Total Annual Burden: 141,414 hours. Total Annual Cost: No Cost.

Needs and Uses: Part 11 contains rules and regulations addressing the nation's Emergency Alert System (EAS). The EAS provides the President with the capability to provide immediate communications and information to the general public during periods of national emergency over broadcast television and radio, cable, direct broadcast radio and other EAS Participants, as defined in section 11.11(a) of the Commission's rules The EAS also provides State and local governments and the National Weather Service with the capability to provide immediate communications and information to the public concerning emergency situations posing a threat to life and property. Part 11 includes testing requirements to ensure proper and efficient operation of the EAS. State and local use of the EAS, alert processing requirements, and monitoring assignments covering the distribution of EAS alerts within the State, among other things, are required to be described in State EAS Plans that are administered by State Emergency Communications Committees (SECC) and submitted to the FCC annually for approval.

The Order, PS Docket Nos. 15–91 and 15-94, FCC 21-77, pursuant to the directions set forth in Section 9201 of the William M. (Mac) Thornberry National Defense Authorization Act for Fiscal Year 2021, Public Law 116-283, 134 Stat. 3388, sec. 9201 (NDAA21), among other things, (i) requires the Public Safety and Homeland Security Bureau (Bureau) to establish a State EAS Plan Content Checklist composed of the content set forth in section 11.21 of the Commission's rules, (47 CFR 11.21), post the checklist on the FCC's website, and incorporate it as an appendix in ARS user manual; (ii) amend the State EAS Plan requirements in section 11.21

of the Commission's rules to ensure plans are updated annually, require a certification by the SECC Chairperson or Vice-Chairperson that the SECC met (in person, via teleconference, or via other methods of conducting virtual meetings) at least once in the twelve months prior to submitting the annual updated plan, and require that the Bureau approve or reject State EAS Plans submitted for approval within 60 days of receipt; and (iii) require the Bureau to list the approval dates of State EAS Plans submitted on ARS on the Commission's website, and in the event a final decision is made to deny a plan, directly notify the chief executive of the State to which the plan applies of that determination and the reasons for such denial within 30 days of such decision. The Order also amends section 11.45 of the Part 11 rules to enable voluntary reporting to the Commission by the FEMA Administrator and Tribal, State, local or territorial governments of false

The Commission seeks OMB approval of these rule amendments as an extension of a previously approved information collection. Congress has determined that EAS rule changes are necessary to increase oversight over the distribution of State and local EAS alerts within States, and increase false alert reporting capabilities to help ameliorate confusion or other harmful effects that might result from false EAS alerts. The internal State EAS Plan processing requirements and rule changes adopted in the Order will improve State EAS Plan processing and administration, improving the capabilities and efficacy of EAS as a national system for distributing vital alert information to all Americans, and will do so in a cost-effective manner.

The following information collections contained in Part 11 may be impacted by the rule amendments described herein.

#### State EAS Plans (47 CFR 11.21)

The establishment of a State EAS Plan Content Checklist for SECCs should have no impact or lessen SECC burdens, and posting it on the FCC's website, and incorporating it as an appendix in the ARS user manual, are routine Bureau activities. The requirement to ensure State EAS Plans are updated annually already was contained in section 11.21, and thus does not represent a new burden.

The amendment to include as a required element in the State EAS Plan, a certification (which will be incorporated into the ARS) by the SECC Chairperson or Vice-Chairperson that the SECC met (in person, via

teleconference, or via other methods of conducting virtual meetings) at least once in the twelve months prior to submitting the annual updated plan to review and update their State EAS Plan should promote added diligence in SECC administration of State EAS Plans. The Commission estimates the burden to SECC members in complying with this requirement to be two hours per member.

The rule amendment requiring the Bureau approve or reject State EAS Plans submitted for approval within 60 days of receipt does not impose new burdens on any entity. The Bureau already is charged with reviewing State EAS Plans. The internal requirement that the Bureau list the approval dates of State EAS Plans submitted on ARS on the Commission's website, and in the event a final decision is made to deny a plan, directly notify the chief executive of the State to which the plan applies of that determination and the reasons for such denial within 30 days, does not impose new burdens on any entity. The Bureau already maintains a web page on the Commission's website dedicated to SECC and State EAS Plan information.

## False EAS Alert Reporting (47 CFR 11.45)

The amendment enabling the FEMA Administrator and Tribal, State, local or territorial governments to file reports of false EAS alerts provides another mechanism for the Commission to receive information concerning false EAS alerts, does not impose burdens on any entity. Should any permitted government entity voluntarily elect to file a false EAS alert report, the burden associated with this provision amounts to composing an email, which the Commission estimates will take an hour or less to prepare, and falls within the routine activities of government employees. False alert reports help the Commission to identify, investigate, correct and prevent false EAS activations, which enhances the EAS's efficacy and the public trust in the EAS.
