

112TH CONGRESS
1ST SESSION

H. R. 2347

To authorize the Secretary of the Interior to convey a railroad right of way between North Pole, Alaska, and Delta Junction, Alaska, to the Alaska Railroad Corporation.

IN THE HOUSE OF REPRESENTATIVES

JUNE 23, 2011

Mr. YOUNG of Alaska introduced the following bill; which was referred to the Committee on Natural Resources

A BILL

To authorize the Secretary of the Interior to convey a railroad right of way between North Pole, Alaska, and Delta Junction, Alaska, to the Alaska Railroad Corporation.

1 *Be it enacted by the Senate and House of Representa-*
2 *tives of the United States of America in Congress assembled,*

3 **SECTION 1. SHORT TITLE.**

4 This Act may be cited as the “Alaska Railroad Right
5 of Way Extension Act of 2011”.

6 **SEC. 2. FINDINGS.**

7 Congress finds the following:

8 (1) Freight trains provide an efficient, reliable,
9 all-weather transportation system that produce less

1 greenhouse gas emissions and are 70 percent more
2 fuel efficient than trucks for large loads. The Amer-
3 ican Association of Railroads reports that a freight
4 train can carry 457 ton-miles per gallon of diesel
5 fuel and are substantially more fuel efficient than
6 other forms of surface transportation.

7 (2) The Alaska Railroad Act (38 Stat. 305),
8 which was signed into law on March 12, 1914, au-
9 thorized the construction of a 1,000-mile rail line in
10 the Territory of Alaska “to best aid in the develop-
11 ment of the agricultural and mineral or other re-
12 sources of Alaska . . . and so as to provide trans-
13 portation of coal for the Army and Navy, transpor-
14 tation of troops, arms, munitions of war, the mails,
15 and for other governmental and public purposes”.

16 (3) The Alaska Railroad, which was constructed
17 between 1915 and 1923, consists of only 467 miles
18 of main line tracks. An additional 533 miles of
19 tracks could be constructed under the original au-
20 thorization.

21 (4) An 80-mile rail extension between North
22 Pole and Delta Junction—

23 (A) would greatly benefit the Department
24 of Defense, which has large training areas

1 south of the Tanana River between Fairbanks
2 and Delta Junction;

3 (B) would provide access to the Joint Pa-
4 cific Area Range Complex, which is currently
5 limited to ice roads during winter;

6 (C) would enable the United States Army
7 to mobilize military units to a staging area im-
8 mediately south of the Tanana River;

9 (D) would enable the United States Air
10 Force to move large freight to the Fort Greely
11 missile intercept complete located near Delta
12 Junction; and

13 (E) would facilitate the economical move-
14 ment of commercial freight and passenger
15 transportation, including tourism.
