

classification or if it is in an OTR member state to determine if RACT is satisfied by the previously approved state SIP. An air agency is also required to submit a second 10-year maintenance plan for maintenance areas or portions of maintenance areas for the 2008 ozone NAAQS.

*Total estimated burden:* 53,667 hours (per year). Burden is defined at 5 CFR 1320.03(b).

*Total estimated cost:* \$4,540,200 (per year), which includes \$0 annualized capital or operation & maintenance costs.

*Changes in the Estimates:* There is a decrease in the annual burden of 65,466 hours below the 119,133 hours estimated from the last approved ICR for 8-hour ozone NAAQS implementation. The primary reason for this decrease is that the previous ICR accounted for some respondents continuing to submit information for the 2008 NAAQS, respondents continuing to report on the revoked 1997 NAAQS, and respondents submitting initial information for all 52 nonattainment areas for the 2015 NAAQS. The estimates provided in this supporting statement differ from the prior 2015/2008/1997 combined NAAQS estimate due to decreases resulting from: the total state respondents reduced from 96 NAAs for the 2015/2008/1997 ozone NAAQS to 66 NAAs for the combined 2008 and 2015 ozone NAAQS, removal of the burden estimate for the states in the Ozone Transport Regions to certify the current state SIPs meet CAA section 184(b)(1)(B) RACT requirements; no 1997 8-hour ozone second maintenance plans due during the next three years; no 2008 8-hour ozone NAAQS needing to be reclassified to a higher class.

**Abstract:** The U.S. Environmental Protection Agency (EPA) makes competitive financial assistance awards to support projects that tackle environmental, public health, and energy challenges across the country. Historically, these investments have not reached communities and groups who are overburdened by the effects of pollution, environmental hazards, and climate change. To help get resources and funding to underserved and overburdened communities, the Inflation Reduction Act (IRA) created the Environmental and Climate Justice Block Grant Program (ECJP)—the largest investment in environmental and climate justice in U.S. history—when it was signed into law by President Biden on August 16, 2022. The Community Change Grants (CCG) are the final and most comprehensive piece of EPA's implementation of ECJP IRA funding. The CCG program will provide funding to communities and their partners to design, develop, and implement multifaceted, community-driven projects to protect public health and the environment. With this Information Collection Request (ICR), EPA seeks approval to collect performance information from CCG grantees via progress reports and final reports. Collection of this information enables EPA to assess and manage the CCG program, which ensures responsible stewardship of public funds; rigorous evidence-based learning and improvement; and transparent accountability to the American public.

**Abstract:** The U.S. Environmental Protection Agency (EPA) makes competitive financial assistance awards to support projects that tackle environmental, public health, and energy challenges across the country. This is accomplished by working directly with community-based organizations (CBOs) and state, local, territorial, and tribal governments that have strong ties to the communities in which they are working. EPA fosters a collaborative approach to tackling some of the most critical challenges in the most overburdened communities by encouraging projects that involve multiple stakeholders including States, local governments, and tribal governments. To help get resources and funding to underserved and overburdened communities EPA offers Environmental Justice Collaborative Problem Solving (EJCPS) and

Environmental Justice Government to Government (EJG2G) cooperative agreement programs. With this Information Collection Request (ICR), EPA seeks authorization to collect post-award information in the form of semi-annual progress reports and final reports from each grantee to track their progress, with respect to effectiveness (e.g., the extent to which projects achieved their objectives, goals, and targets), efficiency (e.g., the extent to which projects delivered activities and outputs on schedule and within budget), and equity (e.g., the extent to which investments and benefits flowed to disadvantaged communities that are marginalized, underserved, and overburdened by pollution). Collection of this information enables EPA to assess and manage the EJCPS and EJG2G programs, which ensures responsible stewardship of public funds; rigorous evidence-based learning and improvement; and transparent accountability to the American public.
