

THE ART OF
Stamp Collecting

The Art of Stamp Collecting

Stamp collecting can be a lifetime hobby. It's fun and educational for all ages and it's easy to start your own collection without a big investment. Read on to find out how you can start or build your very own collection.

The study of stamps and postal materials is called *philately* and collectors are sometimes called *philatelists*.

How do I start collecting stamps?

It's easy. You can start by simply saving stamps from letters, packages, and postcards. Ask your friends and family to save stamps from their mail.

Neighborhood businesses that get a lot of mail—banks, stores, travel agencies—might save their envelopes for you too.

Or you can start your own collection by choosing one or two of your favorite subjects. Many beginning collectors choose a subject like art, history, sports, transportation, science or animals as the theme of their collection. This is called topical collecting. See the stamps pictured on this page as examples of the many topics you can collect.

Will it cost me a lot to start a collection?

No! Start with used stamps and you can have a great time on a limited budget with just a few inexpensive accessories such as an album and stamp hinges.

What kinds of stamps are there?

There are a number of different types of stamps. Their purposes can be described as commemorative, definitive, and special; their formats can be in sheets, booklets, or coils. Stamps may be conventional adhesive (“lick-and-stick”) or self-adhesive (“no-lick, peel-and-stick”).

Definitive stamps (also called “regular issues”) are the most common type of postage. Generally less than an inch square, they are printed in large quantities, and often more than once. Their denominations can range from 1¢ to \$14. Definitives are usually available for several years, since they're printed in large quantities for specific postal rates.

Commemorative stamps, larger and more colorful than definitives, are printed in smaller quantities and typically only once. They honor people, events, or subjects of importance to American life and culture. They remain on sale for a limited period of time, generally about a year; many post offices carry them for only a few months. The U.S. Postal Service's Philatelic Fulfillment Center also offers commemorative stamps by mail order for about one year after they are issued.

Special stamps supplement each year's regular stamp issues. They include Holiday Celebrations, Christmas, Love, international rate, Priority Mail, and Express Mail. They also are usually on sale for only a limited time.

Booklet

Coil

Special

Booklet stamps are designed to be folded into a convenient unit. They come in small folders that contain panes of 3 to 20 stamps each. Gummed booklet stamps have at least one straight edge.

Coil stamps are issued in rolls. Each coil has two straight edges and two edges with either slit-like cuts or holes called perforations.

How do I remove stamps from an envelope?

If you wish you can save whole envelopes with stamps on them and store them anywhere—from shoe boxes to special albums. But if you want to remove stamps from envelopes it pays to be very careful. *Soaking* is the best way to remove stamps from envelopes.

Here's how:

1. Tear or cut off the envelope around the stamp, leaving a small margin.
2. With the stamp facing down, place into a pan of warm, not hot, water. After a few minutes (self-adhesive gum may take longer), the stamp should sink to the bottom.
3. Wait a few more minutes for any remaining gum to dislodge from the stamp.
4. Lift the stamp out preferably using stamp tongs (a metal tool, like tweezers.) It is best to handle stamps with tongs because the oil from your skin can damage stamps.

5. Place the stamp between two paper towels and put a heavy object, such as a book, on top. This will keep the stamp from curling as it dries. Leave overnight.

6. If the stamp is a newer one with “invisible” gum, dry it face down with nothing touching the back and flatten it later if necessary. Otherwise, it may stick to the paper towel when drying.

How should I organize my stamps?

However you want to of course—it's your collection. But be sure to protect them so they don't get damaged or lost. You can attach your stamps to loose-leaf paper and put them in a three-ring binder. Or, the best way is to store them in a stamp album which you can buy in stores.

How do I put a stamp in the album?

It's best to use a stamp hinge—a small strip of thin plastic with gum on one side. Unlike tape or glue, hinges allow you to peel the stamp off the page without damaging it. Hinges come either folded or unfolded.

Here's how to use a folded hinge:

1. Moisten the short end of the hinge lightly. Press it to the back of the stamp, placing the fold about 1/8" from the top of the stamp.
2. Place the stamp in the album and press down to secure it.
3. Using your tongs, gently lift the corners of the stamp to make sure it's not stuck to the page.

Instead of a stamp hinge, you can insert the entire stamp into a stamp mount—a small, clear plastic sleeve. Mounts are more expensive than hinges, but they protect stamps from air, dirt and moisture.

Is there anything else I need?

Collectors use a variety of other materials and accessories. Transparent *glassine envelopes* protect stamps from grease and air. A *stamp catalog* is a reference book with illustrations and stamp values, such as *The Postal Service Guide to U.S. Stamps*. A *magnifying glass* is useful when examining stamps; *tongs* are used to pick up and move stamps. A *perforation gauge* measures perforations along the edges of stamps. *Watermark fluid* will enhance a watermark, a design or pattern that is pressed into some stamp paper during manufacturing.

