

Drought Adder Component: A formula-based revenue requirement that includes future purchase power above timing purchases, previous purchase

power drought deficits, and interest on the purchase power drought deficits. The second step revenue requirement is subject to change during the annual

Drought Adder adjustment processes starting in January 2026.

Drought Adder formula:

$$\text{Drought Adder Component} = \frac{\text{Drought Adder Peaking Demand Revenue Requirement}}{\text{Peaking CROD Billing Units}}$$

Annual Drought Adder Adjustment Process

The Drought Adder may be adjusted annually using the above formulas for any costs attributed to drought of less than or equal to the equivalent of 2 mills/kWh to the Power Repayment Study (PRS) composite rate. Any planned incremental upward adjustment to the Drought Adder greater than the equivalent of 2 mills/kWh to the PRS composite rate will require a public process.

The annual review process is initiated in early summer when WAPA reviews the Drought Adder component and provides notice of any estimated change to the Drought Adder component charge under the formula. In October, WAPA will make a final determination of any change to the Drought Adder component charge, either incremental or decremental. If a Drought Adder component change is required, a modified Drought Adder revenue requirement and the associated charges will become effective the following January 1 and will be identified in a Drought Adder modification update. WAPA will inform customers of updates by letter and post updates to WAPA's external website.

Billing Demand

The billing demand will be the greater of (1) the highest 30-minute integrated demand measured during the month up to, but not in excess of, the delivery obligation under the power sales contract, or (2) the contract rate of delivery.

Adjustments

For Billing for Unauthorized Overruns: For each billing period in which there is a contract violation involving an unauthorized overrun of the contractual obligation for peaking demand and/or energy, such overrun shall be billed at 10 times the above rate.

Rate Schedule P-SED-M3

(Supersedes Rate Schedule P-SED-M2)

United States Department of Energy

Western Area Power Administration

Upper Great Plains Region

Pick-Sloan Missouri Basin Program—
Eastern Division

Sale of Surplus Products

(Approved Under Rate Order No.
WAPA-213)

Effective

The first day of the first full billing period beginning on or after January 1, 2025, through December 31, 2029, or until superseded by another rate schedule, whichever occurs earlier.

Applicable

This rate schedule applies to Eastern Division of the Pick-Sloan Missouri Basin Program marketing and is applicable to the sale of the following P-SMBP—ED surplus energy and capacity products: energy, frequency response, regulation, and reserves. If any P-SMBP—ED surplus energy and capacity products are available, UGP can make the product(s) available for sale, providing entities enter into a separate agreement(s) with UGP Marketing Office which will specify the terms of sale(s).

Formula Rate

The charge for each product is determined at the time of the sale based on market rates, plus administrative costs. The customer will be responsible for acquiring transmission services necessary to deliver the product(s), for which a separate charge may be incurred.

Risk Management Under the Toxic Substances Control Act: Certain Per- and Polyfluoroalkyl Substances; Extension of Comment Period

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice; extension of comment period.

SUMMARY: The Environmental Protection Agency (EPA) is extending the comment period for the notice that published in the **Federal Register** on September 30, 2024, seeking public comment on the manufacture of certain per- and polyfluoroalkyl substances (PFAS), including perfluorooctanoic acid (PFOA), perfluorononanoic acid (PFNA), and perfluorodecanoic acid (PFDA), during the fluorination of high-density polyethylene (HDPE) and other plastic containers to inform regulations as appropriate under the Toxic Substances Control Act (TSCA). That notice established a public comment period that is scheduled to end on November 29, 2024. This document extends that comment period for 31 days to December 30, 2024. EPA received a request to extend the comment period from an interested stakeholder who requested additional time to collect information relating to EPA's notice and develop thoughtful responses to the issues raised in EPA's notice. EPA believes it is appropriate to extend the comment period in order to give stakeholders including the requester additional time to identify and gather information related to the issues identified in EPA's notice and to prepare comprehensive comments.

DATES: The comment period for the document published on September 30, 2024, at 89 FR 79581 (FRL-12261-01-OCSPP), is now extended. Comments must be received on or before December 30, 2024.

ADDRESSES: Submit your comments, identified by docket identification (ID)

number EPA–HQ–OPPT–2024–0131, online at <https://www.regulations.gov>. Follow the online instructions for submitting comments. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Additional instructions on commenting and visiting the docket, along with more information about dockets generally, is available at <https://www.epa.gov/dockets>.

FOR FURTHER INFORMATION CONTACT:

For technical information contact: Thomas Groeneveld, Existing Chemicals Risk Management Division, Office of Pollution Prevention and Toxics, Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460–0001; telephone number: (202) 566–1188; email address: groeneveld.thomas@epa.gov.

For general information contact: The TSCA–Hotline, ABVI–Goodwill, 422 South Clinton Ave., Rochester, NY 14620; telephone number: (202) 554–1404; email address: TSCA-Hotline@epa.gov.

