

And what do we see? Cocaine production surges in Colombia. Now, I wonder why.

This report also details an incredible story about a request from the United States Ambassador to Peru. Now, that would be a Clinton appointee. The U.S. Ambassador to Peru on page 17 and 18 of this report warned in an October 1998 letter to the State Department that the reduction in air support could have a serious impact on the price of coca and coca production in Peru. Here we put in place a very cost-effective and effective program and we have gotten a 60 percent reduction in cocaine and coca production in Peru. The Ambassador asked for assistance and warned that the reduction that is detailed here, the reduction that this administration has directed basically taking us out of this effort is going to result in additional coca production. I was stunned to learn by information provided to me at the Southcom briefing in Miami by our leaders down there that for the first time they are now seeing an increase in production of cocaine and coca in Peru again. It is incredible that we cannot get minimal resources and cost-effective resources to the source countries to stop illegal narcotics production and then get the drugs before they get to our shores, interdict them and at least provide the intelligence and surveillance information to countries that have the will like President Fujimora who instituted a shutdown policy. The drug dealers go up and they shot them down. Some people did not want us to provide that information to the government of Peru. Some people said that was cruel and unusual punishment on those drug dealers. I would like to take those who believe that and let them talk to the mothers and fathers in my district that have lost a young person to drug overdose. I would like to take them to the 15,900 Americans who just in 1 year to their families, the survivors who have lost a loved one and see what they think about this failed policy.

I think it is also important to see what this policy has wrought on this Nation of late. Just during the recess in the last few days, there was a report, and actually this is from last week, this is January 27, ironically the same day the President stood a few feet from where I am now standing and talked to us about the State of the Union. He did not talk about the State of the Union in this headline: Drug Use Explodes in Rural America. Not only have our urban centers been decimated by illegal narcotics, not only has now our suburban area, the other parts of the country, and I represent a suburban area that had really not been victim here, but now, thanks to this great policy and this great failure, we have managed to make our rural areas a killing fields. The statistics are unbelievable. The percent of eighth graders who said they used a drug at least once, the highest percentage of this use in marijuana, cocaine, crack, heroin

and amphetamines is now in our rural areas. We did not hear the President talk about that. Nor did we hear him talk about this failed policy. And now we know why, because the legacy of this administration to address the most serious social problem we face in our Nation, that is again destroying countless lives, that again is impacting our youth in every part of our country, metropolitan, suburban and now rural, we see why we have gotten ourselves into this situation by again failed policies.

It is nice to talk about who failed, and I do not want to be partisan in that, but I think people must be held accountable. I should also report that the Republican majority has begun to put this effort back together. We have begun to restore the cost-effective programs, the one I described in stopping cocaine production in Peru and Bolivia. We would like to restart it in Colombia, but we need an administration that is capable of at least delivering the resources to our allies in this effort and restarting a real war on drugs where the drugs are produced, where the drugs are coming from. Additionally, we have brought the Coast Guard back and United States customs and provided additional funding and resources. We are back up to the 1992-1993 funding levels for that.

Now, we know that just restarting interdiction and source country programs is not the answer. I had proposed legislation that would require our media and particularly those broadcast media, because I know television, radio impact our lives and particularly our young people, influence their opinion more than just about anything today. But I had proposed that they devote more of their time. In fact, we mandate that that time, public airtime be given to drug messages and not just at odd hours but throughout prime time. The President, of course, has had a different approach, which was spending, and he proposed expenditure and purchase of those. The compromise, and, of course, we must deal in a compromise situation to get anything done here because we have a great diversity and a very narrow majority, the compromise was a plan that combined my plan with the President's plan, and we have \$1 billion appropriated for 3 years for drug education, we are 1 year into it, and the other part of the compromise was to have at least a match in donated time. We are 1 year into it. I am not real pleased with the beginning. I thought it was not a good start. Hopefully we will have even more effective drug and antinarcotics ads, education ads for our young people and adults, because it is important that education along with eradication, interdiction, enforcement and also treatment be part of a multifaceted approach.

I look forward to working with my colleagues and bringing that multifaceted approach. I am pleased to report again on this issue to the Congress and the American people.