How can I tell what a stamp is worth?

When figuring the value of a stamp, ask yourself two questions: "How rare is it?" and "What condition is it in?" Stamp catalog prices will give you an idea of how rare the stamp is. However, the stamp may sell at more or less than the catalog price, depending on its condition. Stamp dealers categorize stamps according to their condition. Always try to find stamps in the best possible condition. Hinge marks on mint stamps can reduce value, which is why stamp mounts are recommended for mint stamps.

How should I judge the condition of a stamp?

Stamp dealers put stamps into categories according to their condition. A stamp in (unused) mint condition is the same as when purchased from the Post Office. A used stamp is one that has been canceled.

To evaluate the condition of a stamp, first look at the front of it. Are the colors bright or faded? Is the stamp clean, dirty, or stained? Is it torn or creased? Torn stamps are not considered "collectible," but they can be used as space fillers until you get better ones. Is the stamp design centered on the paper, crooked or

off to one side? Centering can range from "superb" (perfectly centered on the stamp) to "good" (the design on at least one side is marred somewhat by the perfs). Anything less would be graded "fair" or "poor" and, like torn copies, should be saved only as space fillers. Centering varies widely on older stamps. An examination of the back of the stamp will reveal whether it has been carelessly treated and thus is less valuable. Are all of the perforations intact? Has the stamp been canceled? A stamp with a light cancellation is in better condition than one with heavy marks across it.

Where else can I find stamps?

Check the classified ads in philatelic newspapers and magazines at your local library. There is a listing of philatelic resources on page 19 of this publication where you increase your knowledge of collecting stamps. You can also check the listing of philatelic publishers in *The Postal Service Guide to U.S. Stamps*. These publishers will send you one free copy of their publication then you can decide if you'd like to subscribe. There are also a number of stamp-related sites on the internet.

What other stamp materials can I collect?

Postal stationery products are popular among philatelists. These have the stamp designs printed or embossed (printed with a raised design) directly on them.

Stamped Envelopes were first issued in 1853. More than 600 million of them are now printed each year.

Stamped Cards (or postal cards) were first issued in 1873. The first multicolored commemorative postal cards came out in 1956. Several different stamped cards are issued every year.

Aerogrammes (air letters) are designed to be letters and envelopes all in one. They are specially stamped, marked for folding and already gummed.

Other philatelic collectibles include:

Plate numbers (including *plate blocks*) appear on or adjacent to stamps. Found most often on sheet stamps, plate blocks are the stamps—usually a group of 4—that have the printing plate numbers in the adjoining selvage, or margin.

Booklet panes are panes of stamps affixed in, or as part of, a thin folder to form a booklet. With self-adhesive stamps, a newer convertible booklet format has been created so that the stamps, liner and booklet are all on one unit. Collectors of booklet panes usually save the entire pane or booklet.

Marginal blocks (including *copyright blocks*) feature marginal inscriptions other than plate numbers. The most common is the copyright block, which features the copyright symbol ©, copyright date, and U.S. Postal Service. All U.S. stamp designs since 1978 are copyrighted.

First Day of Issue Ceremony Programs are given to those who attend first day ceremonies. They contain a list of participants, information on the stamp subject, and the actual stamp attached and postmarked in a handsomely designed folder.

First Day Covers (FDCs) are envelopes bearing new stamps postmarked on the first day of sale. For each new issuance, the U.S. Postal Service generally selects one location, usually related to the stamp subject, as the place for the first day dedication ceremony and the first day postmark.

Are there any stamp groups I can join?

Yes! Stamp clubs are a great source for new stamps and stamp collecting advice. Ask your local postmaster or librarian about stamp clubs in your area and contact information including Internet sites.

How do I collect First Day Covers?

The fastest way to get a First Day Cover is to buy the stamp yourself (it will usually go on sale the day after the first day of issue), attach it to your own envelope (or cover),

and send it to the first day post office for cancellation. You can submit up to 50 envelopes, up to 30 days after the stamp's issue date.

Here's how:

1. Write your address in the lower right-hand corner of each first day envelope, at least 5/8" from the bottom. Leave plenty of room for the stamp(s) and cancellation. Use a peel-off label if you prefer.
2. Insert a piece of cardboard (about as thick as a postcard) into each envelope. You can tuck the flap in or seal the envelope.
3. Affix your stamp(s) to your first day envelope(s).

4. Put your first day envelope(s) inside another, larger envelope and mail it to "Customer-Affixed Envelopes" in care of the postmaster of the first day city. Your envelopes will be canceled and returned.

Or, you can purchase a plain envelope with the stamp(s) already affixed and canceled. These are now sold directly by mail order through the U.S. Postal Service.

