

*Title:* Recreational Angler Survey of Sea Turtle Interactions.

*OMB Control Number:* 0648–0774.

*Form Number(s):* None.

*Type of Request:* Regular Submission [Revision and Extension of a current information collection].

*Number of Respondents:* 6,667.

*Average Hours per Response:* 10 minutes for the Fishing Site Characterization Form, 5 minutes for the Survey Cover Sheet, 10 minutes for the Angler Intercept Survey.

*Total Annual Burden Hours:* 1,111 hours.

*Needs and Uses:* NOAA's National Marine Fisheries Service (NOAA Fisheries) proposes to revise and extend a current information collection designed to assess the extent of hook and line interactions between recreational anglers on piers and other shore-based fishing locations and sea turtles. The collection comprises an Angler Intercept Survey, a Fishing Site Characterization Form, and a Survey Cover Sheet. The Angler Intercept Survey will be verbally administered on piers and shore-based fishing locations within NOAA Fisheries Greater Atlantic Region and Southeast Region, and will be administered over three years' time to approximately 20,000 individual recreational anglers (6,667 per year). The respondents will be verbally asked a series of questions about their fishing practices and observations of sea turtles and the interviewer will record their answers. The survey will also assess the feasibility of an intercept survey for this purpose in terms of response rates and data collection. The Fishing Site Characterization Form will be completed by the survey administrator at each fishing location who will also collect information on the structure and operation of the pier or shore-based fishing location. The survey administrator will complete the Site Characterization Sheet during each survey period and collect information on the environmental conditions for that particular day, the number of anglers fishing, number of lines in the water, and the number of surveys completed. The collection previously included a Sea Turtle Incidental Capture Form. This form will be removed from this collection and is now included in the National Sea Turtle Stranding & Salvage Network Stranding & Gear Interaction Data Collection (0648–0496).

Collection of data on sea turtle interactions in the shore-based recreational fishing sector is necessary to fulfill statutory requirements of the Endangered Species Act (16 U.S.C. 1531 *et. seq.*). This collection will allow NOAA Fisheries obtain specific

information about recreational piers (defined here to include piers and other shore-based structures), the anglers that fish on piers, the nature of interactions between pier-based anglers and sea turtles, as well as to determine specific factors that may influence the rate of interactions. NOAA Fisheries can use the information collected to evaluate the impact of these interactions on sea turtle populations and determine conservation measures that can be implemented to reduce interactions and support the conservation and recovery of endangered and threatened sea turtle populations.

*Affected Public:* Individuals or households.

*Frequency:* Once.

*Respondent's Obligation:* Voluntary.

*Legal Authority:* Collection of these data on sea turtle interactions in the shore-based recreational fishing sector is necessary to fulfill statutory requirements of the Endangered Species Act (16 U.S.C. 1531 *et. seq.*).

This information collection request may be viewed at [www.reginfo.gov](http://www.reginfo.gov). Follow the instructions to view the Department of Commerce collections currently under review by OMB.

Written comments and recommendations for the proposed information collection should be submitted within 30 days of the publication of this notice on the following website [www.reginfo.gov/public/do/PRAMain](http://www.reginfo.gov/public/do/PRAMain). Find this particular information collection by selecting "Currently under 30-day Review—Open for Public Comments" or by using the search function and entering either the title of the collection or the OMB Control Number 0648–0774.

## DEPARTMENT OF DEFENSE

### Department of the Army

#### Surplus Property; Notice of Additional Property at the Former Pueblo Chemical Depot

**AGENCY:** Department of the Army, DoD.

**ACTION:** Notice.

**SUMMARY:** This Notice amends the Notice published in the **Federal Register** on December 20, 2013 and provides information regarding the property that has been determined surplus to the United States needs

pursuant to section 2854 (Closure and Disposal of the Pueblo Chemical Depot, Pueblo County, Colorado) of the National Defense Authorization Act for Fiscal Year 2024 (NDAA FY24) and in accordance with procedures and authorities for the closure, management, and disposal of property under the appropriate base closure laws, and following screening with Federal agencies and Department of Defense components.

**DATES:** Applicable November 22, 2024, by adding the following surplus property.

**FOR FURTHER INFORMATION CONTACT:** Headquarters, Department of the Army, Deputy Chief of Staff, G–9, Installation Services Directorate, Environmental Division, BRAC Office, Attn: DAIN–ISE BRAC Program Manager James Foster, 600 Army Pentagon, Washington, DC 20310–0600, (703) 545–2541. For information regarding the property listed below by contacting the Army BRAC Office at the mailing address above or at [James.c.foster10.civ@army.mil](mailto:James.c.foster10.civ@army.mil).