SUPPLEMENTARY INFORMATION: EPA is hereby extending the comment period established in the **Federal Register** document of September 30, 2024 (89 FR 79581) (FRL–12261–01–OCSPP), to give stakeholders additional time to review that document, identify and gather relevant information, and prepare comments. EPA is extending the comment period, which was set to end on November 29, 2024, to December 30, 2024.

To submit comments or access the docket, please follow the detailed instructions provided under **ADDRESSES**. If you have questions, consult the technical person listed under **FOR FURTHER INFORMATION CONTACT**.

Authority: 15 U.S.C. 2605.

Dated: November 15, 2024.

Michal Freedhoff,

Assistant Administrator, Office of Chemical Safety and Pollution Prevention.

Notice of Availability of Final Designation of Certain Stormwater Discharges Within Two Watersheds in Los Angeles County, California Under the National Pollutant Discharge Elimination System of the Clean Water Act

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of availability.

SUMMARY: The Regional Administrator of the Environmental Protection Agency (EPA) Region 9 is providing notice of the availability of EPA’s Final Designation of stormwater discharges from certain commercial, industrial and institutional (CII) sites in the Alamitos Bay/Los Cerritos Channel Watershed and the Dominguez Channel and Los Angeles/Long Beach Inner Harbor Watershed in Los Angeles County, California for National Pollutant Discharge Elimination System (NPDES) permitting under the Clean Water Act (CWA).

DATES: EPA’s *Final Designation of Stormwater Discharges from Certain Commercial, Industrial and Institutional Sites in the Alamitos Bay/Los Cerritos Channel Watershed and the Dominguez Channel and Los Angeles/Long Beach Inner Harbor Watershed in Los Angeles County* (“EPA’s Final Designation”) was signed on November 5, 2024.

FOR FURTHER INFORMATION CONTACT: Eugene Bromley, EPA Region 9, Water Division, NPDES Permits Section (WTR–2–3), 75 Hawthorne Street, San Francisco, CA 94105; telephone (415) 972–3510; email: bromley.eugene@epa.gov, or R9RDA@epa.gov.

SUPPLEMENTARY INFORMATION:

A. Does this action apply to me?

Entities potentially regulated by this action include a wide variety of privately-owned CII facilities such as shopping centers, office complexes, warehouses, private schools and hospitals, and various manufacturing facilities. Entities affected by this action are located within either of two watersheds in Los Angeles County, in California: the Los Cerritos Channel/Alamitos Bay Watershed or the Dominguez Channel and Los Angeles/Long Beach Inner Harbor Watershed. This description of affected entities is not intended to be exhaustive, but rather provides a guide for readers regarding entities likely to be affected by this action. This description of affected

activities includes the types of entities that EPA is now aware could potentially be affected by this action. Other types of entities not included could also be affected. To determine whether your entity is affected by this action, you should also review the description of EPA’s action in documents online at the website listed in the section C below. If you have questions regarding the applicability of this action to a particular entity, consult the person listed in the **FOR FURTHER INFORMATION CONTACT** section.

B. Summary of Final Designation

In the Final Designation, EPA has determined that stormwater discharges from certain CII sites in the Los Cerritos Channel/Alamitos Bay and Dominguez Channel and Los Angeles/Long Beach Inner Harbor Watersheds in Los Angeles County are contributing to violations of water quality standards and require NPDES permit coverage under the CWA. The Final Designation differs from the Revised Preliminary Designation of November 2, 2023 (88 FR 75282) in that EPA is not designating privately-operated facilities at the Ports of Long Beach and Los Angeles at this time. EPA is taking a phased approach to this Final Designation such that EPA may consider designating stormwater discharges from additional CII sources in the future.

This Final Designation is in response to two September 15, 2015 petitions entitled “Petition For A Determination That Stormwater Discharges From Commercial, Industrial, And Institutional Sites Contribute To Water Quality Standards Violations in Dominguez Channel and the Los Angeles/Long Beach Inner Harbor (Los Angeles County, California) and Require Clean Water Act Permits,” and “Petition For A Determination That Stormwater Discharges From Commercial, Industrial, And Institutional Sites Contribute To Water Quality Standards Violations in the Alamitos Bay/Los Cerritos Watershed (Los Angeles County, California) And Require Clean Water Act Permits” as well as an order from the U.S. District Court for the Central District of California in *Los Angeles Waterkeeper v. Pruitt*, 320 F. Supp.3d 1115 (C.D. CA 2018).

EPA’s Final Designation is made pursuant to CWA sections 402(p)(2)(E) and (6) and EPA’s implementing regulations at 40 CFR 122.26(a)(1)(v) and 40 CFR 122.26(a)(9)(i)(D) that authorize EPA to designate stormwater discharges for regulation under the NPDES permitting program that are contributing to violations of water quality standards but are not otherwise