Digital Color Postmark First Day Covers

Since 2005, some cancellations are now being created as beautiful miniature works of art specifically designed for each stamp. These collectibles can be purchased as sets for each year. Products can be ordered by calling 1 800 STAMP-24 or online at www.usps.com.

 2007-2008*

Continuing the tradition of international cooperation that began with the first IPY in 1882-1883, scientists from around the world will initiate a new era in polar research by participating in IPY 2007-2008. Working across many disciplines, they will conduct field observations, research, and analysis to build upon current knowledge and increase our understanding of the roles that both polar regions play in global processes.

Accessories

The tools used by stamp collectors, such as tongs, hinges, etc.

Aerogrammes

Air letters designed to be letters and envelopes all in one. They are specially-stamped and ready for folding.

Aerophilately

Stamp collecting that focuses on airmail stamps or postage.

Album

A book designed to hold stamps and covers.

Approvals

Stamps sent by a dealer to a collector for examination. Approvals must either be bought or returned to the dealer within a specified time.

Block

A group of unseparated stamps, at least two stamps high and two stamps wide.

Booklet Pane

A small sheet of stamps specially cut to be sold in booklets.

Bourse

A marketplace, such as a stamp exhibition, where stamps are bought, sold, or exchanged.

Cachet (ka-shay)

A stamp related design on an envelope.

Cancellation

A mark placed on a stamp by a postal authority to show that the stamp has been used.

Centering

The position of the design on a postage stamp. On perfectly centered stamps the design is exactly in the middle.

Cinderella

Any stamp-like label without an official postal value.

Classic

An early stamp issue.

Coils

Stamps issued in rolls (one stamp wide) for use in dispensers or vending machines.

Coil Stamps

Stamps that are produced in a long vertical or horizontal strip.

Commemoratives

Stamps that honor anniversaries, important people, special events, or aspects of national culture.

Compound Perforations

Different gauge perforations on different sides (normally adjacent) of a single stamp.

Condition

Condition is the most important characteristic in determining the value of a stamp. It refers to the state of a stamp regarding such details as centering, color and gum.

Cover

An envelope that has been sent through the mail.

Cracked Plate

A term used to describe stamps which show evidence that the plate from which they were printed was cracked.

Definitives

Regular issues of postage stamps, usually sold over long periods of time. They tend to be fairly small and printed in large quantities often more than once.

Denomination

The postage value appearing on a stamp.

Die Cut

Scoring of self-adhesive stamps that allows a stamp to be separated from the liner.

Directory Markings

Postal markings that indicate a failed delivery attempt, stating reasons such as "No Such Number" or "Address Unknown."

Double Transfer

The condition on a printing plate that shows evidence of a duplication of all or part of the design.

Duplicates

Extra copies of stamps that can be sold or traded. Duplicates should be examined carefully for color and perforation variations.

Entire

An intact piece of postal stationery, in contrast to a cut-out of the printed design.

Error

A stamp with something incorrect in its design or manufacture.

Face Value

The monetary value, or denomination, of a stamp.

Fake

A genuine stamp that has been altered in some way to make it more attractive to collectors. It may be repaired, reperfed, or regummed to resemble a more valuable variety.

First Day Cover (FDC)

An envelope or card bearing a stamp cancelled to show its issuance date and place.

First Day Ceremony Program

A program given to those who attend first day of issue stamp ceremonies. It contains the actual stamp affixed and postmarked, a list of participants and information on the stamp subject.

Foreign Entry

When original transfers are erased incompletely from a plate, they can appear with new transfers of a different design which are subsequently entered on the plate.

Franks

Written, hand-stamped, or imprinted markings on the face of a cover indicating that it is carried free of postage. Franking is usually limited to official government correspondence.

Freak

An abnormal variety of a stamp occurring because of paper fold, over-inking, perforation shift, etc., as opposed to a continually appearing variety or an error.

Grill

A pattern of small, square pyramids in parallel rows impressed or embossed on the stamp to break paper fibers, allowing cancellation ink to soak in and preventing washing and reuse.

Gum

The coating of glue on the back of a stamp.

Hinges

Small strips of gummed material used by some collectors to affix stamps to album pages.

Hologram

An image that appears to be three-dimensional when viewed from an angle. Holograms have appeared on some modern stamps and stationery.

Imperforate

Indicates stamps without perforations.

Laid Paper

When held to the light, the paper shows alternate light and dark crossed lines.

Line Pairs (LP)

Most coil stamp rolls prior to 1981 feature a line of ink (known as a “joint line”) printed between two stamps at various intervals, caused by the joining of two or more curved plates around the printing cylinder.

Liner

The backing paper for self-adhesive stamps.

Loupe

A magnifying glass used to examine details of stamps more closely.

