

The Food Stamp provisions in S. 1150 build on our success last year in restoring Supplemental Security Income and Medicaid benefits to 420,000 legal immigrants who lost such assistance under the 1996 Act. S. 1150 also restores benefits to Hmong immigrants from Laos who aided our country during the Vietnam War and extends the period during which refugees and asylees may qualify for Food Stamps while they await citizenship. We will continue to work to ensure that those who honor our laws and contribute to our society can be free from hunger.

Similarly, when I signed the Federal Agriculture Improvement and Reform Act of 1996 (1996 Farm Act) that radically changed the decades-old Federal programs to balance crop supply and demand, I made a commitment to work with the Congress to strengthen the farm safety net. With the bill I am signing today, our Nation's farmers know that crop insurance will be there for them if disaster strikes, with the program fully funded for the next 5 years.

To improve farming productivity and efficiency, we must increase our investment in agricultural research. In the 1996 Farm Act deliberations, the Congress believed the agricultural research title to be so important that work on it was postponed so it could receive the time and consideration that it deserved. The research provisions in S. 1150 were worth waiting for, and I commend the Congress for its work.

The Initiative for Future Agriculture and Food Systems in S. 1150 will channel an additional \$120 million a year over the next 5 years to vital investments in food and agriculture genome research, food safety and technology, human nutrition, and agricultural biotechnology. These investments will lead to advances in new production systems for crops and livestock. This will help farmers and agricultural processors produce an abundant supply of safe food, with less impact on the environment, and meet the challenge of new, more virulent pest and disease outbreaks. In addition, the bill reforms the working arrangements between the Secretary of Agriculture and the universities that carry out important agricultural research. These changes will encourage and enable universities to take on larger-scale challenges

and enhance their integration of research, education, and extension functions while improving the accountability and management of their programs.

Rural communities cannot rely on agriculture alone to sustain their economy and quality of life. That is why, throughout my Administration, I have strongly supported increasing the investments in rural development, and pushed to find innovative solutions to unique local needs. We worked hard with the Congress in the 1996 Farm Act to create the Fund for Rural America, which provided funds for rural development and innovative agricultural research. I am pleased that S. 1150 provides \$300 million for the Fund and extends it funding through FY 2003.

While signing S. 1150, I am concerned that some in the Congress are already threatening to block significant portions of its funds from being spent in FY 1999. Appropriation actions in the House and Senate would deny any funds from being used for the Fund for Rural America, and the House bill would also block any research funding in this bill from going forward next year. I strongly object to such ill-advised cuts in these vital programs. I call on the Congress to provide the needed funds for these important activities.

NOTE: S. 1150, approved June 23, was assigned Public Law No. 105-185.

**Statement on Signing the U.S.
Holocaust Assets Commission
Act of 1998**

June 23, 1998

Today I am pleased to sign into law S. 1900, the "U.S. Holocaust Assets Commission Act of 1998." This legislation is the result of the bipartisan support of the Congress, and the efforts of many people inside and outside of government who have worked to achieve its passage. It represents an important step in advancing the United States Government's efforts to bring justice to Holocaust victims, survivors, and their heirs.

The bill establishes the "Presidential Advisory Commission on Holocaust Assets in the United States." The Commission will focus on two key tasks: first, it will conduct original research on the collection and disposition of Holocaust-era assets that came under the control of the United States Government after Hitler came to power in 1933 (assets including gold, gems, bank accounts, financial instruments, insurance policies, and art works); and second, it will review research already conducted by public and private entities. The Commission will prepare a final report, summarizing its findings and making recommendations to me, which will be completed by December 31, 1999.

As we finish the business of the 20th century, we must examine difficult aspects of our history in order to build a better world for our children in the next millennium. Establishing a Commission to study these issues sends a strong message, both at home and abroad, that the United States Government is determined to acknowledge and address the fate of Holocaust assets domestically.

**Statement on the Nomination of
Kenneth Prewitt To Be Director of
the Bureau of the Census**

June 23, 1998

A fair and accurate census is a fundamental part of representative democracy and good government. To ensure that we conduct a sound and successful census in the Year 2000, I am pleased to nominate Dr. Kenneth Prewitt to be the next Director of the United States Census Bureau.

The decennial census is the foundation for our most important public values. It is the means by which everyone in this country is counted. It is the basis for providing equality under the law. And it is the single most important source of information about the American people.

By using the census, the Federal Government is able to designate funding for and evaluate programs across the Federal Government, in every State and every locality. It is the instrument that Congress and the executive branch use to properly allocate the more than 180 billion dollars in Federal funds every year for many programs like Head Start, programs for older Americans, the disabled, and for transportation. Conducting an accurate census truly affects every person in this country, and quality of Census 2000 will have ramifications for decades to come.

To ensure fair and accurate data, we support the plan developed by the experts at the Census Bureau which was based upon recommendations by the National Academy of Sciences. This plan developed at the explicit direction of Congress and endorsed by virtually all of the experts will enable the Census Bureau to conduct the most accurate and cost-effective census in our history. It is a plan that will correct the inaccuracies in the former census which systematically undercounted children, minorities, and rural Americans. This collaboration between Government and the Nation's scientific community will enable Census 2000 to carry out its proud mission of protecting equality before the law, one person-one vote, and sound government.

Dr. Prewitt, one of the Nation's most distinguished social scientists and experienced executives, is the ideal person to lead the Census Bureau in this effort. He currently serves as the president of the Social Science Research Council. In the past, he has been senior vice president of the Rockefeller Foundation, the director of the University of Chicago's National Opinion Research Corporation, chairman of the Political Science Department at the University of Chicago, and vice president of the American Academy of Arts and Sciences. He has also served on the boards of trustees of Washington University, Southern Methodist University, the Center for Advanced Study in the Behavioral Sciences, NORC, and the German American Academic Council.

Dr. Prewitt is a person of impeccable credentials and proven scientific integrity. I urge
