SUPPLEMENTARY INFORMATION: On January 23, 2025, President Trump signed Executive Order 14179 (Removing Barriers to American Leadership in Artificial Intelligence) to establish U.S. policy for sustaining and enhancing America’s AI dominance in order to promote human flourishing, economic competitiveness, and national security. This Order directs the development of an AI Action Plan to advance America’s AI leadership, in a process led by the Assistant to the President for Science and Technology, the White House AI and Crypto Czar, and the National Security Advisor.

This Order follows the President’s January 20, 2025, Executive Order 14148, revocation of the Biden-Harris AI Executive Order 14110 of October 30, 2023 (Safe, Secure, and Trustworthy Development and Use of Artificial Intelligence), which hampered the private sector’s ability to innovate in AI by imposing burdensome government requirements restricting private sector AI development and deployment. The Trump Administration recognizes that with the right government policies, the United States can solidify its position as the leader in AI and secure a brighter future for all Americans.

OSTP seeks input on the highest priority policy actions that should be in the new AI Action Plan. Responses can address any relevant AI policy topic, including but not limited to: hardware and chips, data centers, energy consumption and efficiency, model

development, open source development, application and use (either in the private sector or by government), explainability and assurance of AI model outputs, cybersecurity, data privacy and security throughout the lifecycle of AI system development and deployment (to include security against AI model attacks), risks, regulation and governance, technical and safety standards, national security and defense, research and development, education and workforce, innovation and competition, intellectual property, procurement, international collaboration, and export controls. Respondents are encouraged to suggest concrete AI policy actions needed to address the topics raised.

Comments received will be taken into consideration in the development of the AI Action Plan.
