

In fact, a provision of the bill as it was reported by the Science Committee would have required NIST to report to Congress within 18 months after enactment, evaluating the extent to which electronic authentication technology being used by federal agencies conforms to NIST standards. That provision of the Committee-reported bill has been deleted. Instead, NIST is only asked to report to Congress concerning progress federal agencies made and problems they encounter in implementing electronic authentication technologies. In addition, a new provision of the bill provides that a study on electronic authentication technologies to be completed by the National Research Council of the National Academy of Sciences may not recommend any single technology for use by government agencies.

Mr. Speaker, I think that the Science Committee has focused attention on an important issue, and I thank them for their hard work. I have no objection to suspending the rules and passing this legislation.

AMERICAN HOMEOWNERSHIP AND ECONOMIC OPPORTUNITY ACT OF 2000

SPEECH OF

HON. PATSY T. MINK

OF HAWAII

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 24, 2000

Mrs. MINK of Hawaii. Mr. Speaker, I rise in support of S. 1452, especially subtitle B of title V. The title expands housing assistance for native Hawaiians by extending to them the same types of federal housing programs available to American Indians and Alaska natives. The provision authorizes appropriations for block grants for affordable housing activities and for loan guarantees for mortgages for owner- and renter-occupied housing. It authorizes technical assistance in cases where administrative capacity is lacking. The block grants would be provided by the Department of Housing and Urban Development to the Department of Hawaiian Home Lands of the government of the State of Hawaii.

I thank the Chairman of the Banking Committee [Mr. LEACH], the Ranking Member [Mr. LAFALCE], the Chairman of the Housing Subcommittee [Mr. LAZIO], and the Ranking Member of Subcommittee [Mr. FRANK] and the gentleman from Indiana [Mr. BEREUTER] for their assistance in incorporating the provisions for Native Hawaiian housing in the bill.

Passage of this bill is critical because within the last several years, three studies have documented the housing conditions that confront Native Hawaiians who reside on the Hawaiian home lands or who are eligible to reside on the home lands.

In 1992, the National Commission on American Indian, Alaska Native, and Native Hawaiian Housing issued its final report to Congress, "Building the Future: A Blueprint for Change." In its study, the Commission found that Native Hawaiians had the worst housing conditions in the State of Hawaii and the highest percentage of homelessness, representing over 30 percent of the State's homeless population.

In 1995, the U.S. Department of Housing and Urban Development issued a report entitled, "Housing Problems and Needs of Native

Hawaiians." This report contained the alarming conclusion that Native Hawaiians experience the highest percentage of housing problems in the nation—49 percent—higher than that of American Indians and Alaska Natives residing on reservations (44 percent) and substantially higher than that of all U.S. households (27 percent). The report also concluded that the percentage of overcrowding within the Native Hawaiian population is 36 percent compared to 3 percent for all other U.S. households.

Also, in 1995, the Hawaii State Department of Hawaiian Home Lands published a Beneficiary Needs Study as a result of research conducted by an independent research group. This study found that among the Native Hawaiians population, the needs of Native Hawaiians eligible to reside on the Hawaiian home lands are the most severe. 95 percent of home lands applicants (16,000) were in need of housing, with one-half of those applicant households facing overcrowding and one-third paying more than 30 percent of their income for shelter.

S. 1452 will provide eligible low-income Native Hawaiians access of Federal housing programs that provide assistance to low-income families. Currently, those Native Hawaiians who are eligible to reside on Hawaiian home lands but who do not qualify for private mortgage loans, are unable to access such Federal assistance.

I look forward to enactment to the bill because it is so important to the native people of Hawaii.

HONORING CAROL BEESE OF BARRINGTON, ILLINOIS

HON. PHILIP M. CRANE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 25, 2000

Mr. CRANE. Mr. Speaker, today I pay tribute to a good friend, Carol Beese, of Barrington, Illinois. Carol is a community leader without equal, and is retiring from the Barrington Area Chamber of Commerce after 32 years of service.

Carol became involved in the Barrington Area Chamber of Commerce many years ago. A true professional, her career in public service as a leader is rarely equaled. As President of the Chamber of Commerce, Carol has built the organization into one of the most energetic and engaged Chambers in the State of Illinois. She has been both dedicated and adamant with regard to the issues facing Chamber members, and is active as liaison between local businesses and Village officials.

She is truly deserving of this tribute, and I am certain she will remain committed to serving the Barrington community for many years to come.

HONORING FLINT, MI OFFICE OF HEARINGS AND APPEALS

HON. DALE E. KILDEE

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 25, 2000

Mr. KILDEE. Mr. Speaker, I rise before you to call attention to an event taking place in my

hometown of Flint, Michigan. Today, civic and community leaders will gather to mark the official relocation of the Social Security Administration's Flint Office of Hearings and Appeals to 300 W. Second Street.