**SUPPLEMENTARY INFORMATION:** Under the provisions of the Public Buildings, Property, and Works Act of 2002, as amended, the Defense Base Closure and Realignment Act of 1990, as amended, and other public benefit conveyance authorities, this surplus property may be available for conveyance to State and local governments and other eligible entities for public benefit purposes. Notices of interest from other interested parties located in the vicinity of any listed surplus property should be submitted to the recognized Local Redevelopment Authority (LRA). This notice amends the notice published December 20, 2013 (78 FR 245).

BILLING CODE 3711-CC-P

## DEPARTMENT OF ENERGY

### Federal Energy Regulatory Commission

[Docket No. CP25-5-000]

#### **Columbia Gas Transmission, LLC; Notice of Scoping Period Requesting Comments on Environmental Issues for the Proposed Line 4010 Abandonment Project, and Notice of Public Scoping Session**

The staff of the Federal Energy Regulatory Commission (FERC or Commission) will prepare an environmental document, that will discuss the environmental impacts of the Line 4010 Abandonment Project involving abandonment of facilities by Columbia Gas Transmission, LLC (Columbia) in Jefferson and Clarion Counties, Pennsylvania. The Commission will use this environmental document in its decision-making process to determine whether the project is in the public convenience and necessity.

This notice announces the opening of the scoping process the Commission will use to gather input from the public and interested agencies regarding the project. As part of the National Environmental Policy Act (NEPA) review process, the Commission takes into account concerns the public may have about proposals and the environmental impacts that could result from its action whenever it considers the issuance of an authorization. This gathering of public input is referred to as “scoping.” The main goal of the scoping process is to focus the analysis in the environmental document on the important environmental issues. Additional information about the

Commission’s NEPA process is described below in the NEPA Process and Environmental Document section of this notice.

By this notice, the Commission requests public comments on the scope of issues to address in the environmental document. To ensure that your comments are timely and properly recorded, please submit your comments so that the Commission receives them in Washington, DC on or before 5:00 p.m. Eastern Time on December 19, 2024. Comments may be submitted in written form. Further details on how to submit comments are provided in the Public Participation section of this notice.

Your comments should focus on the potential environmental effects, reasonable alternatives, and measures to avoid or lessen environmental impacts. Your input will help the Commission staff determine what issues they need to evaluate in the environmental document. Commission staff will consider all written comments during the preparation of the environmental document.

If you submitted comments on this project to the Commission before the opening of this docket on October 24, 2024, you would need to file those comments in Docket No. CP25-5-000 to ensure they are considered as part of this proceeding.

This notice is being sent to the Commission’s current environmental mailing list for this project. State and local government representatives should notify their constituents of this proposed project and encourage them to comment on their areas of concern.

If you are a landowner receiving this notice, a pipeline company representative may contact you about the acquisition of an easement to construct, operate, and maintain the proposed facilities. The company would seek to negotiate a mutually acceptable easement agreement. You are not required to enter into an agreement. However, if the Commission approves the project, the Natural Gas Act conveys the right of eminent domain to the company. Therefore, if you and the company do not reach an easement agreement, the pipeline company could initiate condemnation proceedings in court. In such instances, compensation would be determined by a judge in accordance with State law. The Commission does not subsequently grant, exercise, or oversee the exercise of that eminent domain authority. The

courts have exclusive authority to handle eminent domain cases; the Commission has no jurisdiction over these matters.

Columbia provided landowners with a fact sheet prepared by the FERC entitled “An Interstate Natural Gas Facility On My Land? What Do I Need To Know?” which addresses typically asked questions, including the use of eminent domain and how to participate in the Commission’s proceedings. This fact sheet along with other landowner topics of interest are available for viewing on the FERC website ([www.ferc.gov](http://www.ferc.gov)) under the Natural Gas, Landowner Topics link.

#### **Public Participation**

There are three methods you can use to submit your comments to the Commission. Please carefully follow these instructions so that your comments are properly recorded. The Commission encourages electronic filing of comments and has staff available to assist you at (866) 208-3676 or [FercOnlineSupport@ferc.gov](mailto:FercOnlineSupport@ferc.gov).

(1) You can file your comments electronically using the eComment feature, which is located on the Commission’s website ([www.ferc.gov](http://www.ferc.gov)) under the link to FERC Online. Using eComment is an easy method for submitting brief, text-only comments on a project;

(2) You can file your comments electronically by using the eFiling feature, which is located on the Commission’s website ([www.ferc.gov](http://www.ferc.gov)) under the link to FERC Online. With eFiling, you can provide comments in a variety of formats by attaching them as a file with your submission. New eFiling users must first create an account by clicking on “eRegister.” You will be asked to select the type of filing you are making; a comment on a particular project is considered a “Comment on a Filing”; or

(3) You can file a paper copy of your comments by mailing them to the Commission. Be sure to reference the project docket number (CP25-5-000) on your letter. Submissions sent via the U.S. Postal Service must be addressed to: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Room 1A, Washington, DC 20426. Submissions sent via any other carrier must be addressed to: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, Maryland 20852.
