

PERSONAL EXPLANATION

HON. MAJOR R. OWENS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 7, 2000

Mr. OWENS. Mr. Speaker, yesterday I was unavoidably absent on a matter of critical importance and missed the following votes:

On H.R. 4884 (rollcall No. 451), to redesignate the facility of the United States Postal Service located at 200 West 2nd Street in Royal Oak, Michigan as the "William S. Broomfield Post Office Building," introduced by the gentleman from Michigan, Mr. KNOLLENBERG, I would have voted "yea."

On H.R. 4484 (roll No. 452), to designate the facility of the United States Postal Service located at 500 North Washington Street in Rockville, Maryland, as the "Everett Alvarez, Jr. Post Office Building," introduced by the gentlelady from Maryland, Mrs. MORELLA, I would have voted "yea."

On H.R. 4448 (roll No. 453), to designate the facility of the United States Postal Service located at 3500 Dolfield Avenue in Baltimore, Maryland, as the "Judge Robert Bernard Watts, Sr. Post Office Building," introduced by the gentleman from Maryland, Mr. CUMMINGS, I would have voted "yea."

PERSONAL EXPLANATION

HON. SUE WILKINS MYRICK

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 7, 2000

Mrs. MYRICK. Mr. Speaker, due to other commitments, I was unable to participate in the following votes. If I had been present, I would have voted as follows: On July 27, 2000, Rollcall vote No. 450, on the Social Security Benefits Tax Relief, I would have voted "yea." Rollcall vote No. 449, on Agreeing to the Pomeroy Amendment, I would have voted "nay."

AMERICANS WITH DISABILITIES ACT

HON. WILLIAM D. DELAHUNT

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 7, 2000

Mr. DELAHUNT. Mr. Speaker, last month marked the 10th anniversary of the signing of the Americans with Disabilities Act. The federal government commemorated this historic milestone through many activities—from President Clinton announcing new proposals to make it easier for Social Security disability beneficiaries to contribute to the workforce without losing their benefits, to the House approving the Developmental Disabilities Assistance and Bill of Rights Act of 2000, to the opening of a new exhibit that examines the history of the disability rights movement at the Smithsonian's National Museum of American History.

These activities are a long overdue symbol of federal commitment to individuals with disabilities. And to build on this momentum I would like to submit the eloquent testimony of

Mr. Elmer Bartels, Commissioner of the Massachusetts Rehabilitation Commission, regarding employment opportunities for individuals with disabilities.

[From the Cape Cod Times, June 4, 2000]

EMPLOYERS WITH LABOR SHORTAGES SHOULD LOOK TO VOCATIONAL REHABILITATION

(By Elmer C. Bartels)

It is a fact that today more individuals with disabilities are in the workplace earning real wages than ever before. Certainly the booming economy has a lot to do with it, but there is much more to the story than just that.

The unsung hero in the struggle to enhance employment opportunities for people with disabilities is the Federal/State Public Vocational Rehabilitation Program, authorized and funded under the Rehabilitation Act of 1973.

For nearly 80 years, and against great odds and prejudices, the State Public Vocational Rehabilitation Program has helped people with disabilities prepare to enter the workplace. Every state has a vocational rehabilitation agency whose sole purpose is to assist people with disabilities obtain the skills, training and confidence necessary to enable them to take their rightful place in the economy.

However, until the passage of Sec. 504 of the Rehabilitation Act in 1975 and later the passage of the Americans with Disabilities Act, opportunities in the workplace were limited and often resulted in placement in sheltered workshops.

MAINSTREAM OPPORTUNITIES

However, with advances in technology and the shortage of qualified workers, new mainstream work opportunities are becoming more available for persons with disabilities.

When the Work Incentives Improvement Act (WIIA) was signed into law on Dec. 17, another impediment was removed in addressing the nation's efforts to encourage people with severe disabilities to go to work.

Nationally, there are, according to the General Accounting Office, about 2.5 million people with disabilities receiving Social Security benefits under both Supplemental Security Income (SSI) and Social Security Disability Insurance (SSDI) who could possibly benefit from WIIA. (This population represents about 27 percent of the total number of individuals who are eligible to access the Public Vocational Rehabilitation Program.)

WIIA's assurance of the continued availability of health insurance, under both Medicaid and Medicare, for SSI and SSDI recipients, will remove a formidable barrier to their employment. Public vocational rehabilitation counselors assess the skills and interests of people with disabilities, help them develop individualized plans for employment, and purchase or arrange for the services or training they need to become qualified for jobs.

225,000 PEOPLE HELPED

This program can provide any reasonable and necessary services to help individuals with disabilities get ready for real work. Last year, the Public Vocational Rehabilitation Program helped 225,000 people with disabilities across America enter the work force.

In Massachusetts, the Public Vocational Rehabilitation Program, through the Massachusetts Rehabilitation Commission, helped 4,800 individuals with disabilities go to work in 1999.

Federal funding for vocational rehabilitation was \$2.4 billion in 1999. The states matched those federal funds with \$600 million of their own, resulting in a \$3 billion national Public Vocational Rehabilitation Pro-

gram. The distribution formula of federal funds to the states is based upon the population and per capita income of each state.

The \$3 billion spent nationally on vocational rehabilitation services produces \$2.6 billion in employee earnings and \$850 million in state and federal revenues during a single year of employment alone. This is an incredible return-on-investment in light of the fact that those earnings continue for years without the expenditure of additional vocational rehabilitation dollars.

