II. General Information

A. Does this action apply to me?

This rule may be of interest to electric utilities and independent power producers that fall within the North American Industry Classification System (NAICS) code 221112. The reference to NAICS code 221112 is not intended to be exhaustive, but rather provides a guide for readers regarding entities likely to be regulated by this action. This discussion lists the types of entities that EPA is now aware could potentially be regulated by this action. Other types of entities not described here could also be regulated. To determine whether your entity is regulated by this action, you should carefully examine the applicability criteria found in 40 CFR 257.50 of title 40 of the Code of Federal Regulations. If you have questions regarding the applicability of this action to a particular entity, consult the person listed in the **FOR FURTHER INFORMATION CONTACT** section.

B. What action is the Agency taking?

EPA is proposing to correct errors and conform the regulatory text to the decisions articulated in the Legacy Final Rule published in the **Federal Register** on May 8, 2024, which established regulatory requirements for legacy CCR surface impoundments and CCR management units (CCRMU). 89 FR 38950. In addition, EPA is proposing a number of revisions to clarify the final requirements, such as consolidating the compliance deadlines for CCRMU into a single section and providing a deadline for the initial fugitive dust plan for CCRMU at facilities without a regulated unit.

In the "Rules and Regulations" section of this **Federal Register**, EPA has also published a direct final rule for this same action because the Agency views this as a noncontroversial action and anticipates no adverse comment. EPA has explained the reasons for this in the preamble to the direct final rule. This proposed rule provides an opportunity for the public to comment on the issues discussed in the preamble to the direct final rule.

In light of the narrow purpose of this rule to conform the regulatory text to the final actions described in the Legacy Final Rule, EPA is only soliciting comment on whether the changes in the direct final rule conform the text to EPA's stated intent in the Legacy Final Rule preamble. EPA is not reconsidering, proposing to reopen, or otherwise soliciting comment on any provisions of the Legacy Final Rule itself. For the reader's convenience, EPA has provided a background description of individual provisions in the Legacy Final Rule in several places throughout the direct final rule preamble. These descriptions do not reopen the underlying described provisions, but merely explain the context to inform the public of the basis for this action's technical corrections. EPA will not respond to comments submitted on any issues other than those specifically identified in the direct final rule, and such comments will not be considered part of the rulemaking record.

If EPA receives no adverse comment on the corrections in the direct final rule, the Agency will not take further action on this proposed rule and the direct final rule will become effective as provided in that action. If EPA does receive adverse comment, EPA will publish a timely withdrawal in the **Federal Register** informing the public about the specific regulatory paragraph(s) or amendment(s) in the direct final rule that will not take effect. The corrections in the direct final rule that are not withdrawn will become effective on the date set out above. EPA will address all public comments in any subsequent final rule based on this proposed rule.

EPA does not intend to institute a second comment period on this action. Any parties interested in commenting must do so at this time. For further information about commenting on this proposed rule see the **ADDRESSES** section of this document.

C. What is the Agency's authority for taking this action?

EPA is publishing this rulemaking under the authority of sections 1008(a)(3), 2002(a), 4004, and 4005(a),

(d) of the Solid Waste Disposal Act of 1970, as amended by the Resource Conservation and Recovery Act of 1976 (RCRA), as amended by the Hazardous and Solid Waste Amendments of 1984 (HSWA) and the Water Infrastructure Improvements for the Nation (WIIN) Act of 2016, 42 U.S.C. 6907(a), 6912(a), 6944, 6945(a) and (d).

D. Where is the location of regulatory text for this proposal?

The regulatory text for this proposal is identical to that for the direct final rule published in the Rules and Regulations section of this **Federal Register**. For further supplemental information, the detailed rationale for the proposal, and the regulatory revisions, see the information provided in the direct final rule published in the Rules and Regulations section of this **Federal Register**.

III. Statutory and Executive Order (E.O.) Reviews

For a complete discussion of all of the administrative requirements applicable to this action, see the direct final rule in the Rules and Regulations section of this **Federal Register**.
