

LR GEIS for all those issues applicable to Peach Bottom. For issues classified as Category 2 (specific to individual nuclear power plants) in the 2013 LR GEIS, the NRC staff evaluated those issues applicable to Peach Bottom in the final SEIS.

On February 24, 2022, the Commission issued three memoranda and orders, Commission Legal Issuance (CLI)–22–02 (ADAMS Accession No. ML22055A496), CLI–22–03 (ADAMS Accession No. ML22055A527), and CLI–22–04 (ADAMS Accession No. ML22055A557), that addressed the NRC staff's environmental reviews in SLR proceedings for five nuclear power plants, including Peach Bottom. The Commission concluded that the 2013 LR GEIS, on which the NRC staff had relied, in part, for its environmental reviews of the SLR applications for the affected nuclear power plants, did not consider SLR. Therefore, the Commission determined that these environmental reviews were inadequate. Accordingly, the Commission directed the NRC staff to leave the Peach Bottom subsequent renewed facility operating licenses in place but to modify their expiration dates to reflect the end dates of the previous renewed facility operating licenses (*i.e.*, August 8, 2033, for Peach Bottom, Unit 2 and July 2, 2034, for Peach Bottom, Unit 3), which the staff did on March 25, 2022 (ADAMS Accession No. ML22073A207). The Commission affirmed this direction in CLI–22–07 (ADAMS Accession No. ML22154A217).

In CLI–22–03, the Commission directed the NRC staff to update the 2013 LR GEIS so that it covers nuclear power plant operation during the SLR period. The Commission stated that it believed the most efficient way to proceed would be for the NRC staff to update the 2013 LR GEIS and then take appropriate action with respect to pending SLR applications to ensure that the environmental impacts for the period of SLR are considered. Consistent with this Commission direction, on August 6, 2024, the NRC published the final rule “Renewing Nuclear Power Plant Operating Licenses—Environmental Review” (89 FR 64166). The final rule amended the NRC environmental protection regulations in 10 CFR part 51 to update the potential environmental impacts associated with the renewal of an operating license for a nuclear power plant for up to an additional 20 years, for either an initial license renewal or an SLR term. As part of this update, the NRC also issued Revision 2 to NUREG–1437 (the 2024 LR GEIS) (ADAMS Package Accession No. ML24087A133),

which provides the technical basis for the final rule. Specifically, the 2024 LR GEIS supports the updated list of environmental issues and associated environmental impact findings contained in Table B–1 in Appendix B to Subpart A of the revised 10 CFR part 51 for both initial license renewal and SLR. The final rule became effective on September 5, 2024.

II. Discussion

Pursuant to the Commission's direction in CLI–22–04 to complete the National Environmental Policy Act of 1969, as amended, analysis for Peach Bottom SLR, the NRC staff will prepare a supplement to the final SEIS in accordance with 10 CFR 51.92. For the purposes of this supplement, the staff will assess whether new information since the final SEIS, including the 2024 final rule and the 2024 LR GEIS, warrants any modification to the NRC staff's previous recommendation that the adverse environmental impacts of SLR for Peach Bottom are not so great that preserving the option of license renewal for energy-planning decisionmakers would be unreasonable. In support of the development of the supplement, CEG submitted additional environmental information to the NRC by letter dated November 14, 2024 (ADAMS Package Accession No. ML24319A074). Together, the supplement and the previously issued final SEIS will evaluate all of the environmental impacts of continued operation during the SLR term for Peach Bottom, Unit 2 from August 8, 2033, to August 8, 2053, and for Peach Bottom, Unit 3 from July 2, 2034, to July 2, 2054. The draft supplement will be issued for public comment.

Dated: December 31, 2024.
