

112TH CONGRESS
1ST SESSION

S. 704

To provide for duty-free treatment of certain recreational performance outerwear, and for other purposes.

IN THE SENATE OF THE UNITED STATES

MARCH 31, 2011

Mr. WYDEN (for himself, Mr. CRAPO, Mr. ENZI, Ms. CANTWELL, Mr. SCHUMER, and Mr. MERKLEY) introduced the following bill; which was read twice and referred to the Committee on Finance

A BILL

To provide for duty-free treatment of certain recreational performance outerwear, and for other purposes.

1 *Be it enacted by the Senate and House of Representa-*
2 *tives of the United States of America in Congress assembled,*

3 **SECTION 1. SHORT TITLE.**

4 This Act may be cited as the “United States Optimal
5 Use of Trade to Develop Outerwear and Outdoor Recre-
6 ation Act” or the “U.S. OUTDOOR Act”.

7 **SEC. 2. FINDINGS.**

8 Congress finds the following:

1 (1) The outdoor industry contributes
2 \$730,000,000,000 to the United States economy an-
3 nually.

4 (2) Outdoor activities are vitally important to
5 the health and well-being of the people of the United
6 States.

7 (3) Duty rates on recreational performance ap-
8 parel are among the highest duty rates imposed by
9 the United States Government, with duties on some
10 recreational performance apparel as high as 28.2
11 percent.

12 (4) The duties currently imposed by the United
13 States on recreational performance apparel were set
14 in an era during which high rates of duty were in-
15 tended to protect the production of other apparel in
16 the United States, and before the technologies and
17 innovations that create today's recreational perform-
18 ance apparel industry were developed.

19 (5) In July 2007, the United States Inter-
20 national Trade Commission confirmed in USITC
21 Publication 3937 that recreational performance ap-
22 parel produced in the United States makes up less
23 than 1 percent of the total recreational performance
24 apparel market and therefore concluded that there is

1 no commercially viable production of recreational
2 performance apparel in the United States.

3 (6) On November 1, 2005, the Committee for
4 the Implementation of Textile Agreements confirmed
5 in the Federal Register that imports of certain rec-
6 reational performance apparel do not contribute to
7 domestic market disruption or adversely affect
8 United States textile and apparel producers (70 Fed.
9 Reg. 65889).

10 (7) The elimination of duties on the importation
11 of certain recreational performance apparel would
12 provide an economic benefit to United States con-
13 sumers of outdoor products and would promote in-
14 creased participation in healthy and active lifestyles.

15 **SEC. 3. KNIT APPAREL AND ACCESSORIES.**

16 (a) DEFINITIONS.—The Additional U.S. Note to
17 Chapter 61 of the Harmonized Tariff Schedule of the
18 United States is amended—

19 (1) in the heading, by striking “Additional U.S.
20 Note” and inserting “Additional U.S. Notes”; and

21 (2) by adding at the end the following new
22 notes:

23 “2.(a) For purposes of this chapter, the term ‘rec-
24 reational performance outerwear’ means trousers (includ-
25 ing, but not limited to, paddling pants, ski or snowboard

1 pants, and ski or snowboard pants intended for sale as
2 parts of ski-suits), coveralls and bib overalls, and jackets
3 (including, but not limited to, full zip jackets, paddling
4 jackets, ski jackets, and ski jackets intended for sale as
5 parts of ski-suits), windbreakers, and similar articles (in-
6 cluding padded, sleeveless jackets) composed of knit fab-
7 rics of cotton, wool, hemp, bamboo, silk, or manmade
8 fiber, or a combination of such fibers, that are either
9 water-resistant or visibly coated, or both, with critically
10 sealed seams, and with 5 or more of the following features:

11 “(i) Insulation for cold weather protection.

12 “(ii) Pockets, at least one of which has a
13 zippered, hook and loop, or other type of closure.

14 “(iii) Elastic, drawcord, or other means of
15 tightening around the waist or leg hems, including
16 hidden leg sleeves with a means of tightening at the
17 ankle for trousers and tightening around the waist
18 or bottom hem for jackets.

19 “(iv) Venting, not including grommet(s).

20 “(v) Articulated elbows or knees.

