

solution to leverage their existing Exchange connectivity to route Directed Orders to either an ATS or algorithm, thereby affording them increased access to execution tools and enhanced operational efficiency.¹⁶ The Exchange states that the proposed change would offer member organizations greater choice and flexibility, and further believes that the proposed change could create efficiencies for member organizations by enabling them to send orders that they wish to route to an alternate destination through the Exchange, thereby leveraging order entry protocols and specifications already configured for their interactions with the Exchange.¹⁷ The Exchange states that Directed Orders designated to route to an algorithm would generally operate in the same manner as Directed Orders that are currently eligible to be routed to an ATS selected by the member organization entering the order (except as proposed above). The Exchange further states that the Directed Order would continue to provide functionality similar to order types with specific execution instructions (such as the Auction Only Order defined in NYSE Rule 7.31(c)) or routing instructions (such as Primary Only Orders that route to the primary market that are available on the Exchange's affiliated equities exchanges).¹⁸

III. Discussion and Commission Findings

After careful review, the Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange.¹⁹ In particular, the Commission finds that the proposed rule change is consistent with Section 6(b)(5) of the Act,²⁰ which requires, among other things, that the rules of a national securities exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the

mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest.

The Commission finds that the proposed rule change is reasonably designed to remove impediments to and perfect the mechanism of a free and open market and a national market system because it is reasonably designed to offer member organizations greater choice and flexibility in executing orders by providing routing to broker-dealer algorithms that have established connectivity with the Exchange and to ensure that such connectivity is provided to broker-dealer algorithms on a fair and equitable basis. The Commission also believes that the proposed rule change would not permit unfair discrimination among customers, brokers, or dealers because Directed Orders will be available to all Exchange members on an equal basis and because the Exchange has represented that it would not direct orders to any algorithm with which the Exchange has a financial relationship.

Based on the foregoing, the Commission finds that the proposed rule change is consistent with the Act.

IV. Conclusion

It is therefore ordered, pursuant to Section 19(b)(2) of the Act,²¹ that the proposed rule change (SR-NYSE-2024-67) be, and hereby is, approved.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.²²

Sherry R. Haywood,

Assistant Secretary.
