### Holtec Decommissioning International, LLC and Holtec Palisades, LLC; Palisades Nuclear Plant; Draft Environmental Assessment and Draft Finding of No Significant Impact

**AGENCY:** Nuclear Regulatory Commission.

**ACTION:** Request for comment.

**SUMMARY:** The U.S. Nuclear Regulatory Commission (NRC) is issuing for public comment a draft environmental assessment (EA) and draft finding of no significant impact (FONSI) evaluating the environmental impacts from proposed Federal actions related to reauthorizing power operations at the Palisades Nuclear Plant (Palisades). ##### II. Introduction

Palisades consists of a single pressurized-water reactor designed by Combustion Engineering (with a turbine-generator designed by Westinghouse) and is located in Covert Township, Michigan, along the shoreline of Lake Michigan. Originally licensed for operation on March 24, 1971, the NRC issued a renewed facility operating license (RFOL) for Palisades on January 17, 2007, with the renewed operating license term expiring on March 24, 2031.

After more than 40 years of commercial operation, Palisades permanently ceased operations on May 20, 2022. On June 13, 2022, Entergy Nuclear Operations, Inc., the licensee who operated the facility prior to

transfer of the Palisades license to Holtec Decommissioning International, LLC (HDI) and Holtec Palisades, LLC, submitted the certifications for permanent cessation of operations and permanent removal of fuel from the reactor vessel in accordance with paragraph 50.82(a)(1) of title 10 of the *Code of Federal Regulations* (10 CFR). When the NRC docketed the certifications, Palisades' RFOL No. DPR-20 no longer authorized operation of the reactor, or emplacement or retention of fuel into the reactor vessel, as provided by 10 CFR 50.82(a)(2).

To return Palisades to power operations, HDI has submitted (1) a request for an exemption from the requirement in 10 CFR 50.82(a)(2) that prohibits operation of the Palisades reactor, or emplacement or retention of fuel into the reactor vessel; (2) a request for a license transfer from HDI (currently responsible for decommissioning activities at Palisades) to Palisades Energy, LLC (which would be authorized to operate the reactor); and (3) four LARs. These requests, along with the NRC determinations that these requests were acceptable for review, are listed in Section III of this notice. If all the requests are granted, Palisades Energy, LLC, would be allowed to place fuel into the reactor vessel and resume power operations through March 24, 2031, which is the end of the renewed

facility operating license term under Palisades RFOL No. DPR-20.

Two notices of opportunity to request a hearing and petition for leave to intervene (89 FR 64486 and 89 FR 64493) were published in the **Federal Register** on August 7, 2024. The first opportunity covered four LARs from HDI, filed between December 2023 and May 2024, that would restore aspects of the Palisades license to those required for an operating reactor. The second opportunity covered a December 6, 2023, request to transfer operating authority under the Palisades license from HDI to Palisades Energy, LLC.

The NRC staff has prepared a draft EA and draft FONSI documenting its environmental review of the potential licensing and regulatory approvals. Based on the environmental review, the NRC has made a preliminary determination that the proposed actions would not significantly affect the quality of the human environment. Therefore, the NRC staff has made a preliminary determination that it will not prepare an environmental impact statement (EIS) and that a draft FONSI appears warranted.

The staff will consider comments on the draft EA and draft FONSI over a 30-day public comment period from Federal, State, local, and Tribal officials, and members of the public. After consideration of these public comments, the NRC staff will make a final

determination as to whether preparation of an EIS is necessary or whether a FONSI can be issued for the licensing and regulatory approvals for Palisades.

The environmental review included fulfillment of the NRC obligations related to Section 106 of the National Historic Preservation Act (NHPA) of 1966, as amended, (54 U.S.C. 300101, *et seq.*). The regulations in 36 CFR 800.8, "Coordination with the National Environmental Policy Act," allow agencies to use their National Environmental Policy Act of 1969 (42 U.S.C. 4321, *et seq.*) process to fulfill the requirements of Section 106 of the NHPA. Therefore, pursuant to 36 CFR 800.8(c), the NRC used its process for the preparation of the EA on the proposed actions to comply with Section 106 of the NHPA in lieu of the procedures set forth at 36 CFR 800.3 through 800.6.

**III. Summary of Draft Environmental Assessment**

*Description of the Proposed Action and Need*

The NRC's proposed actions are decisions on whether to grant or deny Holtec's interdependent, connected licensing and regulatory requests that, if approved, would collectively support reauthorizing power operations and refueling of the reactor under the existing Palisades' RFOL.