21 “(vi) Reinforcement in one of the following
22 areas: the elbows, shoulders, seat, knees, ankles, or
23 cuffs.

24 “(vii) Weatherproof closure at the waist or
25 front.

1 “(viii) Multi-adjustable hood or adjustable col-
2 lar.

3 “(ix) Adjustable powder skirt, inner protective
4 skirt, or adjustable inner protective cuff at sleeve
5 hem.

6 “(x) Construction at the arm gusset that uti-
7 lizes fabric, design, or patterning to allow radial arm
8 movement.

9 “(xi) Odor control technology.

10 The term ‘recreational performance outerwear’ does not
11 include occupational outerwear or garments with an outer
12 surface of looped pile.

13 “(b) For purposes of this Note, the following terms
14 have the following meanings:

15 “(i) The term ‘water-resistant’ means that a
16 garment must have a water resistance (see ASTM
17 designations D 3779–81 and D 7017) such that,
18 under a head pressure of 600 millimeters, not more
19 than 1.0 gram of water penetrates after two minutes
20 when tested in accordance with the current version
21 of AATCC Test Method 35. The water resistance of
22 the garment is the result of a rubber or plastics ap-
23 plication to the outer shell, lining, or inner lining.

24 “(ii) The term ‘visibly coated’ refers to fabric
25 that is impregnated, coated, covered, or laminated

1 with plastics, such as fabrics described in Note 2 to
2 chapter 59.

3 “(iii) The term ‘sealed seams’ means seams
4 that have been covered by means of taping, gluing,
5 bonding, cementing, fusing, welding, or a similar
6 process so that water cannot pass through the seams
7 when tested in accordance with the current version
8 of AATCC Test Method 35.

9 “(iv) The term ‘critically sealed seams’
10 means—

11 “(A) for jackets, sealed seams that are
12 sealed at the front and back yokes, or at the
13 shoulders, arm holes, or both, where applicable;
14 and

15 “(B) for trousers, sealed seams that are
16 sealed at the front (up to the zipper or other
17 means of closure) and back rise.

18 “(v) The term ‘insulation for cold weather pro-
19 tection’ means insulation with either synthetic fill,
20 down, a laminated thermal backing, or other lining
21 for thermal protection from cold weather.

22 “(vi) The term ‘venting’ refers to closeable or
23 permanent constructed openings in a garment (ex-
24 cluding front, primary zipper closures and grom-
25 met(s)) to allow increased expulsion of built-up heat

1 during outdoor activities. In a jacket, such openings
2 are often positioned on the underarm seam of a gar-
3 ment but may also be placed along other seams in
4 the front or back of a garment. In trousers, such
5 openings are often positioned on the inner or outer
6 leg seams of a garment but may also be placed along
7 other seams in the front or back of a garment.

8 “(vii) The term ‘articulated elbows or knees’ re-
9 fers to the construction of a sleeve (or pant leg) to
10 allow improved mobility at the elbow (or knee)
11 through the use of extra seams, darts, gussets, or
12 other means.

13 “(viii) The term ‘reinforcement’ refers to the
14 use of a double layer of fabric or section(s) of fabric
15 that is abrasion-resistant or otherwise more durable
16 than the face fabric of the garment.

17 “(ix) The term ‘weatherproof closure’ means a
18 closure (including, but not limited to, laminated or
19 coated zippers, storm flaps, or other weatherproof
20 construction) that has been reinforced or engineered
21 in a manner to reduce the penetration or absorption
22 of moisture or air through an opening in the gar-
23 ment.

24 “(x) The term ‘multi-adjustable hood or adjust-
25 able collar’ means a draw cord, adjustment tab, or

1 elastic incorporated into the hood or collar construc-
2 tion to allow volume adjustments around a helmet,
3 the crown of the head, neck, or face.

4 “(xi) The terms ‘adjustable powder skirt’ and
5 ‘inner protective skirt’ refer to a partial lower inner
6 lining with means of tightening around the waist for
7 additional protection from the elements.

8 “(xii) The term ‘arm gusset’ means construc-
9 tion at the arm of a gusset that utilizes an extra
10 fabric piece in the under arm usually diamond- or
11 triangular-shaped, design, or pattern to allow radial
12 arm movement.

