

capital or operation & maintenance costs.

Changes in the estimates: The decrease in burden from the most recently approved ICR is due to an adjustment(s). The adjustment decrease in burden from the most recently approved ICR is due to a decrease in the number of sources. The number of facilities has decreased from 104 to 96. The decrease in respondents also results in a decrease in capital/startup costs.

Courtney Kerwin,

Director, Information Engagement Division.

Clean Air Act Operating Permit Program; Order on Petition for Objection to State Operating Permit for Suncor Energy (U.S.A.), Inc., Commerce City Refinery Plant 1 (West) & Plant 3 (Asphalt Unit)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of final order on petition.

SUMMARY: The Environmental Protection Agency (EPA) Administrator signed an order dated December 30, 2024, granting in part and denying in part a petition dated September 6, 2024, from the Center for Biological Diversity and Sierra Club. The petition requested that the EPA object to the renewal of a Clean Air Act (CAA) operating permit issued by the Colorado Department of Public Health and Environment (CDPHE) to Suncor Energy (U.S.A.), Inc. for its Commerce City Refinery, Plant 1 (West) & Plant 3 (Asphalt Unit) located in Adams County, Colorado.

FOR FURTHER INFORMATION CONTACT: Julie Merkel, Environmental Protection Agency, EPA Region 8, telephone number: (406) 457-5042, email address: merkel.julie@epa.gov; or Donald Law, EPA Region 8, telephone number: (303) 312-7015, email address: law.donald@epa.gov. The final order and petition are available electronically at: <https://www.epa.gov/title-v-operating-permits/title-v-petition-database>.

SUPPLEMENTARY INFORMATION: The EPA received a petition from the Center for Biological Diversity and Sierra Club dated September 6, 2024, requesting that the EPA object to the issuance of operating permit no. 96OPAD120, issued by CDPHE to Suncor Energy (U.S.A.), Inc., Commerce City Refinery, Plant 1 (West) & Plant 3 (Asphalt Unit)

in Adams County, Colorado. On December 30, 2024, the EPA Administrator issued an order granting in part and denying in part the petition. The order itself explains the basis for the EPA's decision.

Sections 307(b) and 505(b)(2) of the CAA provide that a petitioner may request judicial review of those portions of an order that deny issues in a petition. Any petition for review shall be filed in the United States Court of Appeals for the appropriate circuit no later than March 18, 2025.

KC Becker,

Regional Administrator, Region 8.

Revised Designation Decision and Record of Decision in Response to a Petition by Amigos Bravos for a Determination That Stormwater Discharges in Los Alamos County Contribute to Water Quality Standards Violations and Require Clean Water Act Permit Coverage

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency (EPA) Region 6 is providing notice of a Revised Designation Decision that storm water discharges from the Los Alamos Urban Area (as defined by the latest decennial Census) and Los Alamos National Laboratory (LANL) property in Los Alamos County and Santa Fe County, New Mexico are contributing to violations of New Mexico Water Quality Standards (WQS) and require National Pollutant Discharge Elimination System (NPDES) permit coverage under the Clean Water Act (CWA). This action is in response to a June 30, 2014, petition filed with EPA by Amigos Bravos entitled "A Petition by Amigos Bravos for a Determination that Storm Water Discharges in Los Alamos County Contribute to Water Quality Standards Violations and Require a Clean Water Act Permit," and revises the Agency's prior December 16, 2019, designation decision, which was remanded to EPA for reconsideration by the United States Court of Appeals for the Tenth Circuit.

DATES: The "Revised Designation Decision and Record of Decision in Response to A Petition by Amigos

Bravos for a Determination that Stormwater Discharges in Los Alamos County Contribute to Water Quality Standards Violations and Require Clean Water Act Permit Coverage" was signed on December 9, 2024. Please refer to the **SUPPLEMENTARY INFORMATION** section for additional information.

ADDRESSES: For further information contact Ms. Evelyn Rosborough via email: rosborough.evelyn@epa.gov, or by mail at Ms. Evelyn Rosborough, Environmental Protection Agency, Region 6, Water Division (6WQ-NP), 1201 Elm Street, Suite 500, Dallas, TX 75270.

SUPPLEMENTARY INFORMATION:

General Information

A. Does this action apply to me?

Small Municipal Separate Storm Sewer Systems (MS4s) operated by the County of Los Alamos, the New Mexico Department of Transportation (NMDOT), and Los Alamos National Laboratory (LANL), including Triad National Security, LLC and the U.S. Department of Energy's National Nuclear Security Administration, will be regulated as a result of this action. To determine whether your entity is affected by this action, you should also review the description of EPA's action in Section II.B of this notice and the Revised Designation Decision document available in Docket ID No. EPA-R06-OW-2023-0566 at the Federal eRulemaking Portal: <https://www.regulations.gov/> or online via the EPA Residual Designation web page at: <https://www.epa.gov/npdes/epas-residual-designation-authority>. If you have questions regarding the applicability of this action to a particular entity, consult the person listed in **ADDRESSES** section.