Last year, the Flint Office of Hearings and Appeals celebrated its 25th Anniversary. Since 1974, the office has existed in the downtown business district, providing an accessible service for thousands of individuals. The office provides a public service not only to residents of Flint, but also to Ann Arbor, Bay City, Saginaw, West Branch, Alpena, and many other surrounding communities. Staffed by three Administrative Law Judges, a Senior Administrative Law Judge, and 25 loyal staff members, the office is one of the Social Security Administration's ten most productive offices nationally. During the 2000 fiscal year, the Flint OHA processed 1,994 dispositions.

I would also like to recognize Paul C. Lillios, Regional Chief Administrative Law Judge for Michigan, Ohio, Illinois, Indiana, Wisconsin, and Minnesota. Judge Lillios will be in attendance to officiate the ceremony. His presence is proof of the SSA's commitment to the city, and its pledge to implement reform that will prove beneficial to its customers.

Mr. Speaker, as a Member of Congress, I consider it both my duty and my privilege to work to improve the quality of life for our citizens. I am glad that one person who shares this sentiment is Kenneth Apfel, the Commissioner of Social Security. He has diligently worked to ensure that the offices under his care maintain a high standard of productivity. I am pleased that the Flint OHA is one such office that has lived up to this ideal. I ask my fellow Members of Congress to join me in recognizing the opening of the new OHA office, and the beginning of a new era in public service.

BREAST CANCER AWARENESS MONTH

HON. ROBERT A. UNDERWOOD

OF GUAM

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 25, 2000

Mr. UNDERWOOD. Mr. Speaker, in recognition of Breast Cancer Awareness Month, I rise in support of all of the women and families across this nation who have been affected by or are at risk of breast cancer.

Breast cancer is a serious health concern for all women. Besides skin cancer, more women in the United States are diagnosed with breast cancer than any other cancer each year. One in nine American women will be diagnosed with breast cancer during her lifetime, and about 40,800 will die from this disease during this year alone.

All women are at risk. Two-thirds of women with breast cancer have no family history of the disease or show other risk factors. Although there is a greater chance of incidence in women over 50 years old, breast cancer can occur at any age. White women are more likely to develop breast cancer than other women, however women of all races can be affected. For example, Asian Pacific Americans have a rate of 72.6 incidences per 100,000 people, and Hispanics have a rate of 69.4 of incidences per 100,000 people.

Such facts and figures illustrate the widespread severity of this issue, and I commend

the many local and national organizations who have dedicated their time and efforts in the fight against breast cancer. Many organizations are active in developing programs to raise awareness on breast cancer, conducting extensive research, organizing programs and support groups for breast cancer patients and families, performing community services and volunteer work, and compiling and distributing information. With the help of such efforts, women have detected breast cancer earlier through monthly breast exams and annual mammograms. Currently, there are two million breast cancer survivors in the United States.

I urge my colleagues to join the battle against breast cancer and support initiatives that help women across our nation face the challenges of this deadly disease. Therefore, I recognize Breast Cancer Awareness Month for all of the mothers, sisters, and daughters, families, and friends across the nation who have been affected by or are at risk of breast cancer, and I pay tribute to those who have passed on due to this disease.

INTRODUCTION OF THE BASIC ACCESS TO SECURE INSURANCE COVERAGE (BASIC) HEALTH PLAN ACT

HON. JOHN D. DINGELL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 25, 2000

Mr. DINGELL. Mr. Speaker, today, I am introducing the Basic Access to Secure Insurance Coverage Health Plan (BASIC) Act which builds on existing health insurance programs to provide all uninsured Americans, regardless of age or family status, the opportunity to get health insurance. The BASIC plan would create a universal guarantee for health insurance for all Americans.

While we are experiencing unprecedented prosperity and a strong economy, yet there are still 43 million of Americans who are uninsured. Being uninsured is not a "Washington problem." It is a human problem, as those 43 million people understand. In any given year, one-third of the uninsured go without needed medical care. Eight million uninsured Americans fail to take medication their doctors prescribe, because they cannot afford to fill the prescription. A new study published this month in the *Journal of the American Medical Association* confirms the serious health consequences of lacking insurance. Long-term and short-term uninsured adults were more likely than insured adults to face cost barriers to care and forgo needed care.

Lack of health insurance can have serious financial consequences as well. An uninsured family is exposed to financial disaster in the event of serious illness. Unpaid medical bills account for 200,000 bankruptcies annually. Over 9 million families spend more than one fifth of their total income on medical costs.

The BASIC Health Plan Act builds on two successful federal-state health insurance programs: Medicaid and the Children's Health Insurance Program (CHIP). The BASIC plan would extend these programs to all individuals and families with income up to 300% of the poverty level through a multi-year phase in. Other uninsured individuals may buy in to the program by paying the cost through premiums.

Since nearly three-fourths of the uninsured have family incomes below 300 percent of the poverty level, this expansion is targeted at those who need it.

This bill also includes a number of provisions to ensure that families can easily access health insurance through the BASIC program. First, it simplifies and streamlines the application and enrollment process for these programs to make them seamless. Second, the bill would make it easier for states to identify and enroll families in coverage. Third, the bill improves upon the CHIP benefit package to guarantee all children receive adequate preventive services and treatment.

