National Nuclear Security Administration

Notice of Intent To Prepare a Supplemental Environmental Impact Statement for Enhanced Plutonium Facility Utilization at Lawrence Livermore National Laboratory in Livermore, California

AGENCY: National Nuclear Security Administration, Department of Energy.

ACTION: Notice of intent.

SUMMARY: The National Nuclear Security Administration (NNSA), a semi-autonomous agency within the United States (U.S.) Department of Energy (DOE), announces its intent to prepare a Supplemental Environmental Impact Statement (SEIS) for Enhanced Plutonium Facility Utilization at Lawrence Livermore National Laboratory (LLNL or Laboratory) in Livermore, California (DOE/EIS-0547-S1), tiered from the 2023 LLNL Site-Wide Environmental Impact Statement (SWEIS) (2023 LLNL SWEIS)(DOE/EIS-0547). The Record of Decision (ROD) for the 2023 LLNL SWEIS was published on February 20, 2024. The ROD implemented the Proposed Action Alternative in the SWEIS and is the baseline for this SEIS. NNSA will prepare the SEIS and will analyze the potential environmental impacts of enhanced plutonium facility utilization, other reasonable alternatives that may be identified, and the baseline operations as discussed in the 2023 LLNL SWEIS. The purpose of this Notice is to invite public participation in the SEIS process and to encourage public involvement on the scope, any environmental issues, and alternatives that NNSA should consider in the draft SEIS.

DATES: NNSA invites other Federal agencies, Native American Tribes, State and local governments, industry, other organizations, and members of the public to review and submit comments on the scope and alternatives of the LLNL SEIS through February 12, 2025. Comments received after this date will be considered to the extent practicable. NNSA will hold one virtual public scoping meeting. The date of the meeting will be provided in a future notice posted on the following website: <https://www.energy.gov/nnsa/nnsa-nepa-reading-room>. NNSA will hold the meeting no earlier than 15 days from the posting of the notice. Public scoping meeting dates and details will also be announced in local media outlets.

ADDRESSES: Written and oral comments will be given equal weight and NNSA will consider all comments received or postmarked by the end of the comment period in preparing the draft SEIS. Comments received or postmarked after the comment period will be considered to the extent practicable. Written comments on the scope of the SEIS or requests for information related to the SEIS should be sent to: Alan Chen, NEPA Document Manager, National Nuclear Security Administration, Livermore Field Office, 7000 East Avenue, L-293, Livermore, CA 94550-9234 or email to: LLNLSEIS@nnsa.doe.gov. Before including your address, phone number, email address, or other personally identifiable information in your comment, please be advised that your entire comment—including your personally identifiable information—may be made publicly available. If you wish for NNSA to withhold your name and/or other personally identifiable information, please state this prominently at the beginning of your comment. You may also submit comments anonymously.

Information related to the virtual public scoping meeting, including internet and telephone access details, and instructions on how to participate will be available at the following website: <https://www.energy.gov/nnsa/nnsa-nepa-reading-room> and announced in local media outlets.

FOR FURTHER INFORMATION CONTACT: For additional information about this Notice, please contact Alan Chen, NEPA Document Manager, National Nuclear Security Administration, Livermore Field Office, 7000 East Avenue, L-293, Livermore, CA 94550-9234; telephone: 833-778-0508; or email to: LLNLSEIS@nnsa.doe.gov.

SUPPLEMENTARY INFORMATION:

Background

The Nuclear Security Enterprise is currently performing the highest throughput of work in over 30 years, which includes plutonium (Pu) research and development (R&D). As the weapons in the Nation's nuclear stockpile continue to age beyond their original design lifetime, an increased amount of experimental data developed through Pu R&D is necessary to continue NNSA's science-based stewardship of the nuclear weapons stockpile. NNSA has a need for additional R&D space or enhanced utilization of existing R&D space due to new and evolving international security concerns. This enhanced utilization is critical to NNSA's Stockpile Stewardship and Management Program