The NRC's environmental review also encompasses any revisions or supplements to these requests or other regulatory or licensing requests submitted to the NRC that are necessary to reauthorize power operations of Palisades.

The DOE LPO's Federal action is a decision on providing Federal financial assistance for refueling and resumption of power generation activities at Palisades, pursuant to Holtec's loan guarantee agreement with DOE LPO that was issued pursuant to the Energy Policy Act (EPA) of 2005.

The need for the potential approval of the proposed NRC Federal actions, collectively supporting the reauthorization of power operations, is to provide an option that allows for baseload clean energy power generation capability within the term of the Palisades' RFOL to meet current system generating needs. Holtec cites the State of Michigan's Public Acts of 2023, Act No. 235 (enrolled Senate Bill 271), which establishes a clean energy standard for electric providers to provide at least 80 percent clean energy by 2035 and 100 percent by 2040.

Michigan's Act No. 235 defines clean energy as including a system that "Generates electricity or steam without emitting greenhouse gas, including nuclear generation."

The need for DOE's proposed action (Federal financial assistance in the form of a loan guarantee), is to implement DOE's authority under Title XVII of the EPA of 2005, which was reauthorized, amended, and revised by the Inflation Reduction Act of 2022 to create the Energy Infrastructure Reinvestment (EIR) Program (Section 1706). The purpose of the EIR Program is to finance

projects and facilities in the United States that retool, repower, repurpose, or replace energy infrastructure that has ceased operations or to enable operating energy infrastructure to avoid, reduce, utilize, or sequester air pollutants or anthropogenic emissions of greenhouse gases (42 U.S.C. 16517(a)(2)).

*Environmental Impacts of the Proposed Action*

In the draft EA, the NRC staff assessed the potential direct and indirect environmental impacts from the proposed actions associated with the following relevant resource areas: land use and visual resources; meteorology and air quality; surface water resources; groundwater resources and the geologic environment; ecological resources (terrestrial and aquatic); historic and cultural resources; socioeconomics; environmental justice; radiological and nonradiological human health; waste management; uranium fuel cycle and transportation; and postulated accidents. The NRC staff also considered decommissioning impacts, the potential effects of climate change on its evaluation of the environmental impacts of the proposed continued operation of Palisades, and the cumulative effects from past, present, and reasonably foreseeable future actions when combined with the proposed action.

The NRC staff determined that the environmental impacts of the proposed action would be NOT SIGNIFICANT for

each potentially affected environmental resource. In addition, the NRC staff determined that the projected effects of climate change would not alter any of the impact determinations described in the EA. Furthermore, the NRC staff found that there would be no significant cumulative impact to any resource area from the proposed action when added to other past, present, and reasonably foreseeable actions.

*Environmental Impacts of the Alternatives to the Proposed Action*

The NRC staff considered a range of alternatives to the proposed action and the environmental impacts of the alternatives as appropriate. The NRC staff determined that there are no alternatives that meet the need for the proposed action that would be environmentally preferable to the proposed action.

**IV. Draft Finding of No Significant Impact**

The proposed Federal actions before the NRC are whether to grant requests for an exemption, a license transfer, and license amendments to support reauthorizing Palisades for power operations through the remainder of its licensing term (to March 24, 2031). The NRC staff has conducted an environmental review of these actions and prepared a draft EA. This draft FONSI incorporates by reference the draft EA summarized in Section II of this notice and referenced in Section V of this notice. Based on preliminary

determinations in the draft EA that the environmental impacts of the proposed actions would be NOT SIGNIFICANT for each potentially affected resource area, the NRC staff is issuing a draft determination that the proposed Federal actions would not significantly affect the quality of the human environment. Therefore, the NRC staff has made a draft determination that preparation of an EIS is not required for the proposed Federal actions and that a draft FONSI appears warranted.

This draft finding and the related environmental documents referenced throughout the EA are available for public inspection as discussed in the draft EA and Section I of this notice. The NRC's staff's determination is tentative. Before making a final determination, the NRC staff will consider comments received on the draft EA and draft FONSI over a 30-day public comment period from Federal, State, Tribal, and local officials, and members of the public. Once the NRC staff makes a final determination, the NRC will publish the final EA and final FONSI or proceed to prepare an EIS. At the conclusion of the NRC environmental review, DOE LPO would publish a separate Record of Decision or FONSI, as appropriate.