A 5-TO-1 RETURN ON THE DOLLAR

The Social Security Administration reports that each dollar spent for the vocational rehabilitation of SSA recipients results in \$5 in savings to the Trust Fund and treasury. The 225,000 individuals with disabilities employed last year will continue to earn real wages and pay state and federal taxes far in excess of the investment made in their employment future by the Public Vocational Rehabilitation Program.

Despite the extraordinary success of the Public Vocational Rehabilitation Program, half of the states restrict the number of people with disabilities served due to a lack of funds. It is estimated that an additional \$600 million in federal monies, plus the state match of \$120 million, would eliminate waiting lists in every state and help another 54,000 people with disabilities go to work.

Additional public vocational rehabilitation services and the guarantee of medical coverage under the WIIA would significantly reduce the unacceptably high rate of unemployment among people with disabilities.

According to statistics compiled by the GAO, it is estimated that between 15 million and 20 million Americans have health-related work limitations. Each year the Public Vocational Rehabilitation Program serves 1.2 million people with disabilities who want to work.

HIGH UNEMPLOYMENT RATE

A recent Harris survey indicates that 71 percent of working-age Americans with disabilities are unemployed and of that number, 72 percent want to work.

However, 42 percent of working-age Americans with disabilities believe that they are too disabled to work. The highly qualified, professional vocational rehabilitation counselors of the Public Vocational Rehabilitation Program work with individuals with significant disabilities to help them recognize that it is possible for even the most significantly disabled individuals to increase their economic and personal independence through work.

The passage of WIIA and the guarantee of continued health insurance coverage for Social Security recipients makes work a realistic goal for many more people with significant disabilities.

A recently completed seven-year study by the Research Triangle Institute, confirmed once again the success of the Public Vocational Rehabilitation Program by showing that it is highly effective in placing people with disabilities into productive jobs. No other federal or state program has received this type of scrutiny and measured up to such a high level of successful outcomes.

INDEPENDENT LIVES

It proved once again that the federal/state effort to improve the lives of persons with disabilities by allowing them to live independent and productive lives is on the right track.

In particular, the study shows that:

Graduates of Public VR worked an average of 35 hours per week and earned an average of \$7.35 per hour;

37.5 percent of the graduates earned more than \$7 per hour;

78.4 percent of graduates work in professional, managerial, technical, clerical, sales or service jobs;

85 percent of graduates were working in the same or other job one year after graduation;

67.6 percent of graduates were satisfied or very satisfied with their jobs;

67.1 percent of graduates were satisfied or very satisfied the opportunity for advancement with their jobs;

61.5 percent of graduates were satisfied with fringe benefits with their jobs.

The number of hours worked by consumers, the wages they earned, and their satisfaction with jobs and working conditions are all strong endorsements of the efficacy of the Public Vocational Rehabilitation Program.

Clearly, the Rehabilitation Act, and the ADA have helped to create a societal expectation that people with disabilities can and should have the opportunity to work. Now, WIIA provides for the health care supports essential to individuals with disabilities who want to work. Adequate funding of the Public Vocational Rehabilitation Program will help thousands more people with disabilities obtain good jobs.

The administration and Congress will demonstrate fiscal responsibility and a wise investment in the human resources of our nation by adequately funding Public Vocational Rehabilitation in the federal year 2001.

The American economy needs workers, people with disabilities need work opportunities, and the federal treasury needs more taxpayers. The Public Vocational Rehabilitation Program pays for itself many times over in taxes and human potential realized.

BENEFITS OF VOCATIONAL REHABILITATION PROGRAMS

HON. JOHN F. TIERNEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 7, 2000

Mr. TIERNEY. Mr. Speaker, in recent years the passage of the Workforce Investment Act and the Ticket to Work and Work Incentives Improvement Act have meant a great deal to individuals with disabilities who are working to gain greater social and economic independence. In Massachusetts the Commissioner of the Massachusetts Rehabilitation Commission, Mr. Elmer C. Bartels, has carried this message across the Commonwealth. In order to bring his message of employment opportunity for people with disabilities to our national constituency, I submit his editorial, which was printed in the June 4, 2000 edition of the Cape Cod Times, for insertion into the CONGRESSIONAL RECORD.

EMPLOYERS WITH LABOR SHORTAGES SHOULD LOOK TO VOCATIONAL REHABILITATION

(By Elmer C. Bartels)

It is a fact that today more individuals with disabilities are in the workplace earning real wages than ever before. Certainly the booming economy has a lot to do with it, but there is much more to the story than just that.

The unsung hero in the struggle to enhance employment opportunities for people with disabilities is the Federal/State Public Vocational Rehabilitation Program, authorized and funded under the Rehabilitation Act of 1973.

For nearly 80 years, and against great odds and prejudices, the State Public Vocational

Rehabilitation Program has helped people with disabilities prepare to enter the workplace. Every state has a vocational rehabilitation agency whose sole purpose is to assist people with disabilities obtain the skills, training and confidence necessary to enable them to take their rightful place in the economy.

However, until the passage of Sec. 504 of the Rehabilitation Act in 1975 and later the passage of the Americans with Disabilities Act, opportunities in the workplace were limited and often resulted in placement in sheltered workshops.

MAINSTREAM OPPORTUNITIES