On Paper

Stamps “on paper” are those that still have portions of the original envelope or wrapper attached.

Overprint

Additional printing on a stamp that was not part of the original design.

Packet

A presorted group of different stamps, a common and economical way to begin a stamp collection.

Pane

A full “sheet” of stamps as sold by a Post Office.

Par Avion

French for mail transported “by air.”

Pictorials

Stamps with a picture of some sort, other than portraits or static designs such as coats of arms.

Perforations

Lines of small holes or cuts between stamps that make them easy to separate.

Perforation Gauge

A tool used to measure perforations along the edges of stamps or the distance between peaks or ridges.

Philately

The collection and study of postage stamps and other postal materials.

Plate Block (PB)

(or Plate Number Block)

A block of stamps with the margin attached that bears the plate number used in printing that sheet.

Plate Number Coils (PNC)

For most coil stamp rolls beginning with #1891, a small plate number appears at varying intervals in the roll in the design of the stamp.

Postal Stationery

Envelopes, aerogrammes, stamped postal cards, and letter sheets with printed or embossed stamp designs.

Postal Cards

See “stamped postal cards.”

Postcards

Commercially-produced mailable cards without imprinted postage.

Postmark

A mark put on envelopes or other mailing pieces showing the date and location of mailing.

Precancels

Stamps cancelled by a proper authority prior to their use on mail.

Presort Stamp

A discounted stamp used by business mailers who presort their mail.

Prestige Booklet

A booklet commemorating a special topic and containing stamps, narrative, and images.

Reissue

An official reprinting of a stamp that was no longer being printed.

Reprint

A stamp printed from the original plate after the issue is no longer valid for postage. Official reprints are sometimes made for presentation purposes, official collections, etc., and are often distinguished in some way from the "real" ones.

Revenue Stamps

Stamps issued as proof of payment of certain taxes but not valid for postage.

Rouletting

The piercing of the paper between stamps to facilitate their separation, often giving the appearance of a series of dashes.

Scrambled Indicia®

A patented process that conceals encoded text or graphics within the visible design. These hidden images can only be viewed through a special lens, the Stamp Decoder™, available from the U.S. Postal Service.

Se-tenant

An attached pair, strip or block of stamps that differ in design, value or surcharge.

Self-Adhesive Stamp

A stamp with pressure sensitive adhesive.

Salvage

The paper around panes of stamps, sometimes called the margin.

Semipostal Stamp

A First-Class Mail stamp priced to include an additional charge earmarked for a specific purpose, e.g., breast cancer research.

Series

A number of individual stamps or sets of stamps having a common purpose or theme, issued over an extended period of time (generally a year or more), including all variations of design and/or denomination.

Set

A group of stamps with a common design or theme issued at one time for a common purpose or over a limited period of time (generally less than a year).

Souvenir Sheet

A small sheet of stamps with a commemorative inscription.

Special Issues

Stamps with a commemorative appearance that supplement definitives and meet specific needs. These include Christmas, Love, Holiday Celebrations, airmail, Express Mail, and Priority Mail stamps.

Speculative

A stamp or issue released primarily for sale to collectors, rather than to meet any legitimate postal need.

Stamp Decoder™

A device with a special lens that reveals hidden images on stamps. It is available from the U.S. Postal Service.

Stamped Postal Card

The current term for a mailable card with postage imprinted on it.

Stamped Envelope

A mailable envelope with postage embossed or imprinted on it.

Star Route

A mail route serviced by an outside contractor rather than a postal employee.

Strip

Three or more unseparated stamps in a row.

Surcharge

An overprint that changes the denomination of a stamp.

Sweatbox

A closed box with a grill over which stuck-together unused stamps are placed. A wet, sponge-like material under the grill creates humidity so the stamps can be separated without removing the gum.

Tagging

The marking of stamps with a phosphor or similar coating (which may be in lines, bars, letters, overall design area or entire stamp surface), done by many countries for use with automatic mail-handling equipment. When a stamp is issued both with and without this marking, catalogs will often note varieties as "tagged" or "untagged."

Tied On

Describes a stamp whose postmark touches the envelope.

Tongs

A tweezer-like tool with rounded or flattened tips used to handle stamps.

Topicals

A group of stamps with the same theme—space travel, for example.

Unhinged

A stamp without hinge marks.

Unused

The condition of a stamp that has no cancellation or other sign of use.

Used

The condition of a stamp that has been canceled.

Variety

A stamp that varies in some way from its standard or original form. Varieties can include missing colors or perforations, constant plate flaws, changes in ink or paper, differences in printing method or in format.

Watermark

A design sometimes pressed into stamp paper during its manufacture.

Water-Activated Gum

Water-soluble adhesives such as sugar-based starches on the back of an unused stamp.
