

providing opportunities equitably across all time periods.

Monitoring and Reporting

NMFS will continue to monitor the BFT fishery closely. Per § 635.5(b)(2)(i)(A), dealers are required to submit landing reports within 24 hours of a dealer receiving BFT. Late reporting by dealers compromises NMFS' ability to timely implement actions such as quota and retention limit adjustments, as well as closures, and may result in enforcement actions. Additionally, and separate from the dealer reporting requirement, General and HMS Charter/Headboat category vessel owners are required per § 635.27(a)(4) to report their own catch of all BFT retained or discarded dead within 24 hours of the landing(s) or end of each trip, by accessing <https://hmspermits.noaa.gov> by using the HMS Catch Reporting app, by using other apps approved by NMFS for HMS reporting, or calling (888) 872-8862 (Monday through Friday from 8 a.m. until 4:30 p.m.).

Depending on the level of fishing effort and catch rates of BFT, NMFS may determine that additional adjustments are necessary to ensure available quota is not exceeded or to enhance scientific data collection from, and fishing opportunities in, all geographic areas. If needed, subsequent adjustments will be published in the **Federal Register**. In addition, fishermen may access <https://hmspermits.noaa.gov>, for updates on quota monitoring and inseason adjustments.

Classification

NMFS issues this action pursuant to section 305(d) of the Magnuson-Stevens Act (16 U.S.C. 1855(d)) and regulations at 50 CFR part 635 and this action is exempt from review under Executive Order 12866.

The Assistant Administrator for NMFS (AA) finds that pursuant to 5 U.S.C. 553(b)(B), there is good cause to waive prior notice and opportunity to provide comment on this action, as notice and comment would be impracticable and contrary to the public interest. Specifically, the regulations implementing the 2006 Consolidated HMS FMP and amendments provide for inseason adjustments and quota transfers to respond to the unpredictable nature of BFT availability on the fishing grounds, the migratory nature of this species, and the regional variations in the BFT fishery. Providing prior notice and opportunity for public comment is impracticable and contrary to the public interest as this fishery is currently

underway. Based on current landings information, the available time period subquota is projected to be reached shortly. Delaying this action could result in BFT landings exceeding the January through March time period subquota. Additionally, a delay in implementing this transfer would preclude the fishery from harvesting BFT that are currently available on the fishing grounds and that might otherwise become unavailable. This action does not raise conservation and management concerns and would support effective management of the BFT fishery. Transferring quota from the General category December time period to the General category January through March time period does not affect the overall ICCAT-allocated U.S. BFT quota. NMFS notes that the public had an opportunity to comment on the underlying rulemakings that established the U.S. BFT quota and the inseason adjustment criteria.

For all of the above reasons, the AA finds that pursuant to 5 U.S.C. 553(d), there is good cause to waive the 30-day delay in effective date.

BILLING CODE 3510-22-P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 648

[Docket No: 230316-0077]

RTID 0648-XE604

Fisheries of the Northeastern United States; Atlantic Herring Fishery; 2025 Management Area 1B Possession Limit Adjustment

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; possession limit adjustment.

SUMMARY: NMFS is implementing a 2,000-lb (907.2-kg) possession limit for Atlantic herring for Management Area 1B. This is required because NMFS projects that herring catch from Area 1B will reach 92 percent of the Area's sub-annual catch limit before the end of the fishing year. This action is intended to

prevent overharvest of herring in Area 1B, which would result in additional catch limit reductions in a subsequent year.

DATES: Effective 00:01 hours (hr) local time, January 8, 2025, through December 31, 2025.

FOR FURTHER INFORMATION CONTACT:

Colette Tweeddale, Fishery Management Specialist, 978-281-9335.

SUPPLEMENTARY INFORMATION: The Regional Administrator of the Greater Atlantic Regional Office monitors Atlantic herring fishery catch in each Management Area based on vessel and dealer reports, state data, and other available information. Regulations at 50 CFR 648.201(a)(1)(i)(A) require implementation of a 2,000-lb (907.2-kg) possession limit for herring for Area 1B beginning on the date that catch is projected to reach 92 percent of the sub-annual catch limit (ACL) for that area. The Magnuson-Stevens Fishery Conservation and Management Act provides authority to implement the possession limit only to the Secretary of Commerce, which has been delegated to the Regional Administrator.

Based on vessel reports, dealer reports, and other available information, the Regional Administrator projects that the herring fleet will have caught 92 percent of the Area 1B sub-ACL by January 8, 2025. Therefore, effective 00:01 hr local time January 8, 2025, through December 31, 2025, a person may not attempt or do any of the following: Fish for; possess; transfer; purchase; receive; land; or sell more than 2,000 lb of herring per trip or more than once per calendar day in or from Area 1B except as provided in §§ 648.201(b) and (c).

Vessels that enter port before 00:01 hr local time on January 8, 2025, may land and sell more than 2,000 lb (907.2 kg) of herring from Area 1B from that trip, provided that catch is landed in accordance with state management measures. Vessels may transit or land in Area 1B with more than 2,000 lb (907.2 kg) of herring on board, provided that: The herring were caught in an area not subject to a 2,000-lb (907.2-kg) limit; all fishing gear is stowed and not available for immediate use; and the vessel is issued a permit appropriate to the amount of herring on board and the area where the herring was harvested.

Also effective 00:01 hr local time, January 8, 2025, through 24:00 hr local time, December 31, 2025, federally permitted dealers may not attempt or do any of the following: Purchase; receive; possess; have custody or control of; sell; barter; trade; or transfer more than 2,000 lb (907.2 kg) of herring per trip or

calendar day from Area 1B, unless it is from a vessel that enters port before 00:01 hr local time on January 8, 2025 and catch is landed in accordance with state management measures.

Classification

This action is required by 50 CFR part 648 and is exempt from review under Executive Order 12866.

NMFS finds good cause pursuant to 5 U.S.C. 553(b)(3)(B) to waive prior notice and the opportunity for public comment because it is unnecessary, contrary to the public interest, and impracticable. Ample prior notice and opportunity for public comment has been provided for the required implementation of this action. The requirement to implement this possession limit was developed by the New England Fishery Management Council using public meetings that invited public comment on the measures when they were developed and considered along with alternatives.

Further, the regulations requiring implementation of this possession limit also were subject to public notice and opportunity to comment, when they were first adopted in 2014. Herring fishing industry participants monitor catch closely and anticipate potential possession limit adjustments as catch totals approach Area sub-ACLs. The regulation is not discretionary and is designed for implementation as quickly as possible to prevent catch from exceeding limits designed to prevent overfishing while allowing the fishery to achieve optimum yield.

The 2025 herring fishing year began on January 1, 2025. Data indicating that the herring fleet will have landed at least 92 percent of the 2025 sub-ACL allocated to Area 1B only recently became available. High-volume catch and landings in this fishery can increase total catch relative to the sub-ACL quickly, especially in this fishing year where annual catch limits are unusually

low. If implementation of this possession limit adjustment is delayed to solicit prior public comment, the 2025 sub-ACL for Area 1B will likely be exceeded; thereby undermining the conservation objectives of the Herring Fishery Management Plan (FMP). If sub-ACLs are exceeded, the excess must be deducted from a future sub-ACL and would reduce future fishing opportunities. The public expects these actions to occur in a timely way consistent with the FMP's objectives. For the reasons stated above, NMFS also finds good cause to waive the 30-day delayed effectiveness in accordance with 5 U.S.C. 553(d)(3).

Authority: 16 U.S.C. 1801 *et seq.*
