4 **SEC. 2. FINDINGS.**

5 Congress makes the following findings:

6 (1) According to the Centers for Disease Con-
7 trol, about 34 percent of adults aged 65 and over
8 were obese in the period of 2009 through 2012, rep-
9 resenting almost 15 million people.

10 (2) Obesity increases the risk for chronic dis-
11 eases and conditions, including high blood pressure,
12 heart disease, certain cancers, arthritis, mental ill-
13 ness, lipid disorders, sleep apnea, and type 2 diabe-
14 tes.

15 (3) More than half of Medicare beneficiaries are
16 treated for 5 or more chronic conditions per year.
17 The rate of obesity among Medicare patients dou-
18 bled from 1987 to 2002, and Medicare spending on
19 obese individuals during that time more than dou-
20 bled.

21 (4) Men and women with obesity at age 65 have
22 decreased life expectancy of 1.6 years for men and
23 1.4 years for women.

24 (5) The direct and indirect cost of obesity is
25 more than \$450 billion annually.

1 (6) On average, a Medicare beneficiary with
2 obesity costs \$1,964 more than a normal-weight ben-
3 eficiary.

4 (7) The prevalence of obesity among older indi-
5 viduals in the United States is growing at a linear
6 rate and, if nothing changes, nearly half of the el-
