

October 22, 1998). The non-notification process means that a product label may be updated with Spanish translations without notifying EPA (or EPA reviewing the label), if that is the only change being made to the label. Non-notification label changes are not systematically tracked by EPA.

However, given the new bilingual labeling requirements in PRIA 5, EPA has developed a plan for tracking the adoption of the bilingual labeling. The draft PR Notice provides guidance on how the Agency plans to track the adoption of bilingual labeling. Since Spanish is the primary language for most American farmworkers, this effort advances environmental justice by making health and safety information on pesticide labels more accessible, fostering a better understanding and compliance with label instructions.

IV. Do PR Notices contain binding requirements?

The draft PR Notice discussed in this document is intended to provide guidance to EPA personnel and decision makers and to pesticide registrants. While the requirements in the statutes and Agency regulations are binding on EPA and the applicants, the PR Notice is not binding on either EPA or pesticide registrants, and EPA may depart from the guidance where circumstances warrant and without prior notice. Likewise, pesticide registrants may assert that the guidance is not appropriate generally or not applicable to a specific pesticide or situation.

V. Are these forms approved under the Paperwork Reduction Act (PRA)?

According to the PRA, 44 U.S.C. 3501 *et seq.*, an agency may not conduct or sponsor, and a person is not required to respond to a collection of information that requires approval under the PRA, unless it has been approved by the Office of Management and Budget (OMB) and displays a currently valid OMB control number. The information collection activities described in this draft PR Notice are being addressed in the new Information Collection Requests (ICR) entitled “Pesticide Product, Spanish Labeling Tracking,” identified as EPA ICR No. 7795.01, that will be made available for public review and comment in a forthcoming edition of the **Federal Register**. EPA intends to consider public comments on that ICR, along with comments on the draft PR Notice, before submitting a revised ICR to OMB for review and approval under the PRA, and issuing a final PR Notice.

Abstract: This ICR covers the paperwork burden hours and costs associated with the information collection activities under the pesticide registration fee program. Pesticide registrants are required by statute to pay an annual registration maintenance fee for all products registered under sections 3 and 24(c) of the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA). In addition, the Pesticide Registration Improvement Act (PRIA) amended FIFRA in 2004 to create a registration service fee system for applications for specific pesticide registration, amended registration, and associated tolerance actions as per FIFRA section 33. This ICR specifically covers the activities related to the collection of the annual registration maintenance fees, the registration service fees, and the burden associated with the submission of requests for fees to be waived.

Form number(s): 8570–30.

Respondents/affected entities: Entities potentially affected are those that are pesticide importers which includes entities identified in the North

American Industrial Classification System (NAICS) codes identified in question 12 of the ICR.

Respondent's obligation to respond: Mandatory, per FIFRA sections 4(i)(5) and 33.

Estimated number of potential respondents: 2,252.

Frequency of response: Annually and on occasion.

Total estimated burden: 9,058 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated costs: \$822,010 (per year), includes \$0 annualized capital investment or maintenance and operational costs.

Changes in the estimates: There is an increase in the number of respondents by 369 and a corresponding increase of 518 hours in the total estimated respondent burden compared with that identified in the ICR currently approved by OMB. There is also an increase in costs for the regulated community by \$138,709. The increase in costs are based on updated BLS wage rates. These changes are adjustments.

Abstract: This supporting statement is for a revision to an existing Information Collection Request (ICR) for four mobile source related grant programs administered by the Transportation and Climate Division (TCD), within Environmental Protection Agency's (EPA) Office of Transportation and Air Quality (OTAQ). These four programs include: Diesel Emission Reduction Act (DERA) Grant Program, Clean School Bus (CSB) Grant Program, Clean Heavy-Duty Vehicles (CHDV) Grant Program, and Clean Ports Grant Program.

The EPA currently uses ICR No. 2060-0754 to collect information for most major elements of grants administration for these programs, but to reflect the final program design and to further ease the burden for applicants, awardees, and Agency staff, the Agency needs to update this ICR to be able to use improved versions of previously approved instruments and collect information via 3 new reporting instruments to reflect final program design. This ICR revision aims to enhance project reporting instruments to ensure that the project reporting templates align with the final program design and requirements and incorporate user feedback received during the application period for the CHDV and Clean Ports Grant Programs.

TCD uses approved procedures and forms to collect necessary information to operate its grant programs and has been providing grants under DERA since 2008. EPA launched the 2024 Clean Port Program in late winter 2024, the 2024 Clean Heavy-Duty Vehicles Program in early spring 2024, and the 2024 DERA grant program in summer 2024, and is overseeing the 2023 Clean School Bus Grantees, who began reporting in mid-2024.

While these programs each have unique statutory requirements, there are key aspects that unite them as mobile source emissions reduction efforts, and by combining them as a cohort of programs under one ICR, EPA aims to enrich data quality across our programs and to ease burden on applicants and
