Section 3301 lists all classes of vessels that are subject to inspection and certification by the Coast Guard. This section represents one of the sought-after advantages of the bill to simplify access to the provisions of law governing the regulation of vessels. Under the present law, a vessel's inspection status must be determined by examining a table appearing at section 2.01-7A of title 46, Code of Federal Regulations that divides all vessels into more than 70 separate classes.

It is important to note that while the classes of vessels are now limited to ten, there is no prohibition against developing regulations to meet the special needs of various size vessels within any one category. For example, it is expected that the Coast Guard will continue the practice of establishing standards for freight vessels of not more than 100 gross tons and other standards for larger freight vessels.

It should also be noted that a particular vessel can, when engaged in various types of operations, be subject to varying inspection laws. For example, an offshore supply vessel could be classed as a small passenger vessel or a passenger vessel when it operates as a crew boat carrying individuals other than those defined in section 2101(21). If the offshore supply vessel is 500 gross tons and over it would then be subject to inspection as a seagoing motor vessel, a freight vessel, or a passenger vessel.

Section 3302 does three things. It makes clear that a vessel included in one of the ten categories of vessels

subject to inspection is not necessarily excluded from another category of vessel that is subject to inspection. For example, a vessel inspected and certified as a small passenger vessel would, when carrying oil or hazardous materials in bulk as cargo or cargo residue, also have to be inspected as a tank vessel. It makes it clear that a vessel excluded by section 3302 from the requirements of inspection in any one of the ten categories is not necessarily excluded from inspection as a vessel in another category. This section also contains a number of exemptions for certain classes of vessels and for those vessels engaged in a specific trade that have been considered to be of a special circumstance.

OFFSHORE SUPPLY VESSELS; TRANSITION PERIOD FOR COMPLIANCE WITH VESSEL INSPECTION PROVISIONS

Pub. L. 98-89, §2(i), Aug. 26, 1983, 97 Stat. 599, provided that: “Each offshore supply vessel described in section 3302(g) of title 46 (as enacted by section 1 of this Act), that was registered with the Secretary of Transportation under section 4426a(7) of the Revised Statutes [former 46 U.S.C. 404-1(7)] but that has not been inspected by the Secretary shall be held to be in compliance with all applicable vessel inspection laws pending verification by actual inspection or until one year after the date of enactment of this Act [Aug. 26, 1983], whichever is earlier.”

§ 3303. Reciprocity for foreign vessels

Except as provided in chapter 37 and section 3505 of this title, a foreign vessel of a country having inspection laws and standards similar to those of the United States and that has an unexpired certificate of inspection issued by proper authority of its respective country, is subject to an inspection to ensure that the condition of the vessel is as stated in its current certificate of inspection. A foreign country is considered to have inspection laws and standards similar to those of the United States when it is a party to an International Convention for Safety of Life at Sea to which the United States Government is currently a party. A foreign certificate of inspection may be accepted as evidence of lawful inspection only when presented by a vessel of a country that has by its laws accorded to vessels of the United States visiting that country the same privileges accorded to vessels of that country visiting the United States.

HISTORICAL AND REVISION NOTES

Revised section	Source section (U.S. Code)
3303	46:362(a) 46:390c 46:391a(3)

Section 3303 acknowledges the international concept of comity with respect to recognizing inspection laws

and standards for foreign flag vessels that are similar to those of the United States. If a foreign nation is signatory to the International Convention for Safety of Life at Sea, it is presumed to have similar standards. However, reciprocity requirements for foreign flag tank vessels are included in chapter 37. Subsection (b) provides for a mutual waiver of fees for the inspection of foreign vessels carrying passengers from the United States.

AMENDMENTS

2004—Pub. L. 108-293 inserted “and section 3505” after “chapter 37”.

1996—Pub. L. 104-324 struck out subsec. (a) designation and subsec. (b) which read as follows: “The Secretary shall collect and pay to the Treasury the same fees for the inspection of foreign vessels carrying passengers from the United States that a foreign country charges vessels of the United States trading to the ports of that country. The Secretary may waive at any time the collection of the fees on notice of the proper authorities of any country concerned that the collection of fees for the inspection of vessels of the United States has been discontinued.”

1992—Subsec. (a). Pub. L. 102-587, in first sentence, struck out “only” after “is subject” and substituted “the condition of the vessel is” for “the condition of the vessel’s propulsion equipment and lifesaving equipment are”.

(c) A privilege authorized by this section applies to a vessel of a foreign country that affords a similar privilege to vessels of the United States in trades not restricted to vessels under its own flag.

(d) A fishing, fish processing, or fish tender vessel that transports not more than 12 individuals employed in the fishing industry in addition to the crew is not subject to inspection as a passenger or small passenger vessel.

(e) The Secretary may by regulation allow individuals in addition to the crew to be transported in an emergency or under section 2304 of this title.
