

of the Draft EIS, OSMRE selected the Partial Mining alternative as the preferred alternative.

Summary of Expected Impacts

- Emissions of greenhouse gases as they relate to climate change (measured in terms of carbon dioxide equivalent for both 20-year and 100-year global warming potentials)
- Surface water and groundwater quality and quantity
- Socio-economic effects (including changes to state and local taxes, royalties, fees, lease bids and bonuses, as well as payroll benefits as well as effects to Environmental Justice populations)
- Federally listed threatened/endangered species
- Geology
- Soils
- Cultural Resources
- Visual Resources
- Wildlife

Anticipated Permits and Authorizations

None.

Schedule for the Decision-Making Process

The OSMRE anticipates releasing a ROD in February 2025.

Public Participation

In addition to making the Draft EIS available for public comment, OSMRE hosted one public meeting during the comment period. OSMRE received 452 written comments, including comments from Federal and State agencies, non-governmental organizations, and members of the public. OSMRE addressed these comments in the Final EIS. OSMRE considered the public comments received on the Draft EIS and during internal OSMRE review and incorporated them as appropriate into the Final EIS. Public comments and internal OSMRE review resulted in the addition of clarifying text. The revisions and edits have not significantly changed the impact analyses.

Lead and Cooperating Agencies

OSMRE is the lead agency for this EIS. No agencies indicated an interest in being a cooperating agency on the EIS.

Decision Maker

Department of the Interior Assistant Secretary for Land and Minerals Management.

Nature of Decision To Be Made

OSMRE will take the analysis in the Final EIS into consideration as it makes a recommendation to the ASLM about the Federal mining plan modification associated with development of the LBA1 Federal coal tracts. The ASLM will consider OSMRE's recommendation to decide whether the mining plan modification is approved, disapproved, or approved with conditions. OSMRE's recommendation to the ASLM is based, at a minimum, on the documentation specified at 30 CFR 746.13.

On January 6, 2025, the Department of Justice lodged a proposed Consent Decree with the United States District Court for the Southern District of Indiana in the lawsuit entitled *United*

States v. Meyer Distributing, Inc., Civil Action No. 3:25-cv-4.

The proposed Consent Decree would resolve Meyer's liability alleged in the concurrently filed Complaint for violations of section 203(a)(3) of the Clean Air Act, 42 U.S.C. 7522(a)(3), arising from Meyer's sale and offers to sell devices that bypass, defeat, or render inoperative emission controls installed on motor vehicles or motor vehicle engines in violation of the Clean Air Act, 42 U.S.C. 7522(a). The Complaint alleges that Meyer sold or offered to sell over 600 types of devices within four distinct categories from January 1, 2018 through September 16, 2020. The proposed Consent Decree requires Meyer to pay a civil penalty of \$7.4 million, comply with the Clean Air Act going forward, complete a series of compliance measures to prevent future violations, and complete a mitigation project to offset some of the excess emissions caused by its violations in the region with the highest number of violative sales.

The publication of this notice opens a period for public comment on the proposed Consent Decree.
