SUPPLEMENTARY INFORMATION:

I. Background

The Department of Labor, as part of the continuing effort to reduce paperwork and respondent (*i.e.*, employer) burden, conducts a preclearance consultation program to provide the public with an opportunity to comment on proposed and continuing information collection requirements in accordance with the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3506(c)(2)(A)). This program ensures that information is in the desired format, reporting burden (time and costs) is minimal, the collection instruments are clearly understood, and OSHA's estimate of the information collection burden is accurate. The Occupational Safety and Health Act of 1970 (OSH Act) (29 U.S.C. 651 *et seq.*) authorizes information collection by employers as necessary or appropriate for enforcement of the OSH Act or for developing information regarding the causes and prevention of occupational injuries, illnesses, and accidents (29 U.S.C. 657). The OSH Act also requires that OSHA obtain such information with minimum burden upon employers, especially those operating small businesses, and to reduce to the maximum extent feasible unnecessary duplication of effort in obtaining information (29 U.S.C. 657).

The following sections describe who uses the information collected under each requirement, as well as how they use it. The purpose of these requirements is to reduce employees' risk of death and serious injury by ensuring that employment has been tested and is in safe operating condition.

Two construction standards, "Medical Services and First Aid" (section 1926.50), and "General Requirements for Storage" (section 1926.250), contain posting provisions. Paragraph (f) of section 1926.50 requires employers to conspicuously post emergency telephone numbers for physicians, hospitals, or ambulances at their worksites if 911 emergency telephone service is not locally available; in the event that a worker has a serious injury at a worksite, this posting requirement helps expedite emergency medical treatment of the worker. Paragraph (a)(2) of section 1926.250 specifies that employers must post the maximum safe load limits of floors located in storage areas inside buildings or other structures under construction, unless

the floors or slabs are on grade (sitting on the ground). This provision prohibits employers from overloading floors in areas used to store material and equipment where a structure's floors are not supported directly by the ground. This requirement is intended to prevent floor collapses which could seriously injure or kill workers.

II. Special Issues for Comment

OSHA has a particular interest in comments on the following issues:

- Whether the proposed information collection requirements are necessary for the proper performance of the agency's functions to protect workers, including whether the information is useful;
- The accuracy of OSHA's estimate of the burden (time and costs) of the information collection requirements, including the validity of the methodology and assumptions used;
- The quality, utility, and clarity of the information collected; and
- Ways to minimize the burden on employers who must comply; for example, by using automated or other technological information, and transmission techniques.

III. Proposed Actions

OSHA is requesting that OMB extend the approval of the information collection requirements contained in the Construction Standards on Posting Emergency Telephone Numbers and Maximum Safe Floor Load Limits. The agency is requesting an adjustment increase in burden from 55,184 to 65,283 hours, a difference of 10,099 hours. This increase is due to an increase in the number of construction sites, going from 885,922 to 937,602.

OSHA will summarize the comments submitted in response to this notice and will include this summary in the request to OMB to extend the approval of the information collection requirements.

Type of Review: Extension of a currently approved collection.

Title: Construction Standards on Posting Emergency Telephone Numbers and Maximum Safe Floor Load Limits.

OMB Control Number: 1218-0093.

Affected Public: Business or other for-profits.

Number of Respondents: 937,602.

Number of Responses: 181,198.

Frequency of Responses: On occasion.

Average Time per Response: Varies.

Estimated Total Burden Hours: 65,283.

Estimated Cost (Operation and Maintenance): \$0.

IV. Public Participation—Submission of Comments on This Notice and Internet Access to Comments and Submissions

You may submit comments in response to this document as follows: (1) electronically at <https://www.regulations.gov>, which is the Federal eRulemaking Portal; or (2) by facsimile (fax), if your comments, including attachments, are not longer than 10 pages you may fax them to the OSHA Docket Office at (202) 693-1648. All comments, attachments, and other material must identify the agency name and the OSHA docket number for the ICR (Docket No. OSHA-2011-0032). You may supplement electronic submission by uploading document files electronically.

Comments and submissions are posted without change at <https://www.regulations.gov>. Therefore, OSHA cautions commenters about submitting personal information such as social security numbers and dates of birth.