Additionally, since 82 percent of the uninsured are workers or dependents of workers, this bill seeks to use families' connection to employment to facilitate access to health insurance coverage. Employers will not be required to provide coverage or contribute to the cost of coverage, although they may if they so wish. However, they will be required to facilitate access to the coverage by withholding any required premium contributions from the employee's periodic pay, just like they do for taxes today.

I believe the BASIC Health Plan Act is an excellent starting point for providing health care coverage for every American. Over the past few years, Congress has lost focus on addressing this pressing issue. This time is upon us again to place health insurance at the forefront of our agenda.

I look forward to working with my colleagues in the House and the Senate on the BASIC Health Plan Act to help provide health insurance coverage to many of the millions of Americans who are currently without health insurance.

NEED FOR LEGISLATION AND SUMMARY OF THE "BASIC" HEALTH PROGRAM: UNIVERSAL ACCESS TO AFFORDABLE QUALITY HEALTH INSURANCE

America is the only industrial country in the world, except South Africa, that does not guarantee health care for all its citizens. The number of uninsured declined last year for the first time in more than a decade—but 43 million Americans remain uninsured, and any slowdown in the economy is likely to send the number up again. The vast majority of the uninsured are workers or dependents of workers. The consequences of being uninsured go far beyond vulnerability to catastrophic medical costs. The uninsured often lack timely access to quality health care, especially preventive care. They suffer unnecessary illness and even death because they have no coverage.

Growth in the Uninsured

The number of the uninsured has grown from 32 million in 1987 to 43 million this year. Except for a brief pause in 1993 and 1994, the number of uninsured has consistently increased by a million or more each year until this year. Even these figures understate the number of the uninsured. During the course of a year, 70 million Americans will be uninsured for an extended period of time.

Characteristics of the Uninsured

The vast majority of privately insured Americans—161 million citizens under 65—receive coverage on the job as workers or members of their families. But the uninsured are also overwhelmingly workers or their dependents. Eighty-two percent of those without insurance are employees or family members of employees. Of these uninsured workers, most are members of families with at least one person working full-time.

Most uninsured workers are uninsured because their employer either does not offer coverage, or because they are not eligible for the coverage offered. Seventy percent of uninsured workers are in firms where no coverage is offered. Eighteen percent are in firms that offer coverage, but they are not eligible for it, usually because they are part-time workers or have not been employed by the firm long enough to qualify for coverage. Only 12% of uninsured workers are offered coverage and decline.

The uninsured are predominantly low and moderate income persons. Almost 25 percent are poor (income of \$8,501 or less for a single individual; \$13,290 or less for a family of three). Twenty-eight percent have incomes between 100 and 200 percent of poverty. Eighteen percent have incomes between 200 and 300 percent of poverty. Almost three-fourths have incomes below 300 percent of poverty.

Consequences of Being Uninsured

An uninsured family is exposed to financial disaster in the event of serious illness. Unpaid medical bills account for 200,000 bankruptcies annually. Over 9 million families spend more than one fifth of their total income on medical costs. The health consequences of being uninsured are often as devastating as the economic costs:

In any given year, one-third of the uninsured go without needed medical care.

Eight million uninsured Americans fail to take medication their doctors prescribe, because they cannot afford to fill the prescription.

Thirty-two thousand Americans with heart disease go without life-saving and life-enhancing bypass surgery or angioplasty, because they are uninsured.

Twenty-seven thousand uninsured women are diagnosed with breast cancer each year. They are twice as likely as insured women not to receive medical treatment until their cancer has already spread in their bodies. As a result, they are 50% more likely to die of the disease.

The tragic bottom line is that 83,000 Americans die every year because they have no insurance. Being uninsured is the seventh leading cause of death in America. Our failure to provide health insurance for every citizen kills more people than kidney disease, liver disease, and AIDS combined.

THE PROPOSAL: SUMMARY OF BASIC ACCESS TO SECURE INSURANCE COVERAGE HEALTH PLAN ("BASIC" HEALTH PLAN)

Overview

The BASIC program builds on two successful federal-state health insurance programs: Medicaid and the Child Health Insurance Program (CHIP). It also incorporates a number of elements from Vice-President Gore's proposal to improve and expand upon insurance coverage under CHIP and Medicaid to the parents of eligible children. The BASIC plan extends the availability of subsidized coverage to all uninsured low and moderate income Americans, regardless of age or family status. It guarantees the availability of coverage in every state for every uninsured person, and includes provisions to encourage enrollment by those who are eligible. The plan also allows other uninsured individuals to buy-in to the program by paying the full premium.

Key Provisions

PHASE I: COVERAGE FOR CHILDREN AND PARENTS—EXPANSION OF CHIP AND MEDICAID

Eligibility levels are raised to 300% of poverty (\$42,450 for a family of three) for all uninsured children over 2 years.

Coverage is made available to all uninsured parents of enrolled children.

Coverage is made available to legal immigrant children, and their parents.