13 “(xiii) The term ‘radial arm movement’ refers
14 to unrestricted, 180-degree range of motion for the
15 arm while wearing performance outerwear.

16 “(xiv) The term ‘odor control technology’ means
17 an additive in a fabric or garment capable of adsorb-
18 ing, absorbing, or reacting with human odors, or ef-
19 fective in reducing odor-causing bacteria, including
20 but not limited to activated carbon, silver, copper, or
21 any combination thereof.

22 “(xv) The term ‘occupational outerwear’ means
23 outerwear garments, including uniforms, designed or
24 marketed for use in the workplace or at a worksite
25 to provide durable protection from cold or inclement

1 weather and/or workplace hazards, such as fire, elec-
 2 trical, abrasion, or chemical hazards, or impacts,
 3 cuts, punctures, or similar hazards.

4 “3. For purposes of this chapter, the importer of
 5 record shall specify upon entry whether garments claimed
 6 as recreational performance outerwear have an outer sur-
 7 face that is water-resistant, visibly coated, or a combina-
 8 tion thereof, and shall further enumerate the specific fea-
 9 tures that make the garments eligible to be classified as
 10 recreational performance outerwear.”.

3 (a) NOTES.—The Additional U.S. Notes to chapter
4 62 of the Harmonized Tariff Schedule of the United
5 States are amended—

6 (1) in Additional U.S. Note 2, by striking “For
7 purposes of subheadings” and all that follows
8 through “6211.20.15” and inserting “For purposes
9 of this chapter”; and

10 (2) by adding at the end the following new
11 notes:

12 “3.(a) For purposes of this chapter, the term ‘rec-
13 reational performance outerwear’ means trousers (includ-
14 ing, but not limited to, paddling pants, ski or snowboard
15 pants, and ski or snowboard pants intended for sale as
16 parts of ski-suits), coveralls and bib overalls, and jackets
17 (including, but not limited to, full zip jackets, paddling
18 jackets, ski jackets, and ski jackets intended for sale as
19 parts of ski-suits), windbreakers, and similar articles (in-

1 cluding padded, sleeveless jackets), the outer surface of
2 which is composed of non-knit, non-crocheted fabrics of
3 cotton, wool, hemp, bamboo, silk, or manmade fiber, or
4 a combination of such fibers, that are water-resistant, visi-
5 bly coated, or both, with critically sealed seams, and with
6 5 or more of the following options:

7 “(i) Insulation for cold weather protection.

8 “(ii) Pockets, at least one of which has a
9 zippered, hook and loop, or other type of closure.

10 “(iii) Elastic, drawcord, or other means of
11 tightening around the waist or leg hems, including
12 hidden leg sleeves with a means of tightening at the
13 ankle for trousers and tightening around the waist
14 or bottom hem for jackets.

15 “(iv) Venting, not including grommet(s).

16 “(v) Articulated elbows or knees.

17 “(vi) Reinforcement in one of the following
18 areas: the elbows, shoulders, seat, knees, ankles, or
19 cuffs.

20 “(vii) Weatherproof closure at the waist or
21 front.

22 “(viii) Multi-adjustable hood or adjustable col-
23 lar.

1 “(ix) Adjustable powder skirt, inner protective
2 skirt, or adjustable inner protective cuff at sleeve
3 hem.

4 “(x) Construction at the arm gusset that uti-
5 lizes fabric, design, or patterning to allow radial arm
6 movement.

7 “(xi) Odor control technology.

8 The term ‘recreational performance outerwear’ does not
9 include occupational outerwear.

10 “(b) For purposes of this Note, the following terms
11 have the following meanings:

12 “(i) The term ‘water-resistant’ means that a
13 garment must have a water resistance (see ASTM
14 designations D 3779–81 and D 7017) such that,
15 under a head pressure of 600 millimeters, not more
16 than 1.0 gram of water penetrates after two minutes
17 when tested in accordance with the current version
18 of AATCC Test Method 35. The water resistance of
19 the garment is the result of a rubber or plastics ap-
20 plication to the outer shell, lining, or inner lining.

