corporate email addresses, and corporate telephone numbers of company-identified POCs. DIB CS Program POCs include the Chief Executive Officer (CEO), Chief Information Officer (CIO), Chief Information Security Officer (CISO), and Corporate or Facility Security Officer, or their equivalents, as well as those administrative, policy, technical staff, and personnel designated to interact with the Government in executing the DIB CS Program (e.g., typically 3–10 company designated POCs however the upper limit is at the company's discretion). After joining the Program, DIB CS participants provide updated POC information to DoD when personnel changes occur.

The DIB CS Program implements statutory authorities to established programs and activities to protect sensitive DoD information, including when such information resides on or transits information systems operated by
