

cumulative public or occupational radiation exposure.

(4) The proposed exemption does not involve any construction. Therefore, there is no significant construction impact.

(5) The proposed exemption does not alter any of the assumptions or limits in the licensee's accident analyses. Therefore, there is no significant increase in the potential for or consequences from radiological accidents.

Based on the foregoing and because the requirements from which the exemption is sought involve other requirements of an administrative, managerial, or organizational nature, the exemption meets the eligibility criteria for categorical exclusion set forth in 10 CFR 51.22(c)(25)(vi)(I). Therefore, in accordance with 10 CFR 51.22(b), no environmental impact statement or environmental assessment need be prepared in connection with granting the proposed exemption.

IV. Conclusion

Accordingly, the Commission has determined that, pursuant to 10 CFR 26.9, the exemption is authorized by law, will not endanger life or property or the common defense and security, and is otherwise in the public interest. Therefore, the Commission hereby grants TVA a one-time exemption from 10 CFR 26.205(d)(7) for personnel in the categories described in 10 CFR 26.4(a)(1), (a)(2), and (a)(4) to allow the use of the outage MDO requirements in 10 CFR 26.205(d)(4) for a 21-day period starting no earlier than January 6, 2025, and no later than January 31, 2025. While the exemption is in effect, TVA will ensure that individuals specified in 10 CFR 26.4(a)(1) and (a)(2) have at least 3 days off in each successive (*i.e.*, non-rolling) 15-day period and that individuals specified in 10 CFR 26.4(a)(4) have at least 1 day off in any 7-day period. The use of the outage MDO requirements and an outage plan will adequately manage cumulative and acute fatigue for covered personnel. The exemption ends either at the end of the approved 21-day period or at the time when Sequoyah, Unit 2, is connected to the electrical grid, whichever occurs first.