21 “(ii) The term ‘visibly coated’ refers to fabric
22 that is impregnated, coated, covered, or laminated
23 with plastics, such as fabrics described in Note 2 to
24 chapter 59.

1 “(iii) The term ‘sealed seams’ means seams
2 that have been covered by means of taping, gluing,
3 bonding, cementing, fusing, welding, or a similar
4 process so that water cannot pass through the seams
5 when tested in accordance with the current version
6 of AATCC Test Method 35.

7 “(iv) The term ‘critically sealed seams’ means
8 seams’ that are sealed—

9 “(A) for jackets, at the front and back
10 yokes, or at the shoulders, arm holes, or both,
11 where applicable; and

12 “(B) for trousers, at the front (up to the
13 zipper or other means of closure) and back rise.

14 “(v) The term ‘insulation for cold weather pro-
15 tection’ means insulation with either synthetic fill,
16 down, a laminated thermal backing, or other lining
17 for thermal protection from cold weather.

18 “(vi) The term ‘venting’ refers to closeable or
19 permanent constructed openings in a garment (ex-
20 cluding front, primary zipper closures and grom-
21 met(s)) to allow increased expulsion of built-up heat
22 during outdoor activities. In a jacket, such openings
23 are often positioned on the underarm seam of a gar-
24 ment but may also be placed along other seams in
25 the front or back of a garment. In trousers, such

1 openings are often positioned on the inner or outer
2 leg seams of a garment but may also be placed along
3 other seams in the front or back of a garment.

4 “(vii) The term ‘articulated elbows or knees’ re-
5 fers to the construction of a sleeve (or pant leg) to
6 allow improved mobility at the elbow (or knee)
7 through the use of extra seams, darts, gussets, or
8 other means.

9 “(viii) The term ‘reinforcement’ refers to the
10 use of a double layer of fabric or section(s) of fabric
11 that is abrasion-resistant or otherwise more durable
12 than the face fabric of the garment.

13 “(ix) The term ‘weatherproof closure’ means a
14 closure (including, but not limited to, laminated or
15 coated zippers, storm flaps, or other weatherproof
16 construction) that has been reinforced or engineered
17 in a manner to reduce the penetration or absorption
18 of moisture or air through an opening in the gar-
19 ment.

20 “(x) The term ‘multi-adjustable hood or adjust-
21 able collar’ means a draw cord, adjustment tab, or
22 elastic incorporated into the hood or collar construc-
23 tion to allow volume adjustments around a helmet,
24 the crown of the head, neck, or face.

1 “(xi) The terms ‘adjustable powder skirt’ and
2 ‘inner protective skirt’ refer to a partial lower inner
3 lining with means of tightening around the waist for
4 additional protection from the elements.

5 “(xii) The term ‘arm gusset’ means construc-
6 tion at the arm of a gusset that utilizes an extra
7 fabric piece in the under arm usually diamond- or
8 triangular-shaped, design, or pattern to allow radial
9 arm movement.

10 “(xiii) The term ‘radial arm movement’ refers
11 to unrestricted, 180-degree range of motion for the
12 arm while wearing performance outerwear.

13 “(xiv) The term ‘odor control technology’ means
14 an additive in a fabric or garment capable of adsorb-
15 ing, absorbing, or reacting with human odors, or ef-
16 fective in reducing odor-causing bacteria, including
17 but not limited to activated carbon, silver, copper, or
18 any combination thereof.

19 “(xv) The term ‘occupational outerwear’ means
20 outerwear garments, including uniforms, designed or
21 marketed for use in the workplace or at a worksite
22 to provide durable protection from cold or inclement
23 weather and/or workplace hazards, such as fire, elec-
24 trical, abrasion, or chemical hazards, or impacts,
25 cuts, punctures, or similar hazards.

1 “4. For purposes of this chapter, the importer of
 2 record shall specify upon entry whether garments claimed
 3 as ‘recreational performance outerwear’ have an outer sur-
 4 face that is water-resistant, visibly coated, or a combina-
 5 tion thereof, and shall further enumerate the specific fea-
 6 tures that make the garments eligible to be classified as
 7 recreational performance outerwear.”.
