SUPPLEMENTARY INFORMATION:

I. Obtaining a Copy of the Proposed Stipulated Settlement Agreement

The official public docket for this action contains a copy of the proposed settlement agreement. The official public docket is available for public viewing at the Office of Environmental Information (OEI) Docket in the EPA Docket Center, EPA West, Room 3334, 1301 Constitution Ave. NW, Washington, DC. The EPA Docket Center Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Public Reading Room is (202) 566-1744, and the telephone number for the OEI Docket is (202) 566-1752.

The electronic version of the public docket for this action also contains a copy of the proposed settlement agreement. The electronic version of the public docket is available at <https://www.regulations.gov/docket/EPA-HQ-OGC-2024-0251>.

II. Background on the Proposed Settlement Agreement

This proposed settlement agreement follows petitions for review in the United States Court of Appeals for the District of Columbia (D.C. Circuit) of EPA's decisions granting pesticide registrations and amendments to those registrations under the Federal Insecticide, Rodenticide, and Fungicide Act (FIFRA) for products containing the active ingredient cyantraniliprole.

On June 30, 2017, the D.C. Circuit addressed the initial petition for review and remanded the registration decisions to EPA without vacatur for EPA to address its obligations under the Endangered Species Act (ESA). *Center for Biological Diversity v. Environmental Protection Agency*, 861 F.3d 174 (D.C. Cir. 2017). In 2021, Petitioners filed a writ of mandamus with the D.C. Circuit, seeking to compel action by EPA in accordance with the Court's 2017 order. On November 22, 2022, the D.C. Circuit held that EPA had unreasonably delayed in complying with its 2017 order and ordered EPA to complete effects determinations for cyantraniliprole and replace its previous registration orders with orders consistent with the ESA by September 2023. *In re Center for Biological Diversity*, 53 F.4th 665 (D.C. Cir. 2022).

In September 2023, EPA completed its final biological evaluation for cyantraniliprole and initiated ESA section 7 consultation with the U.S. Fish and Wildlife Service and the National Marine Fisheries Service, before granting registrants' requests to amend the registrations for products containing cyantraniliprole. See EPA-HQ-OPP-2011-0668. EPA filed a Notice of Completion with the D.C. Circuit in *In re Center for Biological Diversity* on October 4, 2023. Petitioners filed a new petition for review challenging EPA's September 2023 registration amendments. *Center for Biological Diversity v. Environmental Protection Agency*, No. 23-1329 (D.C. Circuit).

This proposed settlement agreement would resolve any remaining claims against EPA in these cases. In the proposed settlement, EPA would agree to implement any final Biological Opinion for cyantraniliprole no later than 12 months from the date that each Service issues a final Biological Opinion or the deadline set by each Service for implementing its final Biological Opinion—whichever is earlier—with several options for extension, if appropriate.

III. Public Comment on the Proposed Settlement Agreement

EPA will accept written comments on the proposed settlement until January 2, 2025 from anyone who is not a named party to the litigation in question. EPA or the U.S. Department of Justice (DOJ) may decide to withdraw consent to enter the proposed settlement agreement if the comments indicate that such consent is inappropriate. However, the terms of the proposed settlement agreement will be affirmed unless EPA or DOJ so decide based on the comments.
