II. Discussion

The NRC is issuing for public comment draft Supplement 15, Second Renewal, to the GEIS for License Renewal of Nuclear Plants, NUREG-1437, regarding the subsequent renewal of Renewed Facility Operating License No. NPF-12 for an additional 20 years for V.C. Summer. Draft Supplement 15, Second Renewal, to the GEIS includes the NRC staff's evaluation of the environmental impacts of the proposed action and alternatives to the proposed action.

The NRC staff's preliminary recommendation is that the adverse environmental impacts of subsequent license renewal for V.C. Summer are not so great that preserving the option of subsequent license renewal for energy-planning decision-makers would be unreasonable.

Acting Deputy Director, Division of Rulemaking, Environmental, and Financial Support, Office of Nuclear Material Safety and Safeguards.

Required reports are submitted and evaluated as events occur.

6. *Who will be required or asked to respond:* Nuclear power reactor licensees licensed under parts 50 or 52 of title 10 of the *Code of Federal Regulations* (10 CFR), who possess, use, import, export, transport, or deliver to a carrier for transport, special nuclear material; actively decommissioning reactor licensees; Category I, Category II and Category III fuel facilities; nonpower reactors (research and test reactors); and other entities who mark and handle Safeguards Information.

security plan, a training and qualification plan, a safeguards contingency plan, a cyber security plan, and security implementing procedures; notifications to the NRC regarding safeguards and cyber security events; notifications to State governors and Tribes regarding shipments of irradiated reactor fuel; and requirements for conducting criminal history records checks of individuals granted unescorted access to a nuclear power facility, a non-power reactor, or access to Safeguards Information. The objective is to ensure that activities involving SNM are consistent with interests of common defense and security and that these activities do not constitute an unreasonable risk to public health and safety. The information in the reports and records submitted by licensees is used by the NRC staff to ensure that the health and safety of the public and the environment are protected, and licensee possession and use of SNM is in compliance with license and regulatory requirements.