B. Summary and Availability of Revised Designation Documents

The Regional Administrator of EPA Region 6 has made a revised designation of stormwater discharges from certain MS4s for regulation under the NPDES permitting program pursuant to Section 402(p)(2)(E) and (6) of the CWA and EPA's implementing regulations at 40 CFR 122.26(a)(9)(i)(C)-(D). Those provisions authorize the Agency to designate for regulation stormwater discharges that contribute to a WQS violation or that are a significant contributor of pollutants to waters of the United States, or where controls are needed based on wasteload allocations that are part of total maximum daily loads. This authority is often referred to as "residual designation authority" or RDA. EPA is providing notice of its

Revised Designation Decision that storm water discharges from the Los Alamos Urban Area (as defined by the latest decennial Census) and LANL property in Los Alamos County and Santa Fe County, New Mexico are contributing to violations of New Mexico WQS and require NPDES permit coverage under the CWA.

This Revised Designation Decision revises EPA's prior December 16, 2019, decision designating stormwater discharges from small MS4s operated by the County of Los Alamos, LANL, and the New Mexico Department of Transportation for NPDES permitting. EPA has carefully considered all record information, including stormwater discharge data and other information submitted by Los Alamos County, NMED, LANL, and the Buckman Direct Diversion, NMED's water quality assessments and lists of impaired waters, and supplemental information submitted by LANL and the County regarding EPA's previous 2019 designation decision, as well as the public comments submitted on that decision when it was proposed. EPA also conducted a site visit in September 2022 to examine first-hand the effects of the discharges and waters at issue.

Upon reconsideration of the Petition on remand, EPA has determined that stormwater discharges from small MS4s located in the Los Alamos Urban Area as defined by the latest decennial Census and MS4s located on LANL property within Los Alamos and Santa Fe Counties, New Mexico require NPDES permit coverage because the discharges are contributing to violations of NM WQS in waters of the United States. The Revised Designation Decision plus supplementary information, including the response to comments document, relating to it are available in Docket ID No. EPA-R06-OW-2023-0566 at the Federal eRulemaking Portal: <https://www.regulations.gov/> or online via the EPA Residual Designation web page at: <https://www.epa.gov/npdes/epas-residual-designation-authority>.

Dated: December 19, 2024.

Troy Hill,

Director, Water Division, Region 6.

Agency Information Collection Activities; Submission to the Office of Management and Budget for Review and Approval; Comment Request; Threshold Setting Data Needs for the Label Program for Low Embodied Carbon Construction Materials (New)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency (EPA) has submitted an information collection request (ICR), Threshold Setting Data Needs for the Label Program for Low Embodied Carbon Construction Materials (EPA ICR Number 2805.01 and OMB Control Number 2070-NEW) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act. This is a request for a new ICR. Public comments were previously requested via the **Federal Register** on November 7, 2024. This notice allows for an additional 30 days for public comments.

DATES: Comments must be received on or before February 18, 2025.

ADDRESSES: Submit your comments to EPA, identified by docket identification (ID) number Docket ID No. EPA-HQ-OPPT-2024-0508, to EPA online using www.regulations.gov (our preferred method), or by mail to: EPA Docket Center, Environmental Protection Agency, Mail Code 28221T, 1200 Pennsylvania Ave. NW, Washington, DC 20460.

EPA's policy is that all comments received will be included in the public docket without change including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute.

Submit written comments and recommendations to OMB for the proposed information collection within 30 days of publication of this notice to www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting "Currently under 30-day Review—Open for Public Comments" or by using the search function.

FOR FURTHER INFORMATION CONTACT: Connie Ocampo, Mission Support Division (7602M), Office of Program Support, Office of Chemical Safety and

Pollution Prevention, Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460-0001; telephone number: (202) 566-1216; email address: ocampo.connie@epa.gov.

SUPPLEMENTARY INFORMATION: This a new ICR. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. Public comments were previously requested via the **Federal Register** on November 7, 2024, at 89 FR 88277, establishing a 60-day comment period). This notice allows for an additional 30 days for public comments. Supporting documents, which explain in detail the information collection activities and related estimated burden and costs that are summarized in this document, are available in the docket. The docket can be viewed online at <https://www.regulations.gov> or in person at the EPA Docket Center, WJC West, Room 3334, 1301 Constitution Ave. NW, Washington, DC. The telephone number for the Docket Center is 202-566-1744. Additional instructions on commenting and visiting the docket is available at <https://www.epa.gov/dockets>.

Abstract: This ICR is for the EPA C-MORE (Construction Material Opportunities to Reduce Emissions) Program (previously referred to as a "Low Embodied Carbon Construction Materials Program"). Under this ICR, the Program is seeking approval to collect data to fulfill a number of vital information needs as the Program begins operations. The Program is seeking approval to collected data from state and local government agencies, architectural and engineering (A&E) firms, Program grantees, entities that access Program technical assistance, and entities involved in salvage and reuse operations. From state and local government agencies, the Program is seeking information on the types and amounts of asphalt, concrete, cement, glass, and steel purchased, including reference to Environmental Product Declarations (EPDs) associated with these products. The Program is seeking similar information from A&E firms, but focused solely on concrete. EPD information, along with data on amounts purchased of each product, will provide EPA with data that can be used in setting threshold values to define categories for labels under the Program. The underpinnings of being able to label construction materials with substantially lower levels of embodied greenhouse gas emissions is collecting, assessing the quality of, and analyzing data on embodied greenhouse gas
